Great Books for High School Kids Rick Ayers, Amy Crawford, 2004-05-15 Teachers Rick Ayers and Amy Crawford always wanted to find a guide to the vast world of great books for teenagers-one that didn't talk down or moralize. When they couldn't find one, they set out to create it. An early prototype offered at Cody's Bookstore in Berkeley, California, was an instant success. Great Books for High School Kids is the culmination of their efforts. Collecting recommendations and essays from colleagues and advisers around the country, this is a rollicking, thoughtful, against-the-grain guide that challenges stodgy notions of what great books are and what kids are ready for. The book starts with seven essays by high school teachers about exciting, exemplary experiences they have had reading books with students in the classroom-from Dorothy Allison's *Bastard Out of Carolina* to Toni Morrison's *Song of Solomon* to Aeschylus's *Oresteia* trilogy. Augmented by an index of more than seventy subjects, the book also has an annotated list of hundreds of Recommended Great Books. The recommendations are playful and irreverent, ambitious and entertaining, and they go way beyond traditional reading lists. From classics to the unexpected, from literary novels to nonfiction, some drama, and even a little poetry, these are all books that teenagers have read with pleasure and can read on their own. Great Books for High School Kids is an invitation and a sourcebook for inspiring passionate, lifelong readers-a book that could seriously change the lives of teachers, of families, and of kids.

Graphic Novels in High School and Middle School Classrooms William Boerman-Cornell, Jung Kim, Michael L. Manderino, 2017-07-05 The ultimate guide for using graphic novels in any middle school or high school classroom, this book considers how the graphic novel format can support critical thinking and help reach disciplinary goals in history, English language arts, science, math, fine arts, and other subjects. Using specific graphic novels as examples, this book considers how to help students read, question, and write about both fiction and non-fiction. Whether teachers are new to graphic novels or have been working with them for years, this book will help improve instruction. Chapters tell us how to teach with graphic novels, focusing on how disciplinary literacy can inform graphic novel instruction; how readers should consider text, image, and the intersection of the two when reading a graphic novel; and how graphic novels can encourage critical response and interdisciplinary instruction. Throughout the book, the authors illustrate important teaching concepts with examples from recent graphic novels. Appendices offer recommendations of graphic novels ideal for different disciplines. Teachers who

are serious about using graphic novels effectively in the classroom will find this book invaluable.

Teaching Graphic Novels Katie Monnin,2010 Harness the power of graphic novels to promote literacy and engage all secondary students with *Teaching Graphic Novels* by Katie Monnin! Address print-text and image literacies, from navigating text features to creating standards-based lessons on reading comprehension, fiction/nonfiction, written response, critical thinking, and media literacy. Complete with examples from graphic novels, professional resource suggestions, strategies that can be used with any graphic novel, cross-indexes of middle and high school graphic novels and themes, reproducibles, and extra support for English-language learners. *Teaching Graphic Novels* was a finalist for both the 2009 ForeWord Education Book of the Year and the 2010 AEP Distinguished Achievement Award in the 6-8 Curriculum and Instruction category!

Critical Approaches to Teaching the High School Novel Crag Hill,Victor Malo-Juvera,2018-10-25 This edited collection will turn a critical spotlight on the set of texts that has constituted the high school canon of literature for decades. By employing a set of fresh, vibrant critical lenses—such as youth studies and disabilities studies— that are often unfamiliar to advanced students and scholars of secondary English, this book provides divergent approaches to traditional readings and pedagogical practices surrounding these familiar works. By introducing and applying these interpretive frames to the field of secondary English education, this book demonstrates that there is more to say about these texts, ways to productively problematize them, and to reconfigure how they may be read and used in the classroom.

Crash Course in Children's Services Penny Peck,2014-09-26 Useful for newcomers to the children's library staff as well as longtime children's librarians, the second edition of this popular handbook provides easy-to-follow instructions to make innovations in children's library materials work for you. Addressing everything from the basics of reference to the complex and highly specialized duties of program development, this handbook is perfect for both librarians and support staff who are assigned to the children's department of a library. This second addition of *Crash Course in Children's Services* covers many of the new issues facing children's library staff, including eBooks, using apps in programming, other online reading options, book trailers, nonfiction and the Common Core curriculum. It also describes expanded programming options such as makerspaces, gaming, dog reading programs, and play at storytime. Ideal for new children's librarians as well as experienced library staff who have not worked with children recently and long-time children's librarians looking to add new

skills to their tool kits, the book familiarizes readers with all the new developments of the past few years, from online reading options to the wealth of new programming aimed at youth. You'll learn about subjects such as pop-up and passive programming, offering online homework help, and outreach and services to special needs children, and then quickly implement new practices into use at your library.

