Cities in the 21st Century Oriol Nel-lo,Renata Mele,2016-02-19 Cities in the 21st Century provides an overview of contemporary urban development. Written by more than thirty major academic specialists from different countries, it provides information on and analysis of the global network of cities, changes in urban form, environmental problems, the role of technologies and knowledge, socioeconomic developments, and finally, the challenge of urban governance. In the mid-20th century, architect and planner Josep Lluís Sert wondered if cities could survive; in the early 21st century, we see that cities have not only survived but have grown as never before. Cities today are engines of production and trade, forges of scientific and technological innovation, and crucibles of social change. Urbanization is a major driver of change in contemporary societies; it is a process that involves acute social inequalities and serious environmental problems, but also offers opportunities to move towards a future of greater prosperity, environmental sustainability, and social justice. With case studies on thirty cities in five continents and a selection of infographics illustrating these dynamic cities, this edited volume is an essential resource for planners and students of urbanization and urban change.

[Urban Development in Asia and Africa](#) Yuji Murayama,Courage Kamusoko,Akio Yamashita,Ronald C. Estoque,2017-03-29 This book examines the urban growth trends and patterns of various rapidly growing metropolitan regions in developing Asian and African nations from the perspective of geography. State-of-the-art geospatial tools and techniques, including geographic information system/science and remote sensing, were used to facilitate the analysis. In addition to the empirical results, the methodological approaches employed and discussed in this book showcase the potential of geospatial analysis, e.g. land-change modeling for improving our understanding of the trends and patterns of urban growth in Asia and Africa. Furthermore, given the complexity of the urban growth process across the world, issues raised in this book will contribute to the improvement of future geospatial analysis of urban growth in the developing regions. This book is written for researchers, academicians, practitioners, and graduate students. The inclusion of the origin and brief history of each of the selected metropolitan regions, including the analysis of their urban primacy, spatiotemporal patterns of urban land-use changes, driving forces of urban development, and implications for future sustainable development, makes the book an

important reference for various related studies.

Towards a Liveable and Sustainable Urban Environment Liang Fook Lye, Gang Chen, 2010 With cities rapidly encroaching onto surrounding lands, the notion of eco-city proposes an innovative yet pragmatic approach to designing, building and operating cities in a way that the destructive impact of human urban activity upon nature will be significantly reduced. This book comprises of papers from a workshop organized by the East Asian Institute on Eco-cities in East Asia on 27 February 2009 in Singapore. Contributed by scholars, officials and environmental specialists from Japan, China, Malaysia, Indonesia, Thailand and the Philippines, the papers focus on how individual governments in these countries undertake eco-city projects. The book also highlights best practices that are useful to policy makers and anyone else who seeks to learn from the experiences of other countries in order to reduce their ecological footprints.

The Pisces Studies Michael Farbman, 1981 Essays on the role of USA and development aid in developing income generating activities in the informal sector for the low income urban population in developing countries - analyses the characteristics of successful projects and implications for donors and practitioners, based on case studies, discusses the methodologies, institutional framework, financial aspects, etc., and includes recommendations. Bibliography p. 55, photographs and references.

The Philippines David Joel Steinberg, 2018-02-19 A unified nation with a single people, the Philippines is also a highly fragmented, plural society. Divided between uplander and lowlander, rich and poor, Christian and Muslim, between those of one ethnic, linguistic, and geographic region and those of another, the nation is a complex mosaic formed by conflicting forces of consensus and national identity and of division and instability. It is not possible to comprehend the many changes in the Philippines?such as the rise and fall of Ferdinand Marcos or the revolution that toppled him?without an awareness of the religious, cultural, and economic forces that have shaped the history of these islands. These forces formed the focus of the first edition of The Philippines. Of that 1982 edition, the late Benigno Aquino Jr., noted that ?anyone wanting to understand the Philippines and the Filipinos today must include this book in his ``must' reading list.?The fourth edition has been updated through the final years of the Ramos presidency, and contains a new section on the impact of President Estrada.

