Peace Education in a Postmodern World Ian M. Harris, 2013-12-16 This special issue of the Peabody Journal of Education provides a comprehensive overview of the latest developments in peace education reform. School reforms based upon principles of peace education have in common a belief in the power of peace to create a positive learning climate in schools and to address the problems of violence in the broader culture. A peace education strategy for improving school productivity rests upon three main assumptions: 1. Violence contributes to the poor performance of many students. 2. Adults in school settings need to address problems created by violence in order for schools to improve. 3. Anxieties that make it hard for students to master traditional subject matter can best be addressed by a comprehensive peace education strategy that makes school a safe place to learn and provides students with knowledge about alternative nonviolent ways to resolve conflicts. Peace building reforms go beyond responding to immediate forms of violence that may be overwhelming students and teachers to promoting positive images of peace through the study of nonviolence. Written by established experts in the field of peace education from six different countries, this collection of articles not only represents a wide variety of peace education practices from different corners of the globe, but it also represents varying academic perspectives. Educators can play a key role in helping human societies progress toward more sustainable ways of living by implementing peacemaking,

peacekeeping, and peace building strategies in school programs. Peace education reforms point to a new way of thinking about schools as vehicles for promoting a peace culture through insights offered by nonviolent theory.

Handbook of Research on Promoting Peace Through Practice, Academia, and the Arts Lutfy, Mohamed Walid, Toffolo, Cris, 2018-09-07 Academic disciplines perceive tranquility and a sense of contentment differently among themselves and therefore contribute to peace-building initiatives differently. Peace is not merely a function of education or a tool that produces amicable systems, but rather a concept that educational contributions can help societies progress to a more peaceful existence. The Handbook of Research on Promoting Peace Through Practice, Academia, and the Arts aims to provide readers with a concise overview of proactive positive peace models and practices to counter the overemphasis on merely ending wars as a solution. While approaching peace-building through multiple vantage points and academic fields such as the humanities, arts, social sciences, and theology, this valuable resource promotes peace-building as a cooperative effort. This publication is a vital reference work for humanitarian workers, leaders, educators, policymakers, academicians, undergraduate and graduate-level students, and researchers.

Abdi, Greg William Misiashzek, 2022-09-13 This handbook brings together a range of global perspectives in the field of critical studies in education to illuminate multiple ways of knowing, learning, and teaching for social wellbeing, justice, and sustainability. The handbook covers areas such as critical thought systems of education, critical race (and racialization) theories of education, critical international/global citizenship education, and critical studies in education and literacy studies. In each section, the chapter authors illuminate the current state of the field and probe more inclusive ways to achieve multicentric knowledge and learning possibilities.

Interreligious Curriculum for Peace Education in Nigeria Isaiah Ekundayo Dada, 2019-04-18 Nigeria, a country under a military regime for several years, transitioned to a civilian regime in May 1999. Since this change, violent conflicts between Christians and Muslims have continued to erupt. They constitute one of the gravest dangers facing Nigeria, a country with a population of 189 million people. What have Nigerian religious leaders done about this situation, especially in educational circles? Have they received formal educational training to understand the causes of this violence and especially how to provide alternatives for more peaceful relations within Nigeria? Does the current educational system in Nigeria provide the main ingredients for the promotion of a culture of peace? The absence and neglect of interreligious peace education as part of a peace education core program and the lack of an interreligious curriculum for peace education in the training of religious leaders are the two problems contributing towards the lack of effectiveness of religious leaders in promoting less violent and more peaceful living. The solution to the problem is proposed in this book entitled *Interreligious Curriculum for Peace Education in Nigeria*. The book develops a one-year curriculum, building on Yoruba, Islamic & Christian conceptions of peace, and teaches how to create safe, caring, spiritual, peaceful and successful interfaith

relationships between all Nigerian religious communities. In the long term, the book helps to educate religious leaders to contribute, in themselves and with the help of their respective religious communities, to reducing the growing religious violence in Nigeria.

