**Stories from Under the Sky** John Madson,2012-08-15 In Stories from under the Sky, John Madson salutes the outdoor life. These thirty-six essays display his healthy respect for the forces of nature, without diminishing his wry awareness of the foibles of beast, bird, fish, and human. In sections on mammals, the river, and birds, Madson acquaints readers with some real characters—not all of them four-footed! Some are old favorites: the raccoon, the otter, the fawn, and the badger. Others are less familiar—the demonic shrew, the indomitable dogfish, and the exotic blue heron. Even the “unloved” come in for their share of attention: toads, waterbugs, wasps, and turkey buzzards. Madson has a yarn to spin about each one. Where else would you find an essay on “Snake Liars”? Whatever the topic, Madson’s love of nature shines through, be it coon hunting or an explanation of the incredible bird machine. His obvious affection is tempered with the recognition that not everything “natural” is a pretty sight. All of which leaves readers with a better understanding of life under the sky.

**Dictionary of Gems and Gemology** Mohsen Manutchehr-Danai,2013-03-09 Since World War II the amount of information generated in the science of Gemology has increased tremendously. Therefore this book Dictionary of Gems and Gemology was written with the aim of providing a relatively complete dictionary to assist all students, hobbyists, scientists and interested parties in the fields of Gems and Gemology. The forerunner to this book was called Dictionary of Gems and Gemology (English-Persian, Persian-English, published in Tehran Iran in 1997). It was written with the aid of more than thirty reference books relating to gemology. In response to the effort required to clarify the terms within, I decided to compile a book that brings all the relevant terms into one book. This new book eliminates the use of different reference books and compiles nearly all the relevant terms into a one-stop useful text. It took twenty five years to collect the terms and the information so as to present a complete and functional lexicon. The text is supported by nearly 170 illustrations and 21 tables to provide detailed and succinct information. I hope and trust that this book will reach the high standard of other gemological dictionaries. If you have criticisms or suggestions, please feel free to contact me. Professor Dr. Mohsen Manutchehr-Danai Los Angeles, Tehran, Regensburg Acknowledgments The author acknowledges all those who were of valuable assistance during the writing and publishing of this book.
