*Men from Earth* Buzz Aldrin, Jr., 2004-01-01 On July 20, 1969, Apollo 11 astronauts Buzz Aldrin and Neil Armstrong landed their Lunar Module on the moon's Sea of Tranquility and became the first two humans to walk on the moon. This unprecedented heroic endeavor was witnessed by the largest worldwide television audience in history. Marking the 20th Anniversary of the Apollo 11 lunar landing, Buzz publishes *Men From Earth*, a detailed and astonishing account of America's race with the Soviets to the moon. The book ends with an epilogue venturing Outward, which looks toward future space travel through the year 2009. The book comes with original photo of Buzz Aldrin signing the books, Certificate of Authenticity, Lifetime Guarantee of Authenticity, and a two part Hologram.

Buzz Aldrin Elizabeth Raum, 2005-12-28 An introduction to Buzz Aldrin, the first astronaut to walk on the moon, discussing his childhood in New Jersey, his education and military service, his career at NASA, and his later life.

*No Dream Is Too High* Buzz Aldrin, Ken Abraham, 2018 Beloved American hero and astronaut Buzz Aldrin reflects on the wisdom, guiding principles, and irreverent anecdotes he's gathered--both in outer space and on earth--through his event-filled life, in this inspiring guide-to-life for the next generation. Everywhere he goes, crowds gather to meet Buzz Aldrin. He is a world-class hero, a larger-than-life figurehead, best known of a generation of astronauts whose achievements surged in just a few years from first man in space to first men on the moon. Now he pauses to reflect and share what he has learned, from the vantage point not only of outer space but also of time: still a non-stop traveler and impassioned advocate for space exploration, Aldrin will be 86 in 2016. *No Dream Is Too High* whittles down Buzz Aldrin's event-filled life into a short list of principles he values, each illustrated by fascinating anecdotes and memories, such as: - Second comes right after first. NASA protocol should have meant he was first on the moon, but rules changed just before the mission. How he learned to be proud of being the second man on the moon. - Look for opportunities, not obstacles. Buzz was rejected the first time he applied to be an astronaut. Failure is an opportunity to learn to do better. - Always maintain your spirit of adventure. For his 80th birthday, Buzz went diving in the Galapagos and hitched a ride on a whale shark. He stays fit, energetic, and fascinated with life. *No Dream Is Too High* is a beautiful memento, a thought-provoking set of ideas, and a new opportunity for Buzz Aldrin to connect with the masses of people who recognize his unique place in human history.

*Magnificent Desolation* Buzz Aldrin, 2009-08-17 \_\_\_\_\_ THE ESSENTIAL AUTOBIOGRAPHY OF THE

SECOND MAN ON THE MOON \_\_\_\_\_ 'Thrilling ... years on, the raw facts of the adventure remain beguiling and the bravery of the astronauts compelling' - SUNDAY TIMES 'Exciting and moving' - DAILY EXPRESS

\_\_\_\_\_ Buzz Aldrin, one of the three men who took part in the first moon landing in 1969, is a true American hero. Magnificent Desolation begins with the story of his voyage into space, which came within seconds of failure, and reveals a fascinating insider's view of the American space programme. But that thrilling adventure was only the beginning, as Aldrin battled with his own desolation in the form of depression and alcoholism. This epic journey encompasses the brutally honest tale of Aldrin's self-destruction, and the redemption that came through finding love when hope seemed lost.

\_\_\_\_\_ 'Buzz Aldrin might not have been the first man to walk on the Moon, but of all the astronauts to have been there, none of them has articulated their predicament with quite such wisdom and sensitivity' - MAIL ON SUNDAY

