Politics at the Centre William P. Cross,André Blais,2012-01-12 *Politics at the Centre* studies the ways in which political parties select and remove their leaders in five parliamentary democracies: Australia, Canada, Ireland, New Zealand, and the United Kingdom. It addresses the subject through cross national comparison of 25 parties in these countries from 1965 to the present day.

Research Methods in the Social and Health Sciences Ted Palys,Chris Atchison,2021-02-05 *Research Methods in the Social and Health Sciences: Research Decisions*, by Ted Palys and Chris Atchison, gives students a thorough, thoughtful, and highly readable introduction to the entire research process from start to finish. From its underlying premise that your research questions and objectives, rather than any specific method, should guide your research, this book discusses each step of the research process, from limiting the scope of a literature review to navigating ethical considerations to deciding which methods are best suited for finding answers to specific research questions to how to analyze data and present findings. Readers are encouraged to think deeply about each step of the research process. The book promotes this deliberation by discussing the strengths and limitations of different methods and. Throughout the process, the authors provide many examples from their own and student research, sharing insights for research decisions arising from that experience. Readers

will develop the skills to create solid research questions, perform literature reviews, identify appropriate data sources and methods, conduct research, analyze and interpret data and translate the resulting knowledge generated from the research process to a wider audience- all core parts of the research process -by developing their knowledge and creating confidence in their own decision-making skills. After explaining the unique and often complementary strengths of qualitative and quantitative methods, students focus on what methods are best suited for finding answers to the research questions that interest them. Major types of research including experiments, case studies, surveys, quasi-experiments, ethnographies, focus groups, participatory action research, and archival studies all receive significant coverage. The text illustrates how these methods are enhanced by integrating them with 21st century technologies and combining them in mixed methods projects. Chapters on constructing a research proposal and disseminating research bookend the process with concrete steps in between to support students designing their own original research projects. Study questions at the end of each chapter encourage students to think critically about the research process and how the choices a researcher makes will broaden or constrain what they can find. By the end of the text, social and health science students will feel confident in undertaking ethical and thoughtful research.

Macro Talent Management Vlad Vaiman,Paul Sparrow,Randall Schuler,David G. Collings,2018-07-17 Macro Talent Management: A Global Perspective on Managing Talent in Developed Markets is the first book to focus specifically on country-level activities aimed at attracting, mobilizing, developing, and retaining top talent for economic success in developed markets. The book serves as a guide that orients the reader toward activities that increase their country's global competitiveness, attractiveness, and economic development through strategic talent management. This book brings together leading experts from around the world to address such issues as cross-border flows of talent, diaspora mobility, knowledge flows, global labour markets, and policies. Bringing together research from the fields of human resource management, international business, economic geography, comparative international development, and political economy, this is a definitive, comprehensive treatment of the topic aimed at advanced students and practitioners.

Big Data Management, Technologies, and Applications Hu, Wen-Chen,Kaabouch, Naima,2013-10-31 This book discusses the exponential growth of information size and the innovative methods for data capture, storage, sharing, and analysis for big data--Provided by publisher.

Big Data: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources,2016-04-20 The digital age has presented an exponential growth in the amount of data available to individuals looking to draw conclusions based on given or collected information across industries. Challenges associated with the analysis, security, sharing, storage, and visualization of large and complex data sets continue to plague data scientists and analysts alike as traditional data processing applications struggle to adequately manage big data. Big Data: Concepts, Methodologies, Tools, and Applications is a multi-volume compendium of research-based perspectives and solutions within the realm of large-scale and complex data sets. Taking a multidisciplinary approach, this publication presents exhaustive coverage of crucial topics in the field of big data including diverse applications, storage solutions, analysis techniques, and methods for searching and transferring large data sets, in addition to security issues. Emphasizing essential research in the field of data science, this publication is an ideal reference source for data analysts, IT professionals, researchers, and academics.

HCI in Business, Government and Organizations Fiona Fui-Hoon Nah,Keng Siau,2021-07-03 This book constitutes the refereed proceedings of the 8th International Conference on HCI in Business, Government and Organizations, HCIBGO 2021, which was held as part of HCI International 2021 and took place virtually during July 24-29, 2021. The total of 1276 papers and 241 posters included in the 39 HCII 2021 proceedings volumes was carefully reviewed and selected from 5222 submissions. The papers included in this book were organized in topical sections as follows: electronic, mobile and ubiquitous commerce; HCI in finance and industry; work and business operations; innovation, collaboration, and knowledge sharing; and digital transformation and artificial intelligence.
