International Bibliography of Business History Francis Goodall, Terry Gourvish, Steven Tolliday, 2013-12-16 The field of business history has changed and grown dramatically over the last few years. There is less interest in the traditional 'company-centred' approach and more concern about the wider business context. With the growth of multi-national corporations in the 1980s, international and inter-firm comparisons have gained in importance. In addition, there has been a move towards improving links with mainstream economic, financial and social history through techniques and outlook. The International Bibliography of Business History brings all of the strands together and provides the user with a comprehensive guide to the literature in the field. The Bibliography is a unique volume which covers the depth and breadth of research in business history. This exhaustive volume has been compiled by a team of subject specialists from around the world under the editorship of three prestigious business historians.

Germany and the Second World War, 1990 This is the second in the comprehensive ten-volume Germany and the Second World War. The five volumes so far published in German take the story to the end of 1941, and have achieved international acclaim as a major contribution to historical study. Under the auspices of the Militärgeschichtliches Forschungsamt (Research Institute for Military History), a team of renowned historians has combined a full synthesis of existing material with the latest research to produce what will be the definitive history of the Second World War. This volume surveys the first year of the war deliberately begun by Nazi Germany. The authors examine the train of interconnected political and military events, and set military operations against the background of Hitler's war policy and general aims, both immediate and long term. The authors show that the conflict took a course quite different from that which Hitler had intended, but nevertheless resulted in a series of conquests for the Third Reich.

Germany and the Second World War Ralf Blank, Jörg Echternkamp, Karola Fings, Jürgen Förster, Winfried Heinemann, Tobias Jersak, Armin Nolzen, Christoph Rass, 2008-07-03 The Second World War affected the lives and shaped the experience of millions of individuals in Germany - soldiers at the front, women, children and the elderly sheltering in cellars, slave labourers toiling in factories, and concentration-camp prisoners and POWs clearing rubble in the Reich's devastated cities. Taking a 'history from below' approach, the volume examines how the minds and behaviour of individuals were moulded by the Party as the Reich took the road to Total War. The ever-increasing numbers of German workers conscripted

into the Wehrmacht were replaced with forced foreign workers and slave labourers and concentration camp prisoners. The interaction in everyday life between German civilian society and these coerced groups is explored, as is that society's relationship to the Holocaust. From early 1943, the war on the home front was increasingly dominated by attack from the air. The role of the Party, administration, police, and courts in providing for the vast numbers of those rendered homeless, in bolstering civilian morale with 'miracle revenge weapons' propaganda, and in maintaining order in a society in disintegration is reviewed in detail. For society in uniform, the war in the east was one of ideology and annihilation, with intensified indoctrination of the troops after Stalingrad. The social profile of this army is analysed through study of a typical infantry division. The volume concludes with an account of the various forms of resistance to Hitler's regime, in society and the military, culminating in the failed attempt on his life in July 1944.

The Discovery of Historicity in German Idealism and Historism Peter Koslowski, 2005-03-04 German Idealism develops its philosophy of history as the theory of becoming absolute and as absolute knowledge. Historism also originates from Hegel's and Schelling's discovery of absolute historicity as it turns against Idealism's philosophy of history by emphasizing the singular and unique in the process of history. German Idealism and Historism can be considered as the central German contribution to the history of ideas. Since Idealism became most influential for modern philosophy and Historism for modern historiography, they are analyzed in this volume in a collaboration of philosophers and historians. German Idealism is presented in Schelling and its critics Schlegel, Baader, and Nietzsche; Historism in Ranke, Droysen, Burckhardt, and Treitschke. The volume further presents the impact of Idealism and Historism on present German approaches to the philosophy of history and outlines the debates on the possibility of a philosophy of history and on the methodology of the historical sciences.

Transformations of Retailing in Europe after 1945 Lydia Langer, 2016-02-17 After World War II, structures, practices and the culture of retailing in most West European countries went through a period of rapid change. The post-war economic boom, the emergence of a mass consumer society, and the adaptation of innovations which already had been implemented in the USA during the interwar period, revolutionized the world of getting and spending. But the implementation of self-service and the supermarket, the spread of the department store and the mail order business were not only elements of a transatlantic catch up process of 'Americanization' of retailing. National patterns of the retail trade and specific cultures of consumption remained crucial, and long term processes of change, starting in the 1920s or 1930s, also had an impact on the transformation of retailing in post-war Europe. This volume presents a series of case-studies looking at transformations of retailing in several European countries, offering new insights into the structural preconditions of the emerging mass consumer societies and also into the consequences consumerism had on the practices of retailing.

Sky-High Eric P. Nash, 2023-06-27 Part architectural guidebook and part critique, Sky-High documents the pencil-thin,

supertall towers that are transforming New York City's skyline as well as its streets. New York City's penchant for building skyward has reached new heights with its crop of supertall towers—those that rise at least 984 feet above the sidewalk. The city that never sleeps is also the city that never stops building ever higher, from the Woolworth and Chrysler buildings of an earlier race to the top to today's super luxury aeries of 57th Street's Billionaires' Row and the towers of the World Trade complex in Lower Manhattan. Bruce Katz's extraordinary photographs capture a dozen of these self-styled odes to wealth and power, alongside Eric P. Nash's incisive critique documenting the evolution of the skyline, past and present, and the supertalls' transformative effects on the contemporary cityscape. Among the twelve buildings featured are One World Trade Center, Three World Trade Center, 30 Hudson Yards, 35 Hudson Yards, One57, 432 Park Avenue, 53West53, Central Park Tower, and One Vanderbilt.

