Across an Ocean of Stars Robert E. Hampson, 2025-04-01 After the end of the world, a tropical paradise might just be the hardest place to survive. The virus robbed humans of their higher thought processes, turning them into uncontrollable savages. The Hawaiian Islands are separated from the rest of the world by thousands of miles of ocean, but that couldn't stop the virus. Civilization fell, and it fell HARD. Can paradise survive the end of the world? High atop a dormant volcano, a team of scientists preserve the last remnants of higher technology. Off the coast of Kauai, a flotilla of survivors must decide whether to return to their island, or make their way to another location, risking pirates and nature on the gamble of safer shores. On the central plateau of the Big Island, a group of ranchers want to rebuild civilization... but to do that, they'll need to reunite a people scattered across an ocean of stars. At the publisher's request, this title is sold without DRM (Digital Rights Management).

Stars Across The Ocean Kimberley Freeman, 2017-04-26 The powerful new novel from Kimberley Freeman. A rich and satisfying story of two women with indomitable spirits and the high costs they have to pay for being strong-minded, from the author of the bestselling LIGHTHOUSE BAY and EMBER ISLAND. A story about love, motherhood, and learning whom you belong to in the world. In 1874, wild and willful Agnes Resolute finally leaves the foundling home where she grew up on the bleak moors of northern England. On her departure, she discovers that she was abandoned with a small token of her mother: a unicorn button. Agnes had always believed her mother to be too poor to keep her, but Agnes has been working as a laundress at the foundling home and recognises the button as belonging to the imperious and beautiful Genevieve Breakby, daughter of a local noble family. Agnes had only seen her once, but has never forgotten her. She investigates and discovers Genevieve is now in London. Agnes follows, living hard in the poor end of London until she finds out Genevieve has moved to France. This sets Agnes off on her own adventure: to Paris, Agnes follows her mother's trail, and starts to see it is also a trail of destruction. Finally, in Sydney she tracks Genevieve down. But is Genevieve capable of being the mother Agnes hopes she will be? A powerful story about women with indomitable spirits, about love and motherhood, and about learning whom you

belong to in the world. Praise for Kimberley Freeman's writing: GOLD DUST 'A rich saga with characters you'll never forget. I couldn't put it down.' Kate Morton, author of THE SECRET KEEPER WILDFLOWER HILL 'Utterly engaging.' Symphony of the Stars Corey Manning, 2025-01-06 On a world bathed in the cerulean glow of a familiar sun, Elara, a composer haunted by a melody just beyond her grasp, poured her longing into music. Little did she know, her symphony wasn't just sound—it was a cosmic invitation, a beacon of sonic energy resonating across the void, reaching Theron, an Aethel empath dwelling in the iridescent nebulae of Andromeda. His people, crystalline beings of pure light, communicated through symphonies of thought, yet Elara's music, born of human joy and sorrow, stirred within him an echo of something profoundly different—a whisper of connection defying the immensity of space. Their first exchanges were hesitant, a new language of resonant frequencies and shared emotional landscapes. Each chord Elara played bloomed within Theron as a kaleidoscope of alien sensations, translated back to her as melodies filled with cautious hope and wonder. Their solitary symphonies merged into a shared sanctuary, a testament to art's power to transcend the boundaries of language, species, and the vast emptiness between worlds. A love as delicate as stardust, yet potent enough to bridge galaxies, blossomed between them. But a discordant note resonated through the cosmos. The Necron, a cosmic entity of pure anti-energy, devoured star systems, and Earth lay directly in its path. The Aethel, masters of energy manipulation, held the key to Earth's survival. Yet, an ancient fear rooted in a past betrayal held them back. The burden of bridging this interstellar divide fell upon Elara. Guided by Theron and her transformative symphony, she embarked on a perilous odyssey aboard the *Stardust Symphony*, accompanied by Marcus Hayes, a veteran astronaut wrestling with past failures, and Vivian Holloway, a xenolinguist whose theories were about to be shattered. While they journeyed towards Aethel, back on Earth, Cassandra Bennett, a scientist haunted by her inability to develop a planetary defense system, and Alexander Garcia, a pragmatic advisor, raced against time to prepare for the Necron's inevitable arrival. Aethel was a world of breathtaking beauty, where emotions flowed freely in a symphony of shared consciousness. Yet, Elara faced not only cultural barriers but also the deep-seated prejudices of the Luminary faction, who viewed humanity as a chaotic threat. Her symphony became her diplomatic tool, a plea for unity woven in sound. As the Necron's chilling silence edged closer, the fate of two civilizations hung suspended. Elara, drawing strength from her connection with Theron, composed a new movement, imbued with the combined energies of human emotion and Aethelian crystalline resonance – a defiant cry against the encroaching darkness. The climax arrived with a cosmic ballet of light and sound. Elara's symphony, amplified across the void, warped spacetime, creating a shield that deflected the Necron's anti-energy. The battle was not of brute force, but of harmonious resonance, a symphony of defiance. In the aftermath, the Necron retreated, a testament to unity's power. Elara and Theron's love stood as a beacon of hope, their

