

Tadao Ando 4x4 House

Who's Who Marquis, Marquis Who's Who

Tadao Ando: Houses Philip Jodidio, 2013-10-01 The most complete and comprehensive collection of residential projects from the world's most internationally recognized and renowned architect. Though prolific in civic and commercial work, Tadao Ando first gained recognition for his residential projects, which were constructed solidly of concrete but ingeniously imbued with light and air. This exhaustive study is a complete catalog of all his residential work to date, including two new homes just finished in 2013. This volume features unseen and unpublished works presented through lavish and striking color photographs as well as detailed architectural drawings and plans of over thirty years of Ando's residential work, from the Sumiyoshi Row House in 1975 to the current houses for global design connoisseurs and art collectors.

Minimum Space, Maximum Living M2 Philip Jodidio, 2006 A new look at a variety of small spaces from around the world, including residential, retail, commercial and other projects.

The Very Small Home Azby Brown, 2005 Building small can be a sign of higher ambitions, and those who take the time to peruse these pages will undoubtedly grow to appreciate that creating a small home can be an amazingly positive and creative act, one which can enhance life in surprising ways. The Very Small Home presents stunning design advances in Japan. Eighteen recent houses, from ultramodern to Japanese rustic, are explored in depth. Particular emphasis is given to what the author call the Big Idea-the overarching concept that does the most to make the house feel more spacious than it actually is. Among the Big Ideas introduced here are ingenious sources of natural light, well-thought-out atriums, snug but functional kitchens, unobtrusive partitions, and free-flowing circulation paths. An introduction by the author puts the house designs in the context of lifestyle trends, and highlights their shared characteristics. For each project, the intentions of the designers and occupants are examined. The result is a very human sensibility that runs through the book. A glimpse of the dreams and aspirations that these unique homes represent and that belies their apparent modesty. The second half of the book is devoted to illustrating the special features in the homes, from clever storage and kitchen designs, to ingenious skylights and nooks. As with his earlier *Small Spaces*, Azby Brown has given home owners, designers, and architects a fascinating new collection of thought-provoking ideas.

Concrete: From the Ground Up Larissa Theule, 2022-09-13 A stylish, eye-opening, utterly engaging, and often wry look at one of the marvels of the material world, from the ground up. From a lowly mixture of stone, sand, water, and cement have

sprung sidewalks, streets, and skyscrapers, sturdy lighthouses and magnificent palaces, long bridges and massive dams. In ancient building practices, in modern engineering, and in the architecture of the future, humble concrete plays a mighty role in the creation of the human-made world. Brimming with facts and spiced with clever running narrative in the form of repartee-filled speech bubbles, Concrete is as intimate and entertaining as it is informative and visually sweeping. Curious readers of all ages—from would-be engineers to science and history buffs to retro-design lovers—will delight in this bold, one-of-a-kind guide to the (literal) bedrock of civilization, amplified by a bibliography in the back matter.

Compact Houses Cristina del Valle, 2005 This volume showcases 55 architect-designed compact houses, including beach cottages, mountain houses, ski chalets, and vacation homes. Each project profiled includes a case history describing the design challenges the architect faced and how these were overcome.

Next Houses Ron Broadhurst, 2009-11 Presenting a collection of 25 houses on five continents, Next Houses is a tour of the finest residential architecture of this young century. Author Ron Broadhurst has selected examples from nine countries, showcasing established superstars and emerging architects, including UNStudio, David Adjaye, and David Chipperfield, among others. The products of dialogue between demanding clients and innovative designers, these houses represent the best and most innovative living spaces, including homes created with sustainability and ecofriendliness in mind—such as Werner Sobek's H16 and Krauss Schönberg's Haus W—as well as homes constructed on challenging sites—such as Tadao Ando's 4x4 House or Alvaro Leite Siza Vieira's Casa Tolo. An authoritative collection, Next Houses demonstrates uniquely of-the-moment architecture, and offers up a vision of how we will think of homes in the decades to come.

Top Japanese Architects Mary Cambert, 2005 This second installment in the new Top Architects series is dedicated to the best architects from Japan including each personal biography and vision.

The Architectural Index Ervin J. Bell, 2005 Indexes 9 architectural journals.

Living Plans Klaus-Peter Gast, 2005 Ground plan concepts for contemporary international housing are no longer dominated by standardized solutions and stylistic attitudes. They derive mainly from their occupants' widely varying lifestyles, so new principles for advanced spatial solutions have emerged very recently. The present basic work presents innovative ways of living in over 100 realized buildings. The examples extend from cost-optimized minimal housing via classical detached family houses and lavishly furnished villas to high-density detached and terraced homes in the city and on the outskirts. These novel Living Plans are analysed using elaborate new drawings of the ground plans, sections and spatial schemes, along with atmospheric photographs.--BOOK JACKET.