Three Decades of Peace Education around the World Robin J. Burns, Robert Aspeslagh, 2014-01-14 First Published in 1996. The current world order poses new challenges to the theory and practice of peace education. Drawing on data gathered from around the world, Burns and Aspeslagh focus on how peace is presented in formal and informal educational settings and what effects ideologies have in shaping that presentation. The book views peace education in the context of education about other major social and political issues and in a variety of geopolitical settings, exploring factors that affect the generation, selection, organization, transmission, and evaluation of knowledge for peace. Following a review of major approaches to policy and praxis in peace education, the editors draw on original research to offer interpretations based on pragmatic, normative, and conceptual approaches to the individual, the state, and the role of political literacy. The use of a comparative educational framework that goes beyond curriculum studies and descriptive case studies presents a perspective that is innovative, and timely. The volume includes both bibliography and index.

Encyclopedia of Violence, Peace, and Conflict ,2008-09-05 The 2nd edition of Encyclopedia of Violence, Peace and Conflict provides timely and useful information about antagonism and reconciliation in all contexts of public and personal life. Building on the highly-regarded 1st edition (1999), and publishing at a time of seemingly inexorably increasing conflict and violent behaviour the world over, the Encyclopedia is an essential reference for students and scholars working in the field of peace and conflict resolution studies, and for those seeking to explore alternatives to violence and share visions and strategies for social justice and social change. Covering topics as diverse as Arms Control, Peace Movements, Child Abuse, Folklore, Terrorism and Political Assassinations, the Encyclopedia comprehensively addresses an extensive information area in 225 multi-disciplinary, cross-referenced and authoritatively authored articles. In his Preface to the 1st edition, Editor-in-Chief Lester Kurtz wrote: The problem of violence poses such a monumental challenge at the end of the 20th century that it is surprising we have addressed it so inadequately. We have not made much progress in learning how to cooperate with one another more effectively or how to conduct our conflicts more peacefully. Instead, we have increased the lethality of our combat through revolutions in weapons technology and military training. The Encyclopedia of Violence, Peace, and Conflict is designed to help us to take stock of our knowledge concerning these crucial phenomena. Ten years on, the need for an authoritative and cross-disciplinary approach to the great issues of violence and peace seems greater than ever. More than 200 authoritative multidisciplinary articles in a 3-volume set Many brand-new articles alongside revised and updated content

The Psychology of Peace Promotion Mary Gloria C. Njoku, Leonard A. Jason, R. Burke Johnson, 2019-07-04 This volume Psychology of Peace Promotion builds on previous volumes of peace psychology, extending its contributions by drawing from peace research and practices from five continents - Africa, Asia, Europe, North America and South America. The book discusses emerging disciplinary and inter-disciplinary theories and actions. Each chapter begins with a theoretical framework for understanding peace, followed by a critical review of peace promotion in a specific setting, and concludes with an illustration of psychological principles or theories in either a narrative format or an empirical investigation. This volume develops, as well as guides, its readers on the epistemology of promoting and sustaining peace in varied settings around the world. This book presents relevant, cutting-edge peace promotion strategies to anyone interested in promoting peace more effectively, including peace practitioners, scholars, teachers, and researchers, as well as the general reader. It presents a number of innovative approaches, illustrating their applications to specific social problems, settings and populations. In addition, this volume has much in store for both academic and practice-based scientists in the field of peace psychology, mental health professionals, administrators, educators, and graduate students from various disciplines. The goal is the promotion and sustenance of peace, using theoretically sound, yet innovative and creative approaches. As expressed by the United Nations Secretary, "peace does not occur by happenstance." Promoting and sustaining peace requires reflective, thoughtful, and targeted efforts. This book inspires its readers to develop a better understanding of peace and the means of promoting peace in a sustainable way.

Peace Education in Conflict and Post-Conflict Societies C. McGlynn, 2009-04-13 This collection of peace education efforts in conflict and post-conflict societies brings together an international group of scholars to offer the very latest theoretical and pedagogical developments. Rather than focus on ad hoc peace education efforts this book investigates the need for long term, systemic approaches and innovative pedagogies.

Peace Psychology in Australia Diane Bretherton, Nikola Balvin, 2012-01-13 This book is a case study of the development of peace psychology in Australia. While there is, in comparison to other countries, relatively little overt violence,

Australia the nation was founded on the dispossession of Indigenous people, and their oppression continues today. Peace Psychology in Australia covers the most significant issues of peace and conflict in the country. It begins with a review of conflict resolution practices among Australia's ancient Indigenous cultures and succinctly captures topics of peace and conflict which the country has faced in the past 222 years since British settlement. The fast population growth, thriving multiculturalism, leadership in international affairs and environmental isolation make Australia a microcosm for the study of human conflicts and peace movements.