symphony echoing across the galaxies. Back on Earth, Cassandra and Alexander looked towards a future where interstellar cooperation was not a dream, but a tangible reality, woven into the fabric of existence by the universal language of music and love.

Twelve-year-old Libby Monroe is great at science, being optimistic, and talking to her famous, accomplished friends (okay, maybe that last one is only in her head). But she has lots of people who love her, and that makes her pretty lucky. When her big sister Nonny tells her she's pregnant, Libby is thrilled—but worried. Nonny and her husband are in a financial black hole, and Libby knows that babies aren't always born

Rock Stars on the Record Eric Spitznagel, 2021-02-23 An all-star lineup of rock-n-rollers relay the uproariously wild, sentimental, and unexpected pre-stardom stories behind their favorite records. *Rock Stars on the Record* is a collection of first-hand tales by artists of all ages, backgrounds, and musical influences, remembering the meaning behind the records that mattered most to them. From Laura Jane Grace to Ian MacKaye, Don McLean to Cherie Currie, Alice Bag to Mac DeMarco, Perry Farrell to Suzi Quatro and Verdine White, and many more, bestselling author Eric Spitznagel talks to rock stars across the sonic spectrum about the albums that changed them in ways only music can change someone. Everyone's most cherished childhood record—be it a battered piece of vinyl, torn cassette tape, or scratched CD—has a story, and those stories can be more revealing about their owners than you might expect. Read about how “Weird Al” Yankovic refined his accordion skills by playing along to Elton John's *Goodbye Yellow Brick Road*, or how Fishbone's Angelo Moore saved his life with a boombox and a *Bad Brains* album. Or about how Wendy Melvoin and Lisa Coleman of Prince's longtime band, *The Revolution*, fell in love while trading mixtapes. Each profile is more emotional, fascinating, and hilarious than the last. So place that needle in the groove, and prepare to hear something revelatory from your favorite rockers past and present. “Absolutely fascinating. It's hard to believe that no one has done this before, but now that I've read it, it seems totally obvious—except that most journalists wouldn't be able to get people to talk so openly and compellingly about something that, to an artist, may feel very private. I know these great musicians and their music better now. Thank you, Eric.” —Daniel J.

Levitin, bestselling author of *This Is Your Brain on Music*, professor of Neuroscience and Music at McGill University in Montreal “In asking a slew of rock stars about the record that changed their lives, Eric Spitznagel also ferrets out fascinating backstories and unexpected anecdotes. Who knew that Tommy Roe’s granddaughter calls him ‘the Justin Bieber of the ‘60s’? Or that Perry Farrell entertained his older siblings’ friends’ by dancing the Hully Gully at their parties? *Rock Stars on the Record* is so much fun, and more illuminating that you’d expect.” —Caroline Sullivan, author of *Bye Bye Baby: My Tragic Love Affair with the Bay City Rollers*

