*Understanding the Teacher Union Contract* Myron Lieberman, Unionization of teachers has led to fundamental changes in the management of education and in relations between teachers and school districts. *Understanding the Teacher Union Contract* explores the implications of this collective-bargaining revolution in education. Through detailed examination Lieberman shows how the kinds of provisions typically found in teacher union contracts affect the educational workplace and education reform, and how they might be revised to the benefit of students, parents, and the public. Lieberman begins with the respective roles of school district management and teacher unions. Unlike managers in the private sector, school district officials are part of a government agency that is legally responsible for operating public schools in the public interest. They must balance the interests of employees with the needs of students, taxpayers, and parents, as well as with district educational goals. Teacher unions' primary objectives are to enhance employee welfare and to promote the union as an effective organization. Unions must balance the differing needs of various groups within their membership -- for example, by resolving tensions between older teachers who want improved retirement benefits and younger teachers who might prefer more rapid salary increases. Lieberman shows how competing union and management goals play out in collective bargaining and are embodied in teacher union contracts. He argues that by developing an understanding of teacher unions, their role, and their needs, district officials and school board members can bargain more effectively and develop a productive ongoing relationship with unions. This highly readable book will be of interest not only to school administrators and board members but also to teacher representatives, parents, taxpayers, and members of the media who report on education.

**Induction Malfunction** Leonid Chernyak,2006 In Induction Malfunction: Leaving Teachers Behind, Dr. Leonid Chernyak, utilizing his investigative reporting skills, showcases what happens to novice teachers, specifically at a Florida charter middle school, when a mentored induction program is purposefully and neglectfully disbanded. The study - which took almost an entire school year to chronicle, research, and exhaustively reference is seen through the points of view of three novice teachers who, despite efforts to (a) collaborate, (b) grow professionally together, and (c) take lessons learned from the first year into the next, witness first hand (a) how easily promises made can be broken, (b) how easily the building of collaborative bridges can be burned, and (c) how hard incorporating highly regarded education theories into practice can be. Dr. Leonid Chernyak is a former member of the Society of Professional Journalists and the National Honor Society. He has appeared twice in Who's Who Among American High School Students and was honored by the Florida Department of Education for his writing. At the University of Florida, he earned a Bachelor of Science degree in print journalism and a Master of Arts degree in Mass Communication. At Argosy University, he earned an Education Specialist degree and a Doctor of Education degree, both in curriculum and instruction. Dr. Leonid Chernyak has, so far, worked as a freelance reporter, a substitute teacher, a language arts instructor and tutor, a translator, a collector, and a customer relations representative. His philosophy of life revolves around breaking routine, a team spirit, thinking outside the box, questioning everything, reading between the lines, standing up against the few who rule the many, not limiting yourself to others' criticisms, and taking a world view of everything. His first book, *Breaking Routine: A cosmic outlook on our comic world*, was published in 2005.

*Chinese Intellectuals on the World Frontier* J. A. English-Lueck,1997-05-30 This is the study of the status of intellectuals in the People's Republic of China during and after the events of Tiananmen Square. Currently intellectuals find themselves on the cusp of change as the socialist state monopoly on academia, scientific and technical research is yielding to market

pressures. Universities must be, at least partially, self-sustaining. Entrepreneurial niches, outside of state control, are opening for intellectuals as industry privatizes. The entire society has shifted its focus from ideology to material wealth. These dramatic changes have forced choices on China's thought workers. English-Lueck, in conducting over a hundred interviews, highlights the choices and constraints of nonestablishment Chinese intellectuals at the end of the 20th century as they establish a new identity for themselves, and perhaps even for China.

*School Leader Internship* Gary E. Martin, Arnold B. Danzig, William F. Wright, Richard A. Flanary, 2013-10-02 School leadership internships are the bridge between classroom teachers and first-time leadership positions. Research shows that quality internships are equally as important as the graduate programs themselves in establishing leadership practices that improve teaching, learning, and school conditions. This book was written as a stand-alone graduate textbook and serves as a guide and support for creating and managing quality school leader internship programs. It provides step-by-step guidance for interns, their supervisors, and their faculty on how to initiate an internship and evaluate interns' work. In this updated third edition, the authors have aligned the internship to the revised ISLLC standards, making this book critical for the over 500 leadership preparation programs nationwide and the thousands of school districts that support leadership candidates.