Return to Earth Buzz Aldrin, Wayne Warga, 2015-12-15 Apollo 11 astronaut Buzz Aldrin's courageous, candid memoir of his return to Earth after the historic moon landing and his personal struggle with fame and depression. "We landed with all the grace of a freight elevator," Buzz Aldrin relates in the opening passages of Return to Earth, remembering Command Module Columbia's abrupt descent into the gravity of the blue planet. With that splash, Aldrin takes readers on a journey through the human side of the space program, as one of the first two men to land on the moon learns to cope with the pressures of his new public persona. In honest and compelling prose, Aldrin reveals a side of instant fame for which West Point and NASA could never have prepared him. One day a fighter pilot and engineer, the next a cultural hero burdened with the adoration of thousands, Aldrin gives a poignant account of the affair that threatened his marriage, as well as his descent into alcoholism and depression that resulted from trying to be too many things to too many people. He didn't realize that when he landed on his home planet his odyssey had just begun. As Aldrin puts it, "I traveled to the moon, but the most significant voyage of my life began when I returned from where no man had been before." Return to Earth is a powerful and moving memoir that exposes the stresses suffered by those in the Apollo program and the price Buzz Aldrin paid when he became an American icon.

Reaching for the Moon Buzz Aldrin, 2005-05-24 I walked on the moon. This is my journey. But it didn't begin when I stepped on board Apollo 11 on July 1, 1969. It began the day I was born. Becoming an astronaut took more than education, discipline, and physical strength. It took years of determination and believing that any goal is possible—from riding a bike alone across the George Washington Bridge at age ten to making a footprint on the Moon. I always knew the Moon was within my reach—and that I was ready to be on the team that would achieve the first landing. But it was still hard to believe when I took my first step onto the Moon's surface. We all have our own dreams. This is the story of how mine came true.

**Look to the Stars** Buzz Aldrin, 2009-05-14 Buzz Aldrin takes readers on a journey through the history of space exploration. As one of a handful of astronauts to have walked on the moon, Buzz Aldrin has a unique perspective of space.

And he serves as an amazing guide as he introduces us to the pioneers of space. From Copernicus to the Wright brothers, from the Apollo program to dreams of future travel, he reminds us that mankind has always looked to the stars. Buzz's informative, kid-friendly text is paired with beautifully detailed illustrations by renowned illustrator Wendell Minor, and offers the perfect introduction to everything space related, including the development of the first rockets, America's space race with Russia, details of all the Apollo missions, and the space station. Aldrin and Minor collaborated on the bestselling *Reaching for the Moon* and now they reach beyond that book to give young readers a concise look at the whole history of space exploration. Each spread provides a wonderful jumping-off point for young readers, and will no doubt inspire them to look to the stars themselves.

*Mission to Mars* Buzz Aldrin, Leonard David, 2013 Legendary space statesman Aldrin speaks out as a vital advocate for the continuing quest to push the boundaries of the universe as we know it.

*Buzz Aldrin* Kitson Jazynka, 2019 Blast off and experience humankind's first steps on the moon in this new biography about Buzz Aldrin. You'll learn about astronaut Aldrin's life -- his childhood, his work on NASA's Apollo 11 mission, and his dream to get humans to Mars. -- Publisher's website.

**Reaching For The Moon** Buzz Aldrin, 2006-01-31 Astronaut Buzz Aldrin narrates this fascinating autobiography that provides information about his childhood, his education, and his first steps on the moon. Aldrin's pacing and inflection draws listeners in...Occasional, subtle sound effects and background instrumentation add to the richness of the story. This read-along set will work well in a classroom setting for units on space or biographies. -School Library Journal

**Encounter with Tiber** Buzz Aldrin, John Barnes, 2013-05-28 An Apollo 11 astronaut and the Nebula Award-nominated author of *Directive 51* present a novel that "conveys the wonder and promise of space" (Publishers Weekly). Born the year of the Moon landing, Chris Terence spends his life fighting to return humanity to that pinnacle. An engineering student with dreams of spaceflight, he finds upon graduation that the United States no longer has need for astronauts. Years of bureaucratic meddling have reduced the space program to a shell of itself, and it will take the greatest scientific find in history to send humanity skyward once more. After years battling budget hawks, Chris finally gets his chance to walk on the Moon. While there, he finds evidence of an ancient alien civilization, the Tiberians, who visited Earth's satellite eight thousand years before. Understanding what happened to those long-forgotten travelers will define the lives of Chris and his son, as they fight against all odds to unlock the secrets of the universe. "The collaboration of the first man to pilot a moon lander (Aldrin) with a major voice in contemporary science fiction (Barnes) has produced a fascinating chronicle of man's first encounter with alien intelligence" (Booklist).

