**The Past Is Red** Catherynne M. Valente, 2021-07-20 “The Candide of our #@\$\\*%?! age.” — Ken Liu, award-winning author Catherynne M. Valente, the bestselling and award-winning creator of Space Opera and *The Girl Who Circumnavigated Fairyland* returns with *The Past Is Red*, the enchanting, dark, funny, angry story of a girl who made two terrible mistakes: she told the truth and she dared to love the world. A Hugo Award finalist! An inaugural Ursula K. Le Guin Prize for Fiction finalist! A Locus Award finalist! The future is blue. Endless blue...except for a few small places that float across the hot, drowned world left behind by long-gone fossil fuel-guzzlers. One of those patches is a magical place called Garbagetown. Tetley Abednego is the most beloved girl in Garbagetown, but she’s the only one who knows it. She’s the only one who knows a lot of things: that Garbagetown is the most wonderful place in the world, that it’s full of hope, that you can love someone and 66% hate them all at the same time. But Earth is a terrible mess, hope is a fragile thing, and a lot of people are very angry with her. Then Tetley discovers a new friend, a terrible secret, and more to her world than she ever expected. **The Halberd at Red Cliff** Xiaofei Tian, 2020-10-26 The turn of the third century CE—known as the Jian’an era or Three Kingdoms period—holds double significance for the Chinese cultural tradition. Its writings laid the foundation of classical poetry and literary criticism. Its historical personages and events have also inspired works of poetry, fiction, drama, film, and art throughout Chinese history, including Internet fantasy literature today. There is a vast body of secondary literature on these two subjects individually, but very little on their interface. The image of the Jian’an era, with its feasting, drinking, heroism, and literary panache, as well as intense male friendship, was to return time and again in the romanticized narrative of the Three Kingdoms. How did Jian’an bifurcate into two distinct nostalgias, one of which was the first paradigmatic embodiment of wen (literary graces, cultural patterning), and the other of wu (heroic martial virtue)? How did these largely segregated nostalgias negotiate with one another? And how is the predominantly male world of the Three Kingdoms appropriated by young women in contemporary China? *The Halberd at Red Cliff* investigates how these associations were closely related in their complex origins and then came to be divergent in their later metamorphoses.

Cyber Security. Simply. Make it Happen. Ferri Abolhassan, 2017-04-27 This book provides a practical and strategic perspective on IT and cyber security for corporations and other businesses. Leading experts from industry, politics and research discuss the status quo and future prospects of corporate cyber security. They answer questions such as: How much will IT security cost? Who will provide IT security? Can security even be fun? The book claims that digitization will increasingly pervade all areas of the economy, as well as our daily professional and personal lives. It will produce speed, agility and cost efficiency, but also increasing vulnerability in the context of public, corporate and private life. Consequently, cyber security is destined to become the great facilitator of digitization, providing maximum protection for data, networks, data centres and terminal devices.

**Philosophy of Time** Sean Enda Power, 2021-05-26 As a growing area of research, the philosophy of time is increasingly relevant to different areas of philosophy and even other disciplines. This book describes and evaluates the most important debates in philosophy of time, under several subject areas: metaphysics, epistemology, physics, philosophy of language, philosophy of mind, cognitive science, rationality, and art. Questions this book investigates include the following. Can we know what time really is? Is time possible, especially given modern physics? Must there be time because we cannot think without it? What do we experience of time? How might philosophy of time be relevant to understanding the mind-body relationship or evidence in cognitive science? Can the philosophy of time help us understand biases toward the future and the fear of death? How is time relevant to art—and is art relevant to philosophical debates about time? Finally, what exactly could time travel be? And could time travel satisfy emotions such as nostalgia and regret? Through asking such questions, and showing how they might be best answered, the book demonstrates the importance philosophy of time has in contemporary thought. Each of the book's ten chapters begins with a helpful introduction and ends with study questions and an annotated list of further reading. This and a comprehensive bibliography at the end of the book prepare the reader to go further in their study of the philosophy of time.

**Signals** Cherilyn Orr,2022-07-19 Would you like to improve the emotional intelligence of your kids? Signals offers a simple, relational approach to help you become aware of your emotions, their impact on others, and how to implement this technique in your home, school, or ministry. While we can't see the brain, it sends signals to us and those around us. Just as the colors of a traffic light send drivers a signal to go, slow down, or stop, our brains signal to our emotions and affect our behavior toward others. In Signals, Cherilyn Orr introduces a common language and imagery to help everyone manage their emotions. Rooted in neuroscience and the Bible, this approach has been used around the world because it spans across all cultural contexts. Learn how to read these signals, become more aware of your emotions as well as your child's, and understand how to respond based on the signal sent. For parents and educators, this approach is an easy-to-understand way to evaluate what's going on with your child, mentally and emotionally, at any given moment to determine an appropriate response. Signals is also useful for kids with special needs, including those with autism. Applying the technique can transform the relationships you have with your kids and set them on a lifelong trajectory of ever-increasing emotional intelligence.
