**Racing Death** Daniel K. O'Neill, 2018-07-09 I remember running in my very first race in July 1987. Lining up with over two hundred others to run fifteen kilometres was exhilarating and daunting. I hadn't really known how to train for a race, but there I was. To this day, I still remember the nerves and the excitement. After many races, including marathons and triathlons, I would discover that I was indeed pursuing life. I was running for the small boy inside of me who was beat down by childhood sexual abuse. I was running for the angry teenager in me who saw the hypocrisy of the world. I was pursuing the man I knew I could be! I was tired of running away. This is not a how-to book; it's a to-do book! I have no magic formula or secret to help you live the life you desire. The truth is that you'll need to do some work. But the ultimate payoff is achieving your vision, drawn from the life-sustaining energy of the Spirit within you. Living dead is not an option. We are

Racing Death in pursuit of a life that will give us abundance and eternal peace.

**Universe, Neutrinos, Stars and Life** Dieter Frekers, Peter Biermann, 2025-05-10 This popular science book takes readers on a journey through cosmic epochs, beginning with the Big Bang and cosmic inflation. It then delves into the early universe and primordial nucleosynthesis, explaining why this phase ended after just 10 minutes. The book describes how cosmic microwave radiation emerged and what astonishing information can be extracted from it today. It explores how elements are created in supernova explosions and how such events are used to determine the expansion of the Universe. Moreover, the Sun and its probable fate is discussed in detail. Complex topics such as relativity, neutron stars, black holes, gravitational waves, cosmic rays and dark matter are explained in a clear and accessible manner. In addition, the book addresses the question of how life could arise and what role neutrinos might play in the synthesis of life. Several of these topics are embedded in a historical context, with some discussions reaching back to the 18th century. The book highlights the most significant achievements by individual scientists involved. The book is the result of the annual "Münster Astroseminar", held at the University of Münster, and is aimed at a curious audience with no special prior knowledge. Readers interested in the origin and evolution of the cosmos will find accessible insights into current research of physics.

**New York School Journal** ,1898

*Existence: what it is and what we think it is* Victor Senchenko,2017-01-31 Existence: what it is and what we think it is engages logic and rational to expose and explain the defects of human opinions and beliefs that came into existence from human imagination rather than any precise, irrefutable knowledge, including that of knowing exactly what makes humans human, and knowing why everything that physically surrounds them - on Earth and beyond - always behaves within the states of physical reality and never any unreality. Yet, despite the seemingly overall human acceptance that physical existence (on Earth and beyond) constitutes physical reality, even the slightest examination of human notions and beliefs - including those accepted by science - shows just how much these notions and beliefs endorse and uphold physical unreality. The reason for such widespread acceptance of unreality amongst humans is due to their preference to believe the lies of those who advocate, for their own selfish reasons, that everything is possible, and that the security of all humanity can be assured by means of belief in intangible entities of gods, multi-dimensions, and time. It may appear improbable that the intentions of *Existence: what it is and what we think it is* to dismantle any of the erroneous notions and self-deceptions has much chance of success, considering how ingrained these beliefs are in human self-awareness. Still, it is possible that the disclosures and explanations provided in the book may lead some readers to realize that the future of mankind depends not on the usual attitudes of selfish wants and desires but on unrestricted understanding of physical reality - with all its limitations - which can teach humanity to carefully manage not just its future existence but that of all other inhabitants on Earth in its care.

Born Original, Lived a Copy Prince Ampomah,2024-07-26 Are you living your originality or living as a copy of someone's story? The relevance and magnitude of this question have an inescapable effect on our society today. I believe in man's

search for meaning and purpose; this is the most important question our generation must confront. Today's information age has thrust humanity into a very delicate phase of our evolution as humans. A phase propelled by earth-shattering advances in technology and artificial intelligence ushered in man's most fascinating friend and foe: social media. I believe the most profound question that our generation must confront is this: why has the temptation to unfold our lives as a copy of someone's life become so irresistible in these times? I believe there are many answers to this question, but I am convinced that chief among the answers is the fact that many people have stopped believing in the uniqueness and relevance of their stories, either because of societal pressures or personal circumstances. *Born Original, Lived a Copy* is an invitation to embrace the power of your authenticity and live a life that is true to your own desires, values, and dreams. It is a call to action for all those who yearn for a sense of purpose, fulfillment, and freedom. This book is an exploration of the profound journey we undertake in discovering our true identity amid the pressures of society. It delves into the universal struggles we face as individuals, seeking to reconcile our innate desire for self-expression without the fear of judgment and rejection. *Born Original, Lived a Copy* reminds us that we are born into this world as distinct beings, with a myriad of untapped potentials waiting to be unleashed. *Born Original, Lived a Copy* is a call to live you.

*Rework* Jason Fried, David Heinemeier Hansson, 2010-03-09 *Rework* shows you a better, faster, easier way to succeed in business. Most business books give you the same old advice: Write a business plan, study the competition, seek investors, yadda yadda. If you're looking for a book like that, put this one back on the shelf. Read it and you'll know why plans are actually harmful, why you don't need outside investors, and why you're better off ignoring the competition. The truth is, you need less than you think. You don't need to be a workaholic. You don't need to staff up. You don't need to waste time on paperwork or meetings. You don't even need an office. Those are all just excuses. What you really need to do is stop talking and start working. This book shows you the way. You'll learn how to be more productive, how to get exposure without breaking the bank, and tons more counterintuitive ideas that will inspire and provoke you. With its straightforward language and easy-is-better approach, *Rework* is the perfect playbook for anyone who's ever dreamed of doing it on their own. Hardcore entrepreneurs, small-business owners, people stuck in day jobs they hate, victims of downsizing, and artists who don't want to starve anymore will all find valuable guidance in these pages.

**Who Made the Moon?** Sigmund Brouwer, Prepare yourself for questions every parent or friend of a searcher must answer. As bestselling author Sigmund Brouwer began to hear more and more questions about creation from his growing daughters, he realized that the issue could easily turn them away from developing faith in God. Was he going to stand by and let them wrestle alone with widely asserted contradictions between science and Genesis, especially as they got older? Or

could he prepare himself to help them understand more clearly the truth in the Bible's foundation? In *Who Made the Moon?*, Brouwer engages the reader by combining easily understood science concepts with inspirational stories from a loving father's heart. He says, I believe it's my responsibility to know enough about both the Bible and science to answer the difficult questions. I want to be able to show my children that truth is indivisible and that faith in the God of Genesis has nothing to fear from science.

**Time** Dr. Lee, 2019-12-23 *Time: The Theory of Everything* By: Lee Poulin As a fourteen-year-old, author Lee Poulin asked his science teacher a question about space and time and was frustrated with the answer, which was clearly contradictory. Forty years later, Poulin doesn't think the science community has come up with any better answers for space and time. *Time: The Theory of Everything* attempts to answer these questions by looking at the basic ideas of science in a new way and being willing to challenge that Einstein may not be quite right in all his findings. Poulin challenges current thoughts on dark energy, gravity, dark matter, quantum physics, and much more. *Time: The Theory of Everything* will lead the reader to thinking about astrosiences in a new way.
