International human rights groups, including Amnesty International and Human Rights Watch, as well as UN bodies such as the Working Group on Arbitrary Detention and the High Commissioner for Human Rights, have stated that the Iraqi Special Tribunal and its

in numerical analysis newton s method also known as the newton raphson method named after isaac newton and joseph raphson is a root finding algorithm which produces successively better approximations to the roots or zeroes of a real valued function the most basic version starts with a single variable function  $f$  defined for a real variable  $x$  the function s derivative  $f'$  and an initial guess  $x_0$  for a root of  $f$  if the function satisfies sufficient assumptions and the initial guess is close
