Shoegasm Clare Anthony, 2012-10-13 The last two decades have seen an explosion of creativity in footwear design. Sexy laced-up sandals, sky-high platform heels, and outrageously decorated shoes are seen on fashionable women everywhere, from the catwalk to the street.

Joost Van Den Vondel (1587-1679) Jan Bloemendal, Frans-Willem Korsten, 2011-11-25 Both historically and theoretically this book deals the work and the life of Joost van den Vondel, the most famous and controversial Dutch playwright in the Dutch Republic. Over twenty-five of his tragedies are analyzed, offering an overview of different theoretical approaches. Historically, Vondel is situated in his own times and in the present.

A Grammar of Tukang Besi Mark Donohue, 2011-05-12 The series builds an extensive collection of high quality descriptions of languages around the world. Each volume offers a comprehensive grammatical description of a single language together with fully analyzed sample texts and, if appropriate, a word list and other relevant information which is available on the language in question. There are no restrictions as to language family or area, and although special attention is paid to hitherto undescribed languages, new and valuable treatments of better known languages are also included. No theoretical model is imposed on the authors; the only criterion is a high standard of scientific quality. To discuss your book idea or submit a proposal, please contact Birgit Sievert.

Negation and Polarity Danielle Forget, 1997-01-01 In the last decade, there has been a revival of interest regarding negation and polarity, with much cross-fertilization between semantic and syntactic approaches. The papers in the present volume address key issues regarding the syntax and semantics of negation and polarity, including both synchronic and diachronic perspectives. Central to the discussions are the distribution of negative markers and the structure of the clause, negative concord phenomena, licensing of polarity items, similarities between Neg-movement and wh-movement. The papers, by main contributors to the field, reflect different theoretical frameworks, including Principles and Parameters and Minimalist approaches, Head-Driven Phrase Structure Grammar, Formal Semantics, or approaches interested in pragmatics. The volume is of interest to syntacticians, semanticians, historical linguists, typologists, and philosophers.

Grammaticalization Scenarios from Africa, the Americas, and the Pacific Walter Bisang, Andrej Malchukov, 2020-09-21 This volume intends to fill the gap in the grammaticalization studies setting as its goal the systematic

description of grammaticalization processes in genealogically and structurally diverse languages. To address the problem of the limitations of the secondary sources for grammaticalization studies, the editors rely on sketches of grammaticalization phenomena from experts in individual languages guided by a typological questionnaire.

Negation in Non-Standard British English Lieselotte Anderwald, 2003-08-27 Despite the advances of radio and television and increasing mobility and urbanization, spoken English is by no means becoming more like the written standard. English dialect grammar, however, is still a new and relatively undeveloped area of research, and most studies to date are either restricted regionally, or based on impressionistic statements. This book provides the first thorough empirical study of the field of non-standard negation across Great Britain.

Celebrating Indigenous Voice Alexandra Y. Aikhenvald, Robert L. Bradshaw, Luca Ciucci, Pema Wangdi, 2023-01-30 Every society thrives on stories, legends and myths. This volume explores the linguistic devices employed in the astoundingly rich narrative traditions in the tropical hot-spots of linguistic and cultural diversity, and the ways in which cultural changes and new means of communication affect narrative genres and structures. It focusses on linguistic and cultural facets of the narratives in the areas of linguistic diversity across the tropics and surrounding areas — New Guinea, Northern Australia, Siberia, and also the Tibeto-Burman region. The introduction brings together the recurrent themes in the grammar and the substance of the narratives. The twelve contributions to the volume address grammatical forms and categories deployed in organizing the narrative and interweaving the protagonists and the narrator. These include quotations, person of the narrator and the protagonist, mirativity, demonstratives, and clause chaining. The contributors also address the kinds of narratives told, their organization and evolution in time and space, under the impact of post-colonial experience and new means of communication via social media. The volume highlights the importance of documenting narrative tradition across indigenous languages.

Basic Linguistic Theory Volume 3 R. M. W. Dixon, 2012-05-25 Basic Linguistic Theory provides a fundamental characterization of the nature of human languages and a comprehensive guide to their description and analysis. In crystal-clear prose, R. M. W. Dixon describes how to go about doing linguistics. He shows how grammatical structures and rules may be worked out on the basis of inductive generalisations, and explains the steps by which an attested grammar and lexicon can be built up from observed utterances. He describes how the grammars and vocabulary of one language may be compared to others of the same or different families, explains the methods involved in cross-linguistic parametric analyses, and shows how to interpret the results. Volume 3 introduces and examines key grammatical topics, each from a cross-linguistic perspective.

The subjects include number systems, negation, reflexives and reciprocals, passives, causatives, comparative constructions, and questions. The final chapter discusses the relation between linguistic explanation and the culture and world-view of the linguist and speakers of the language he or she is describing. The book ends with a guide to sources, a consideration of the number of languages in the world, a glossary, and indexes of authors, languages, and subjects covering all three volumes. Volume 1 addresses the methodology for recording, analysing, and comparing languages and includes chapters on analysis, typology, phonology, the lexicon, and field linguistics. Volume 2, like the present work, considers underlying principles of grammatical organization, and has chapters devoted to the word, nouns and verbs, adjectives, transitivity, copula constructions, pronouns and demonstratives, possession, relative clauses and complementation. Basic Linguistic Theory is the triumphant outcome of a lifetime's thinking about every aspect and manifestation of language. The volumes comprise a one-stop introduction for undergraduate and graduate students of linguistics, as well as for those in neighbouring disciplines, such as psychology and anthropology.

The Work of Cepezed Architectenbureau Cepezed, 2007 In the past few decades, cepezed has gained renown with transparent, sustainable and technologically progressive architecture that is remarkably usable and humane. Unaffected design, sober but stylish materialization, and careful finishing are just as characteristic of Cepezed's oeuvre as the integration of spatial and construction-technical aspects. The design and building processes at cepezed are also integrated: the use of prefabricated components and the application of industrial building methods guarantee an optimum alignment of design and realization, in which time, quality, and costs are meticulously planned and controlled. *Prototypes* documents a large number of key projects and deals extensively with the various aspects of product development, building process and architecture. The layout and form of the book make it very similar to a cepezed design: clear, logical and efficient. It offers very incisive insight into the office philosophy that cepezed has drawn straight through architectural history. In addition to the timeless aesthetic pleasure that can be experienced in the designs and the craftsmanship displayed at detail level, the much-discussed role of the architect in the design process today is examined in the book. A must read for every architect who wrestles with the threatened depreciation of the discipline.

Here - Hither - Hence and Related Categories Julia Nintemann, Maja Robbers, Nicole Hober, 2020-07-20 As a follow-up study to the global comparison of spatial interrogatives (*Studia Typologica* 20), the present book examines the spatial declarative counterparts which are provided by the expression class of spatial deictic adverbs. In a functionally motivated typological approach, equivalents of Early Modern English *here - hither - hence* and *there - thither - thence* are identified

across a sample of 250 languages from all macro-areas. These are also quantitatively assessed to extrapolate areal and global trends of coding patterns. The formal relationships between spatial interrogative and spatial declarative paradigms are analyzed with a focus on the syncretism of categories and of individual cells. Qualitative discussions of patterns precede in-depth treatments of problematic cases and other relevant issues related to the research topic. The quantitative results strongly point to areal linguistic trends concerning the distribution of distinct and non-distinct coding of the three spatial relations Place, Goal, and Source. Additional aspects such as quantitative evaluations of constructional complexity are addressed subsequently.