Economic Growth and the Origins of Modern Political Economy Philipp R. Rössner, 2016-05-12 Economic Growth and the Origins of Modern Political Economy addresses the intellectual foundations of modern economic growth and European industrialization. Through an examination both of the roots of European industrialization and of the history of economic ideas, this book presents a uniquely broad examination of the origins of modern political economy. This volume asks what can we learn from 'old' theories in terms of our understanding of history, our economic fate today, and the prospects for the modern world's poorest countries. Spanning across the past five hundred years, this book brings together leading international contributors offering comparative perspectives with countries outside of Europe in order to place the evolution of modern economic knowledge into a broader reference framework. It integrates economic discourse and the intellectual history of political economy with more empirical studies in economic history and the history of science. In doing so, this innovative volume presents a coherent and innovative new strategy towards a reconfiguration of the history of modern political economy. This book is suitable for those who study history of economic thought, economic history or European history.

The Family in Modern Germany Lisa Pine, 2020-04-16 This cutting-edge edited collection examines the impact of political and social change upon the modern German family. By analysing different family structures, gender roles, social class aspects and children's socialization, *The Family in Modern Germany* provides a comprehensive and well-balanced overview of how different political systems have shaped modern conceptualizations of the family, from the bourgeois family ideal right up to recent trends like cohabitation and same-sex couples. Beginning with an overview of the 19th-century family, each chapter goes on to examine changes in family type, size and structure across the different decades of the 20th century, with a focus on the relationship between the family and the state, as well as the impact of family policies and laws on the German family. Lisa Pine and her expert team of contributors draw on a wealth of primary sources, including legal documents, diaries, letters and interviews, and the most up-to-date secondary literature to shed new light on the continuities and changes in the history of the family in modern and contemporary Germany. This book is a fantastic resource for scholars, postgraduates and advanced undergraduates studying modern German history, sociology and social policy.

History's Greatest War Samuel John Duncan-Clark, 1919

GERMANY'S END Augustin Ostace, 2018-12-12 It is rational or irrational to believe toward an End of Germany? If the people of German (what really has remained out of Germany after the World War Two) is very determined to do so, and wants to fulfill it, the author is enforced to recognize it and to sign it, despite of his singular protesting against it. The History is always merciless as well as with individual and national, and the big mistakes of Germans (particularly in the last century through World War One, World War Two and World Emigration War Three) throughout of their two Millennia long history, will be costly paid by the whole of Germany and by the whole of Europe. Great Minds in Despair Frank W. Stahnisch, 2025-08-10 The twentieth century witnessed two devastating world wars that led to the exodus of millions of people. Counted among them were hundreds of neuroscientists and biological psychiatrists from Nazi Germany and its surrounding countries who were forced to emigrate in the 1930s and 1940s. Many of them settled in North America, where they profoundly influenced the development of the biomedical sciences. Focusing on the years between 1933 and 1989, *Great Minds in Despair* examines the long-term effects of this forced migration on scientific and medical cultures in North America and on the researchers themselves. Frank Stahnisch traces the lives and careers of

approximately four hundred German-speaking doctors, scientists, and researchers over two generations. Placed in unfamiliar research settings in Canada and the United States, they helped to build the fields of neuroscience, psychiatry, clinical psychology, and the cognitive sciences, even as they rebuilt their own lives amid myriad challenges including cultural adaption and the complications of relicensing. Stahnisch explores how generational factors, gender, international networking, refugee organizations, and national funding agencies shaped their experiences and affected postwar remigration. *Great Minds in Despair* provides an important revision to the brain gain thesis in migration studies by turning attention to the working conditions and social acculturation of an influential academic refugee group in North America.

The Templars Jochen Burgtorf, Shlomo Lotan, Enric Mallorquí-Ruscalleda, 2021-04-21 As the oldest of the military religious orders and the one with an unexpected and dramatic downfall, the knighthood of the Templars continues to fascinate academics and students as well as the public at large. A collection of fifteen chapters accompanied by a historical introduction, *The Templars: The Rise, Fall, and Legacy of a Military Religious Order* recounts and analyzes this community's rise and establishment in both the crusader states of the eastern Mediterranean and the countries of western Europe during the twelfth and thirteenth centuries, reflects on the proceedings launched against it and its subsequent fall (1307-1314), and explores its medieval and post-medieval legacy, including an assessment of current research pertaining to the Templars and suggestions for future explorations. Showcasing a wide range of methodological approaches and primary source materials, this volume unites historical, art-historical, theological, archaeological, and historiographical perspectives, and it features the work and voices of scholars from various academic generations who reside in eight different countries (Israel, France, Italy, Spain, the United Kingdom, Germany, Poland, and the United States of America).

Modern Religious Architecture in Germany, Ireland and Beyond Lisa Godson, Kathleen James-Chakraborty, 2019-03-07 Modernity and religion are not mutually exclusive. Setting German and Irish church, synagogue and mosque architecture side by side over the last century highlights the place for the celebration of the new within faiths whose appeal lies in part in the stability of belief they offer across time. Inspired by radically modern German churches of the 1920s and 1930s, this volume offers new insights into designers of all three types of sacred buildings, working at home and abroad. It offers new scholarship on the unknown phenomenon of mid-century ecclesiastical architecture in sub-Saharan Africa by Irish designers; a critical appraisal of the overlooked Frank Lloyd Wright-trained Andrew Devane and an analysis of accommodating difficult pasts and challenging futures with contemporary synagogue and mosque architecture in Germany. With a focus on influence and processes, alongside conservationists and historians, it features critical insights by the designers of some of the most celebrated contemporary sacred buildings, including Niall McLaughlin who writes on his multiple award-winning Bishop Edward King Chapel and Amandus Sattler, architect of the innovative Herz-Jesu-Kirche, Munich.