Literature Suppressed on Social Grounds Dawn B. Sova,2014-05-14 Literature Suppressed on Social Grounds, Revised Edition discusses writings that have been banned over the centuries because they offended or merely ignored official truths; challenged widely held assumptions; or contained ideas or language unacceptable to a state, religious institution, or private moral watchdog. The entries new to this edition include the Captain Underpants series, We All Fall Down by Robert Cormier, and Jake and Honeybunch Go to Heaven by Margaret Zemach. Also included are updates to the censorship histories of such books as To Kill a Mockingbird and Of Mice and Men.

Affirming Black Students' Lives and Literacies Arlette Ingram Willis,Gwendolyn Thompson McMillon,Patriann Smith,2022 Drawing on the authors' experiences as Black parents, researchers, teachers, and teacher educators, this timely book presents a multipronged approach to affirming Black lives and literacies. The authors believe change is needed—not within Black children—but in the way they are perceived and educated, particularly in reading, writing, and critical thinking across grade levels. To inform literacy teachers and school leaders, the authors provide a conceptual framework for reimagining literacy instruction based on Black philosophical and theoretical foundations, historical background, literacy research, and authentic experiences of Black students. This important book includes counternarratives about the lives of Black learners, research conducted by Black scholars among Black students, examples of approaches to literacy with Black children that are making a difference, conversations among literacy researchers that move beyond academia; and a model for engaging all students in literacy. Affirming Black Students' Lives and Literacies advocates for adopting a standard of care that will improve and support literacy achievement among today's Black students by rejecting deficit presumptions and embracing the fullness of these students' strengths. Book Features: A counternarrative of Black literacy history, lives, and learners.

Narrative examples of Black literacy scholarship, by Black scholars who embrace their faith-walk as an integral part of their holistic approach to literacy teaching and learning. Discussion questions to spur conversations among school administrators, parents/caregivers, politicians, reading researchers, teacher educators, and classroom teachers. An array of extant Black scholarship that should inform literacy praxis and research. A conceptual framework, CARE, that is applicable for all learners with a focus on Black literacy learners.

Teaching Graphic Novels to Adolescent Multilingual (and All) Learners Kristine Gritter, Xu Bian, Deborah Van Duinen, Bill Boerman-Cornell, 2023-12-19 This book provides a roadmap for teaching with graphic novels as an effective and engaging approach to advancing reading comprehension for English Learners in secondary schools. Accessibly synthesizing and presenting existing graphic novel research, the authors walk through how to use graphic novels as a teaching tool to improve student motivation and key reading skills, increase their reading proficiency levels, and bolster their vocabulary. The authors provide curricular ideas for teaching multilingual, gifted, and striving readers, along with methods for developing critical literacy and multimodal comprehension. Applying a universal design approach and including examples, current graphic novel recommendations, and pedagogical strategies, this book is essential reading for pre-service teachers in TESOL and literacy education.

Controversial Books in K-12 Classrooms and Libraries Randy Bobbitt, 2019-10-04 *Controversial Books in K-12 Classrooms and Libraries: Challenged, Censored, and Banned* analyzes the history of controversy surrounding assigned reading in K-12 classrooms and books available in school libraries. Randy Bobbitt outlines the history of book banning and controversy in the United States, stemming from 1950s conservative Cold War values of patriotism and respect for authority and ramping up through the 1960s and onward as media coverage and parental intervention into the inner workings of schools increased. The author claims that sensitive topics, including sexuality, suicide, and drug use, do not automatically imply the glorification of deviant behavior, but can be used constructively to educate students about the reality of life. Bobbitt argues that in an effort to shield children from the dangers of controversial issues, parents and administrators are depriving them of the ability to discover and debate values that are inconsistent with their own and those around them, teaching instead that avoidance of different viewpoints is the solution. Scholars of education, communication, literature, and policy will find this book especially useful.

Using Graphic Novels in the STEM Classroom William Boerman-Cornell, Josha Ho, David Klanderman, Sarah Klanderman, 2023-11-02 This book provides everything STEM teachers need to use graphic novels in order to engage students, explain difficult concepts, and enrich learning. Drawing upon the latest educational research and over 60 years of

combined teaching experience, the authors describe the multimodal affordances and constraints of each element of the STEM curriculum. Useful for new and seasoned teachers alike, the chapters provide practical guidance for teaching with graphic novels, with a section each for Science, Technology, Engineering, and Mathematics. An appendix provides nearly 100 short reviews of graphic novels arranged by topic, such as cryptography, evolution, computer coding, skyscraper design, nuclear physics, auto repair, meteorology, and human physiology, allowing the teacher to find multiple graphic novels to enhance almost any unit. These include graphic novel biographies of Stephen Hawking, Jane Goodall, Alan Turing, Rosalind Franklin, as well as popular titles such as T-Minus by Jim Ottaviani, Brooke Gladstone's The Influencing Machine, Theodoris Andropoulos's Who Killed Professor X, and Gene Yang's Secret Coders series.
