

The Art Of The Cut

Harold Farberman

Art of the Cut Steve Hullfish, 2017-02-24 *Art of the Cut* provides an unprecedented look at the art and technique of contemporary film and television editing. It is a fascinating virtual roundtable discussion with more than 50 of the top editors from around the globe. Included in the discussion are the winners of more than a dozen Oscars for Best Editing and the nominees of more than forty, plus numerous Emmy winners and nominees. Together they have over a thousand years of editing experience and have edited more than a thousand movies and TV shows. Hullfish carefully curated over a hundred hours of interviews, organizing them into topics critical to editors everywhere, generating an extended conversation among colleagues. The discussions provide a broad spectrum of opinions that illustrate both similarities and differences in techniques and artistic approaches. Topics include rhythm, pacing, structure, storytelling and collaboration. Interviewees include Margaret Sixel (*Mad Max: Fury Road*), Tom Cross (*Whiplash*, *La La Land*), Pietro Scalia (*The Martian*, *JFK*), Stephen Mirrione (*The Revenant*), Ann Coates (*Lawrence of Arabia*, *Murder on the Orient Express*), Joe Walker (*12 Years a Slave*, *Sicario*), Kelley Dixon (*Breaking Bad*, *The Walking Dead*), and many more. *Art of the Cut* also includes in-line definitions of editing terminology, with a full glossary and five supplemental web chapters hosted online at www.routledge.com/cw/Hullfish. This book is a treasure trove of valuable tradecraft for aspiring editors and a prized resource for high-level working professionals. The book's accessible language and great behind-the-scenes insight makes it a fascinating glimpse into the art of filmmaking for all fans of cinema. Art of the Cut Steve Hullfish, 2024-07-18 This is the second volume of the widely acclaimed *Art of the Cut* book published in 2017. This follow-up text expands on its predecessor with wisdom from more than 360 interviews with the world's best editors (including nearly every Oscar winner from the last 30 years). Because editing is a highly subjective art form, and one that is critical to the success of motion picture storytelling, it requires side-by-side comparisons of the many techniques and solutions used by a wide range of editors from around the world. That is why this book compares and contrasts methodologies from a wide array of diverse voices and organizes that information so that it is easily digested and understood. There is no one way to approach editorial problems, so this book allows readers to see multiple solutions from multiple

editors. The interviews contained within are carefully curated into topics that are most important to film editors and those who aspire to become film editors. The questions asked, and the organization of the book, are not merely an academic or theoretical view of the art of editing but rather the practical advice and methodologies of actual working film and TV editors, bringing benefits to both students and professional readers. The book is supplemented by a collection of downloadable online exclusive chapters, which cover additional topics ranging from Choosing the Project to VFX. In addition to the supplementary chapters, access to the full-color, full-resolution images printed in the book—and other exclusive images—is included.

Practical Masonry: A Guide to the Art of Stone Cutting William R. Purchase, 2015-10-06 Regarded by many as the stonemason's bible, Practical Masonry has for many years been one of the best technical stone masonry books available for both apprentices and experienced masons. Originally written in 1896 and published by Crosby Lockwood & Son of London, it met with great acclaim and the correspondence received by the author was that of thanks and praise at such a well written and concise technical book. Following the constructive feedback W R Purchase wrote a second edition in which he included three more chapters: Roman and Grecian moldings (both illustrative) and a glossary of terms. This work was then followed by further editions and by 1904 when the fifth edition was published Purchase had added further chapters including: Masonry Estimating and Quantity Surveying; Building Stones, marble and granite (including detailed lists of specific stones available) and finally Tables of Diameters, Circumferences and Areas of circles. As with many technical books that go out of print it became more difficult for people to purchase this book as the years passed. This latest edition published by Donhead Publishing will ensure that the work of W R Purchase can again reach and assist all those who study or are involved with this ancient craft.

The Art of the Filmmaker Peter Markham,2023 The Art of the Filmmaker: The Practical Aesthetics of the Screen explores the filmmaker's intention and method, their creation and capture of the fiction on the screen, and their formulation of the elements of the frame as a designed address to the audience. Positing 'practical aesthetics' as a resource of visual communication central to cinematic art, this book examines the concepts fundamental to the selective processes of the filmmaker and offers the reader highly informed textual analyses of specific films to explain the how and why of cinematic decision-making. After general consideration of language and cinema, Peter Markham sets out categories essential to the reader in their understanding of the filmmaker's art: dramatic narrative, elements before the lens, screen language, the shot, camera, editing, sound and music. Furthermore, Markham provides insight into how a comparison of the film with its screenplay can reveal the evolution of the filmmaker's storytelling strategies. This book also includes case studies of scenes and sequences from three films by contemporary filmmakers: Hereditary (Ari Aster), Moonlight (Barry Jenkins), and Nomadland (Chloe Zhao). Screenshots are used to illustrate the concepts articulated in the carefully constructed text. This book is intended for the student of filmmaking, its practitioners, students and scholars of film studies and film theory, for those in media studies and arts programs, and for lovers of movies.
