J. G. Ballard D. Harlan Wilson, 2017-11-10 Prophetic short stories and apocalyptic novels like *The Crystal World* made J. G. Ballard a foundational figure in the British New Wave. Rejecting the science fiction of rockets and aliens, he explored an inner space of humanity informed by psychiatry and biology and shaped by surrealism. Later in his career, Ballard's combustible plots and violent imagery spurred controversy--even legal action--while his autobiographical 1984 war novel *Empire of the Sun* brought him fame. D. Harlan Wilson offers the first career-spanning analysis of an author who helped steer SF in new, if startling, directions. Here was a writer committed to moral ambiguity, one who drowned the world and erected a London high-rise doomed to descend into savagery--and coolly picked apart the characters trapped within each story. Wilson also examines Ballard's methods, his influence on cyberpunk, and the ways his fiction operates within the sphere of our larger culture and within SF itself.

Books and Reading in the Lives of Notable Americans John McCrossan, 2000-03-30 Books and reading have contributed to the success of generations of Americans, many of whom have had distinguished careers and have left their mark on history. While the accomplishments of these notable Americans are well known, their adventures with books and reading are less familiar. Some have struggled to gain access to books, while others were fortunate enough to be exposed to literature at an early age. This reference surveys the role books and reading have played in the lives of notable Americans from colonial times to the present. Included are alphabetically arranged entries for 50 notable Americans from a range of historical periods, professions, and racial and ethnic backgrounds. Many are featured prominently in school and college texts, while others are a significant part of popular culture. Such diverse figures as Benjamin Franklin, Helen Keller, Willa Cather, Kareem Abdul-Jabbar, Mark Twain, Oprah Winfrey, and Ronald Reagan are covered. Each entry includes a discussion of

books and reading in the person's life, a chronology, and a brief bibliography.

Science Fiction and Fantasy Book Review Neil Barron,R. Reginald,Robert Reginald,2009-11 Science Fiction & Fantasy Book Review was founded in 1979 to provide comprehensive coverage of all the major and minor books being

released in the genre at that time. This was the golden era of SF publishing, with a thousand titles (old and new) hitting the stands and the bookshelves each and every year. From the older classics to the newest speculative fiction, this was the period when the best and the brightest shined forth their talents. SF&FBR included reviews by writers in the field, by amateur critics, and by *littérateurs* and University professors. Over a thousand books were covered during the single year of publication, many of them having been reviewed nowhere else, before or since. The January 1980 issue includes a comprehensive index of all the works featured during the preceding year. This reprint will be a welcome addition to the literature of science fiction and fantasy criticism. Neil Barron is a retired bibliographer and literary critic, editor of the acclaimed *Anatomy of Wonder* series. Robert Reginald was the publisher for twenty-five years of Borgo Press, and has authored over 110 books of his own.

The Year's Best Science Fiction: Seventeenth Annual Collection Gardner Dozois, 2000-08-12 In science fiction's early days, stories often looked past 1984 to the year 2000 as the far unknowable future. In a high-tech future, the line between reality and simulation has grown thin . . . and it's often hard to tell who's on what side. *Everywhere* by Geoff Ryman. Do the people who live in utopian conditions ever recognize them as such? *Hatching the Phoenix* by Frederik Pohl. One of science fiction's Grand Masters returns with a star-crossing tale of the Heechee---the enigmatic, vanished aliens whose discarded technology guides mankind through the future. *A Hero of the Empire* by Robert Silverberg. Showing that the past is as much a province of the imagination as the future, this novelette returns to an alternate history when the Roman Empire never fell to show us just how the course of history can be altered. The twenty-seven stories in this collection imaginatively take us to nearby planets and distant futures, into the past and into universes no larger than a grain of sand. Included here are the works of masters of the form and of bright new talents. Supplementing the stories are the editor's insightful summation of the year's events and a lengthy list of honorable mentions, making this book a valuable resource in addition to serving as the single best place in the universe to find stories that stir the imagination and the heart.
