Asian American Society Mary Yu Danico,2014-08-19 Asian Americans are a growing, minority population in the United States. After a 46 percent population growth between 2000 and 2010 according to the 2010 Census, there are 17.3 million Asian Americans today. Yet Asian Americans as a category are a diverse set of peoples from over 30 distinctive Asian-origin subgroups that defy simplistic descriptions or generalizations. They face a wide range of issues and problems within the larger American social universe despite the persistence of common stereotypes that label them as a “model minority” for the generalized attributes offered uncritically in many media depictions. Asian American Society: An Encyclopedia provides a thorough introduction to the wide-ranging and fast-developing field of Asian American studies. Published with the Association for Asian American Studies (AAAS), two volumes of the four-volume encyclopedia feature more than 300 A-to-Z articles authored by AAAS members and experts in the field who examine the social, cultural, psychological, economic, and political dimensions of the Asian American experience. The next two volumes of this work contain approximately 200 annotated primary documents, organized chronologically, that detail the impact American society has had on reshaping Asian American identities and social structures over time. Features: More than 300 articles authored by experts in the field, organized in A-to-Z format, help students understand Asian American influences on American life, as well as the impact of American society on reshaping Asian American identities and social structures over time. A core collection of primary documents and key demographic and social science data provide historical context and key information. A Reader's Guide groups related entries by broad topic areas and themes; a Glossary defines key terms; and a Resource Guide provides lists of books, academic journals, websites and cross references. The multimedia digital edition is enhanced with 75 video clips and features strong search-and-browse capabilities through the electronic Reader's Guide, detailed index, and cross references. Available in both print and online formats, this collection of essays is a must-have resource for general and research libraries, Asian American/ethnic studies libraries, and social science libraries.

Transforming Education for Peace Jing Lin,Edward J. Brantmeier,Christa Bruhn,2008-06-01 Currently, peace

education remains marginalized in our education system, however, a united front can be formed and powerful paradigms can empower educators to play a critical role in peace building through scholarship, practice and activism. Indeed, educators around the world are developing effective strategies to transform education as a powerful force for global peace. The diverse array of contributors in the book demonstrate that educators as peace makers can be and have been instrumental in transforming social forces, the self and others for the construction of global peace. The book aims to broaden the educational discourse in order to make room for new visions to educate future generations for peace. Local and global efforts to build a long-lasting peace are presented through the lens of education. The timeliness of peace education surely renders this book relevant to educators and the general public alike as individuals, communities, and organizations struggle to find pathways to peace in a global world. In other words, this book will interest scholars and the general public concerned about the building of global peace. The book can be source book for educators at elementary, secondary, and postsecondary institutions to explore multiple ways to conduct effective peace education at all levels of education. The book may also be used as a textbook by instructors of multicultural education, of comparative & international education, and of undergraduate and graduate peace education courses.