China and the Philippines Phillip B. Guingona, 2023-11-08 Foregrounding the entangled history of China and the Philippines, Guingona brings to life an array of understudied, but influential characters, such as Filipino jazz musicians, magnetic Chinese swimmers, expert Filipino marksmen, leading Chinese educators, Philippine-Chinese bankers, Filipina Carnival Queens, and many others. Through archival research in multiple languages, this innovative study advances a more nuanced reading of world history, reframing our understanding of the first half of the twentieth century by bringing interactions between Asian people to the fore and minimizing the role of those who historically dominated global history

narratives. Through methodologically distinct case studies, Guingona presents a critique of Eurocentric approaches to world/global history, shedding light on the interconnected history of China and the Philippines in a transformative period. Mega-urban Regions in Pacific Asia Gavin W. Jones, 2008 Southeast Asia contains four urban conglomerates of the sort that this study characterizes as Mega-Urban Regions à Jakarta, Manila, Bangkok and Ho Chi Minh. These locations are examined in this book, along with Taipei and Shanghai. Because the administrative boundaries of the cities at the core of these zones do not include the entire urban area, the significance of the broader urban community has largely escaped scholarly attention. The authors base their analysis on actual agglomeration size rather than administrative boundaries, and draw on unpublished census data to study the dynamics of these massive urban zones, considering area and population size as well as social and demographic patterns of change in core, inner and outer zones. They conclude that these mega-urban regions continue to increase their share of national populations, and zones immediately beyond the official metropolitan boundaries are where the most dramatic changes are occurring.

Encyclopedia of World Cities Immanuel Ness, 2017-09-19 First Published in 2017. This encyclopedia, in A-Z format, has as its subject those cities that are the most important to the world in terms of their cultural, historic, economic, demographic or political significance: some 150 world cities are included. City profiles focus on areas such as economy, demographics, labour, culture, crime, education, health, housing, land and environment etc., as well as incorporating data that ranks each city on the basis of more than 75 indicators. This enables researchers to make direct comparisons between cities in different parts of the world.

The Report: Philippines 2021 Oliver Cornock, The Philippines is one of the world's fastest-growing nations. Although economic activity slowed during the 2020 Covid-19 pandemic period, stimulus measures, imminent public sector policies and a larger budget are expected to create jobs, generate growth and help kick-start the country's recovery during 2021.

The Report: Philippines 2016 Oxford Business Group, 2016-04-08 The Philippines emergence as a growth leader has been building gradually since the 1990s, following a long period of low growth and political upheaval. As of the 2010s improved governance under the administration of President Benigno Aquino III has helped to accelerate foreign direct

investment (FDI) in business process outsourcing while reviving FDI into the manufacturing sector. This, and a demographic bulge in the young adult bracket, helped bring the average pace of growth in the first half of the 2010s to 6.3%, beating all the country's main South-east Asian peers.

Ethno-religious Identification and Intergroup Contact Avoidance Menandro Sarion Abanes,2014 This study focuses on the latent aspects of an ethno-religious conflict, describing why and how people avoid contact with 'out-groups.' Their contact avoidance is largely based on the notion of power. The book shows how contact avoidance towards out-groups is related to people's ethno-religious identification. This is explained by various factors, such as a perceived group threat, out-group distrust, fundamentalism, quantity of contact, and direct experiences of violence. Finally, the book illustrates how education, mass media, and the history of conflict are related with intergroup contact avoidance. Rising India and Indian Communities in East Asia K Kesavapany,A Mani,P Ramasamy,2008 This edited volume containing thirty-five chapters focuses on three main contemporary issues: the phenomenon of new Indians in the past five decades, the impact of rising India on settled Indian communities, and the recent migrants. By examining these interrelated aspects, this study seeks to address questions like: what does Rising India mean to Indian communities in East Asia? How are members of Indian communities responding to India's rise? Will India pay greater attention to people of ...
