The Groundbreakers Charles E. Dagit, 2017-07-05 If there is anything to be learned from the history of American architecture it is that it reflects the American adventure in creativity and inventiveness, and the desire to be unique and expressive. In *The Groundbreakers*, Charles E. Dagit, Jr. examines pioneering American architects and the historical events and trends that gave rise to their achievements. These architects, the caliber of Frank Lloyd Wright and Frank Gehry, created their own distinct, personal styles, and represented the rich heritages of their specific geographical regions. The American pioneer spirit of individualism is alive and well in the architectural world, and like other American innovations, architecture as practiced in the United States is constantly renewing itself and finding new ways to capture the imagination. This book will be of interest to historians, architects, and students in American studies. Illustrations add dimension to the author's observations.

Frank Lloyd Wright's Fallingwater, 1999-05-05 On a remote and secluded Appalachian site in the foothills of Western Pennsylvania lies what is undoubtedly the most famous modern home in the United States and, perhaps, the world: Frank Lloyd Wright's Fallingwater. Commissioned in 1934 to design a weekend retreat for Pittsburgh department store magnate Edgar Kaufmann, Wright shocked his client and the architectural establishment with a daring sculptural composition dramatically cantilevered over the white water of Bear Run. Fallingwater at once expresses Wright's ideal of an organic architecture attuned to the rhythms of the natural world while fully embracing the modernist idiom - albeit on his own terms. For Wright, the commission offered a chance to thrust himself back into the forefront of architectural practice. Considered passé by some proponents of the International Style, with Fallingwater Wright proved to all that he remained at the vanguard

of the profession. Ezra Stoller's photographs of Fallingwater have become icons in their own right, illustrating the building's integral connection to the landscape and its striking modern form.

Fallingwater Paul Bonfilio, 2000 Built in 1935 in Bear Run, Pennsylvania, Frank Lloyd Wright's Fallingwater is one of the great masterpieces of modern architecture. Thousands visit the house every year, and thousands more ponder its breathtaking lines and balance at the Museum of Modern Art in New York, where its scale model is part of the permanent collection. Perched as it is on rocks above a waterfall, the house, built for the most part of reinforced concrete, is as much a feat of engineering as it is a marvel of design. To overcome the various challenges of recreating not only Wright's design, but also the trees, rocks, and water, Paul Bonfilio was forced to expand the horizons of traditional model building and called on to use a dazzling variety of new materials, including a special blend of plaster of Paris, photographs covered in miniature plastic tiles, and even a rock from the original landscape. In *Fallingwater: The Model*, Bonfilio writes of his relation to the house and particularly its model and his two years of building it. With the precision of a model maker he describes the various challenges he came across, and explains how he overcame them. Every step of the process is illustrated with pictures of the evolving model, juxtaposed as they are with details of the original house. The result is a magnificent journey through the famous structure, from which the reader emerges with a new appreciation for not only the flow of the house, but an intimate knowledge of its construction and engineering idiosyncrasies.

Ceilings and Dreams Paul Emmons, Federica Goffi, Jodi La Coe, 2019-07-08 Where is the space for dreaming in the twenty-first century? Lofty thoughts, like dreams, are born and live overhead, just as they have been represented in Renaissance paintings and modern cartoons. Ceilings are often repositories of stories, events and otherwise invisible oneiric narratives. Yet environments that inspire innovative thinking are dwindling as our world confronts enormous challenges, and almost all of our thinking, debating and decision-making takes place under endless ceiling grids. Quantitative research establishes that spaces with taller ceilings elicit broader, more creative thoughts. Today, ceilings are usually squat conduits of technology: they have become the blind spot of modern architecture. The twenty essays in this book look across cultures, places and ceilings over time to discover their potential to uplift the human spirit. Not just one building element among many, the ceiling is a key to unlock the architectural imagination. *Ceilings and Dreams* aims to correct this blind spot and encourages architects and designers, researchers and students, to look up through writings organized into three expansive categories: reveries, suspensions and inversions. The contributors contemplate the architecture of levity and the potential of the ceiling, once again, as a place for dreaming.

Fallingwater Rising Franklin Toker, 2003 In this work of popular history at its best, an internationally recognized specialist in the history of architecture pens the biography of the most famous American house of the 20th century: Frank

Lloyd Wright's Fallingwater. 150 photos.

The Interwar World Andrew Denning, Heidi J.S. Tworek, 2023-08-29 The Interwar World collects an international group of over 50 contributors to discuss, analyze, and interpret this crucial period in twentieth-century history. A comprehensive understanding of the interwar era has been limited by Euro-American approaches and strict adherence to the temporal limits of the world wars. The volume's contributors challenge the era's accepted temporal and geographic framings by privileging global processes and interactions. Each contribution takes a global, thematic approach, integrating world regions into a shared narrative. Three central questions frame the chapters. First, when was the interwar? Viewed globally, the years 1918 and 1939 are arbitrary limits, and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s. Second, where was the interwar? Contributors use global history methodologies and training in varied world regions to decenter Euro-American frameworks, engaging directly with the usefulness of the interwar as both an era and an analytical category. Third, how global was the interwar? Authors trace accelerating connections in areas such as public health and mass culture counterbalanced by processes of economic protectionism, exclusive nationalism, and limits to migration. By approaching the era thematically, the volume disaggregates and interrogates the meaning of the 'global' in this era. As a comprehensive guide, this volume offers overviews of key themes of the interwar period for undergraduates, while offering up-to-date historiographical insights for postgraduates and scholars interested in this pivotal period in global history.

Architecture : nineteenth and twentieth centuries Henry-Russell Hitchcock,2023-07-11 In *Architecture: Nineteenth and Twentieth Centuries*, Henry-Russell Hitchcock presents a comprehensive examination of the evolution of architectural styles across two pivotal centuries. This meticulously researched volume synthesizes a rich tapestry of movements, from Romanticism to Modernism, analyzing how historical context, technological advancements, and cultural shifts influenced architectural practices. Hitchcock's prose is both scholarly and accessible, employing a critical lens that adeptly navigates the interplay between form and function, while also highlighting the significance of prominent figures and landmark projects that have shaped the architectural landscape. Henry-Russell Hitchcock, an esteemed architectural historian, was deeply influenced by the changing urban environments of his time and the burgeoning modernist movement. His academic pursuits were dedicated to exploring the connections between architecture, art, and society, an interest that fueled his desire to articulate the complexities of architectural development. With a degree in Fine Arts and a profound appreciation for design, Hitchcock's insights reflect not only a scholarly expertise but also a passionate engagement with the evolution of built environments. *Architecture: Nineteenth and Twentieth Centuries* is an essential read for students, historians, and anyone with a keen interest in the architectural narratives that define modern society. Hitchcock's authoritative analysis offers a lens through which to appreciate the transformative power of architecture and encourages readers to critically engage with the spaces they inhabit.
