Long Distance Grandma Janet Teitsort, 2010-06-15 According to an AARP survey, 45 percent of grandparents report that the primary barrier to seeing their grandchildren is the physical distance that separates them. Yet, the desire to communicate is strong. Janet Teitsort, a long-distance grandma herself, comes to the rescue with a year's worth of ideas to remain close even when the miles divide. Among her numerous ideas are art projects, recipes, and simple gifts that keep hearts knitted together. Whether children are toddlers or college students, Teitsort offers a cornucopia of connection possibilities including a strong recommendation for grandparents to embrace technology with ideas involving audiotape, videotape, email, and the Internet. As the grandparent population swells with Baby Boomers, this book is truly timely.

Measuring the Distance between Locke and Toland Jonathan S. Marko, 2017-02-08 Ever since Bishop Stillingfleet accused John Locke of having unwittingly paved the way with his Essay for the alleged heresy promulgated in John Toland's Christianity Not Mysterious, the latter two thinkers and works have been consistently joined in histories of philosophy covering the rise of natural religion in England. While scholars have generally thought that Locke got the better of the good bishop in their subsequent written exchanges initiated by the charge, they appear merely to assume that Stillingfleet correctly read Toland and that Locke accepts that reading. Perhaps the most obvious piece of evidence favoring that stance is that while Locke clearly admits above reason doctrines, Toland dismisses them: Christianity is not mysterious! It is curious, however, that Toland scholars readily point out many concepts that Toland used as being the same as or different from Lockean notions about which many Locke scholars are admittedly perplexed. Through patient exposition of relevant texts and letters, deconstruction of scholarly works, and careful reasoning, this book shows that Toland's deviations from Locke regarding reason and faith are far more minor than anyone has concluded. Stillingfleet was correct to connect them, but was incorrect in the way that he did it.

The Architecture of the Illusive Distance Amir H. Ameri, 2016-03-03 Focusing on three secular institutional building types: libraries, museums, and cinemas, this book explores the intricate interplay between culture and architecture. It explores the cultural imperatives which have seen to the formation of these institutions, the development of their architecture, and their transformation over time. The relationship between culture and architecture is often perceived as a monologic relationship. Architecture is seen to embody, represent and/or reflect the values, the beliefs, and the aesthetic

ideals of a culture. Ameri argues that this is at best a partial and restrictive view, and that if architecture is a cultural statement, it is a performative one. It does not merely represent culture, but constructs, reifies, and imposes culture as the unalterable shape of reality. Whereas the concept and the study of cultural performatives have had an important critical impact on the humanities, architecture as a cultural performative has not received the necessary scholarly attention and, in part, this book aims to fill this gap. Whereas building-type studies have been largely restricted to elucidating how best to design building-types based on historic and contemporary precedents, studies in the humanities that analytically and critically engage the secular institutions and their history as cultural performatives, typically cast a blind or perfunctory glance at the performative complicity of their architecture. This book aims to address the omissions in both these approaches. The library, the museum, and the movie-theater have been selected for close critical study because, this book argues, each has been instituted to house, 'domesticate,' and restrain a specific form of representation. The aim has been to protect and promulgate the metaphysics of presence as Jacques Derrida expounds the concept. This book proposes that it is against the dangers of unconstrained cohabitation of reality and representation that the library, the m

Why Do We Quote? Ruth Finnegan, 2011-03-01 Quoting is all around us. But do we really know what it means? How do people actually quote today, and how did our present systems come about? This book brings together a down-to-earth account of contemporary quoting with an examination of the comparative and historical background that lies behind it and the characteristic way that quoting links past and present, the far and the near. Drawing from anthropology, cultural history, folklore, cultural studies, sociolinguistics, literary studies and the ethnography of speaking, Ruth Finnegan's fascinating study sets our present conventions into crosscultural and historical perspective. She traces the curious history of quotation marks, examines the long tradition of quotation collections with their remarkable recycling across the centuries, and explores the uses of quotation in literary, visual and oral traditions. The book tracks the changing definitions and control of quoting over the millennia and in doing so throws new light on ideas such as imitation, allusion, authorship, originality and plagiarism.

The author provides conclusive evidence that distance education, while involving a degree of risk to the stability of families and relationships, etc., nevertheless offers women a chance which, on balance, is worth taking. The author says that it is up to distance education policy makers to provide a framework for women students which will limit the risks and maximise the opportunities. Drawing on fascinating case study material, this book presents vital information for these policy makers.

In Appropriate Distance Kelly Klingensmith, 2016-06-15 What is the evolving relationship between words and images in

the photographic essay? How do the purpose and form of the photographic essay change over time? And how are relationships between the contributors, subject, and readers communicated explicitly and implicitly in both content and form? Klingensmith explores these questions in *In Appropriate Distance* as she traces the development of the photographic essay from the 1890s to the 1990s and beyond. By examining classic examples such as *How the Other Half Lives*, *American Exodus*, and *Let Us Now Praise Famous Men*, as well as more contemporary projects including work by John Berger, Jean Mohr, Wendy Ewald, and Zana Briski, Klingensmith examines the codependence of words and images and the long-standing collaboration required of creator and subject in this exploration of the ethics of representation.