**Neil Armstrong and Buzz Aldrin** Charles River Editors, 2019-05-30 \*Includes pictures \*Includes a bibliography for further reading I guess we all like to be recognized not for one piece of fireworks, but for the ledger of our daily work. - Neil

Armstrong Some things just can't be described. And stepping onto the moon was one of them. - Buzz Aldrin At 9:32 a.m. on July 16, 1969, time stood still throughout the world, as thousands converged on the Kennedy Space Center and millions tuned in on live television. At that instant, the first rumbles began to shake the ground, as a small spacecraft attached to the giant Saturn V rocket several hundred feet tall started lifting off. Quickly being propelled several thousand miles per hour, it takes just a few minutes to reach a speed of 15,000 miles per hour, and just a few more minutes to enter orbit at 18,000 miles per hour. Apollo 11 was on its way to a historic first landing on the Moon. Apollo 11's trip to the Moon may have started on that day in 1969, but the journey had begun over a decade earlier as part of the Space Race between the United States and the Soviet Union. While landing on the Moon was a noble goal proposed as early as 1961 by President Kennedy, NASA and the nation as a whole moved with urgency simply to best the Soviet Union, which had spent the 1950s beating America to important space-related firsts, including launching the first satellite and cosmonaut in orbit. In fact, President Eisenhower's administration began the design for the Apollo program in 1960 in hopes of getting a head start to the Moon, despite the fact the plans originated a year before the first Russian cosmonaut, Yuri Gagarin, orbited the Earth and two years before John Glenn did. Over the decade, NASA would spend tens of billions on the Apollo missions, the most expensive peacetime program in American history to that point, and even though Apollo 11 was only one of almost 20 Apollo missions, it was certainly the crown jewel. only one of nearly 20 Apollo missions conducted by NASA. And to make Apollo 11 a success, it would take nearly a decade of planning by government officials, hard work by NASA scientists, intense training by the astronauts, and several missions preceding Apollo 11. It also cost over \$20 billion, making the Apollo program the most expensive peacetime program in American history at the time. When the Apollo program reached its pinnacle, the man at the center of it was Neil Armstrong, a farm boy and pilot who rose from a hardworking rural home to become the first to set foot on the Moon and utter one of the 20th century's most famous phrases: That's one small step for man, one giant leap for mankind. Armstrong did so through education, first in high school and later at Purdue University, a lot of hard work as a pilot during and after the Korean War, and some luck, coming of age at a moment when the Space Race was in full effect. After reaching the peak of his fame and career at the young age of 40, Armstrong spent the second half of his life as he had the first, working hard and serving his country. In doing so, he serves as one of the best examples of national pride and service that America has ever known. Alongside him was Buzz Aldrin, which was somewhat fitting given his family's past. His father was a military test pilot, and Aldrin would follow a similar path on his way to becoming a member of the Gemini program and ultimately the Apollo 11 mission. Despite reaching the peak of his fame and career before the age of 40, Aldrin has continued to work in the field and has been one of the most effective advocates of further space travel, particularly to Mars. Neil Armstrong and Buzz Aldrin: The Lives and Careers of the First Men on the Moon profiles both astronauts and the most memorable space mission in history. Along with pictures of important people, places, and events, you will learn about Neil

Armstrong and Buzz Aldrin like never before.

The Return Buzz Aldrin, John Barnes, 2001-07-15 The Return is a tale about the kind of space adventure that could happen today--and that will happen tomorrow. As told by Buzz Aldrin, who's been there...and who's already helped change the world. Former astronaut Scott Blackstone's dream of opening outer space to visits from everyday people is under attack. His pilot program has been marred by a fatal accident, he's out of a job, and he's being sued for a billions dollars. And it's beginning to seem that the accident wasn't at all accidental. Then the endless conflict between India and Pakistan heats up...and Pakistan explodes a nuclear device in the upper atmosphere, frying electronics on earth and in space, and putting the crew of the international Space Station at risk. With the Shuttle fleet grounded, only a secret skunkworks project known to Scott and his old friends can save the space station's stranded crew. As real as it gets.--New York Post At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
