Materiales de construcción AA. VV.,2007-11 Este volumen ofrece un completo retrato de los distintos materiales empleados en la construcción: piedras naturales y artificiales, hormigón, materiales cerámicos, materiales de aislamiento térmico y acústico, etc. Al principio del presente capítulo se tratarán los diferentes tipos de piedras naturales que se utilizan habitualmente en la construcción actual. Como se verá en la mayoría de los casos que se exponen, su uso se centra esencialmente en la fase de acabados de la obra. Aunque se trata de un material tradicional, es necesario conocer bien sus propiedades y en especial su comportamiento, por lo que a continuación se explicará cómo clasificar aquellas piedras naturales más utilizadas y distinguir las características físicas que las definen. Por otro lado, se hablará de aquellos materiales que se definen como piedras artificiales, que en la construcción actual constituyen una parte muy importante de los materiales utilizados, y en especial se expondrán cuáles son sus componentes básicos y sus propiedades.

Lo natural, lo artificial y la cultura Javier Bustamante Donas,2011 Este nuevo volumen de Estudios Interdisciplinarios reúne diversas reflexiones que abordan el problema de lo natural y de lo artificial en el marco de la cultura humana. Lo natural y lo artificial son siempre parte de la naturaleza real. Pero la acción humana debe ser creadora de cultura y, por ello, tanto su vinculación a la naturaleza como su acción creadora de un mundo de artefactos posibles deben estar siempre al

servicio de la especie humana, es decir, al servicio de la calidad existencial y de la dignidad del hombre.