No Stars in the Sky Martha Bátiz, 2022-05-03 “Profoundly moving and beautifully written . . . each story is its own universe that transports the reader through the characters’ joy and pain.” — Amy Stuart The nineteen stories in *No Stars in the Sky* feature strong but damaged female characters in crisis. Tormented by personal conflicts and oppressive regimes that treat the female body like a trophy of war, the women in *No Stars in the Sky* face life-altering circumstances that either shatter or make them stronger, albeit at a very high price. True to her Latin American roots, Bátiz shines a light on the crises that concern her most: the plight of migrant children along the Mexico-U.S. border, the tragedy of the disappeared in Mexico and Argentina, and the generalized racial and domestic violence that has turned life into a constant struggle for survival. With an unflinching hand, Bátiz explores the breadth of the human condition to expose silent tragedies too often ignored.

The Stars of Earth - new and selected poems Emily Grosholz, 2017-10-16 Emily Grosholz weaves elements of philosophy, mathematics and the sciences into her experience of the social and natural world, to produce wise and cosmopolitan poetry of high lyricism. *The Stars of Earth* starts with new poems chronicling the months of a year lived and observed, followed by selections from Grosholz’s previous volumes in chronological order. This rare treasury spans four decades of Grosholz’s

acclaimed poetry. PRAISE FOR THE STARS OF EARTH: Emily Grosholz is a poet of radiant intelligence, patient lyricism, and meticulous craft. She has a gifted naturalist's regard for the living world and wherever she looks that world, for its part, offers her its poetry. With a philosopher's wit and a mathematician's eye for beauty, she can link geometry and physics to the apricot color of a robin's breast. She also writes with great empathy for her subjects. The Stars of Earth collects four decades of her elegant and excellent work. We are lucky to have it. — Mark Jarman, author of *The Heronry Compressed* on the page then wafting ever outward on wings of imagination, fine poetry and fine theorems are first cousins. Or, more rarely, in poems like Emily Grosholz's, twins: "Timid and fluid rainbows/ Over the nacreous surfaces/ Of shells, on peacock feathers/ And soap-bubbles, appear/ Whenever incident light/ Reflects off nether and upper/ Laminae of films, one wave train/ Tagging after another/ Like a younger sister." Read this book. — Marjorie Senechal, author of *Shaping Space* I admire Emily Grosholz because of the sounds her poems make. She is always experimenting, even when the results seem effortless. The cunning irregularities are what most compel: the reader is never allowed to relax. The general readers among us are admitted courteously to the civilizing company. The heart, not as a hackneyed valentine but as a living muscle, is always present as pulse and passion. The overwhelming sense these poems give is of affirmation. — Michael Schmidt, author of *New and Collected Poems* The Stars of Earth is that rarest of books. Emily Grosholz chronicles everything from love to loss, childhood to marriage to parenthood. She explores two continents and the minds of scientists, artists, friends, long-lost family. And as befits a poet-philosopher whose pursuits include the philosophy of mathematics, she achieves potent mixes of the daily and the deep: Nietzschean thought served up in a deli; a toddler's first steps along "the frail parabolas of love." — Melissa Balmain, author of *Walking in on People*

The Outback Stars Sandra McDonald, 2013-05-14 Lieutenant Jodenny Scott is a hero. She has the medals and the scars to prove it. She's cooling her heels on Kookaburra, recovering from injuries sustained during the fiery loss of her last ship, the Yangtze, and she's bored -- so bored, in fact, that she takes a berth on the next ship out. That's a mistake. The Aral Sea isn't anyone's idea of a get-well tour. Jodenny's handed a division full of misfits, incompetents, and criminals. She's a squared-away officer. As Aral Sea enters the Alcheringa -- the alien-constructed space warp that allows giant settler-ships to travel between worlds, away from all help or hope -- Jodenny comes face to face something powerful enough to dwarf even the unknown force that destroyed her last ship and left her with missing memories and bloody nightmares. Lieutenant Jodenny Scott is about to be introduced to love. Author Sandra McDonald brings her personal knowledge of the military, and of the subtle interplay between men and women on deployment, to a stirring tale that mixes ancient Australian folklore with the colonization of the stars.
