Experimental Television, Test Films, Pilots and Trial Series, 1925 through 1995 Vincent Terrace, 2024-10-16 Test films, pilots, trial series, limited runs, summer tryouts--by whatever name, television networks have produced thousands of experimental shows that never made it into the regular line-up. Some were actually shown, but failed to gain an audience; many others never even made it on the air. This work includes more than 3,000 experimental television programs, both aired and unaired, that almost became a series. Entries include length, network, air date (if appropriate), a fact-filled plot synopsis, cast, guest stars, producer, director, writer, and music coordinator. Fully indexed.

The Biometric Border World Karen Fog Olwig, Kristina Grüenberg, Perle Møhl, Anja Simonsen, 2019-10-22 Since the 1990s, biometric border control has attained key importance throughout Europe. Employing digital images of, for example, fingerprints, DNA, bones, faces or irises, biometric technologies use bodies to identify, categorize and regulate individuals' cross-border movements. Based on innovative collaborative fieldwork, this book examines how biometrics are developed, put to use and negotiated in key European border sites. It analyses the disparate ways in which the technologies are applied, perceived and experienced by border control agents and others managing the cross-border flow of people, by scientists and developers engaged in making the technologies, and by migrants and non-government organizations attempting to manoeuvre in the complicated and often-unpredictable systems of technological control. Biometric technologies are promoted by national and supranational authorities and industry as scientifically exact and neutral methods of identification and verification, and as an infallible solution to security threats. The ethnographic case studies in this volume demonstrate, however, that the technologies are, in fact, characterized by considerable ambiguity and uncertainty and subject to substantial subjective interpretation, translation and brokering with different implications for migrants, border guards, researchers and other actors engaged in the border world.

A More Perfect Union Linda Sargent Wood,2012-09-01 In 1962, when the Cold War threatened to ignite in the Cuban Missile Crisis, when more nuclear test bombs were detonated than in any other year in history, Rachel Carson released her own bombshell, *Silent Spring*, to challenge society's use of pesticides. To counter the use of chemicals--and bombs--the naturalist articulated a holistic vision. She wrote about a web of life that connected humans to the world around them and argued that actions taken in one place had consequences elsewhere. Thousands accepted her message, joined environmental groups, flocked to Earth Day celebrations, and lobbied for legislative regulation. Carson was not the only intellectual to offer holistic answers to society's problems. This book uncovers a sensibility in post-World War II American culture that both tested the logic of the Cold War and fed some of the twentieth century's most powerful social movements, from civil rights to environmentalism to the counterculture. The study examines important leaders and institutions that embraced and put into practice a holistic vision for a peaceful, healthful, and just world: nature writer Rachel Carson, structural engineer R. Buckminster Fuller, civil rights leader Martin Luther King Jr., Jesuit priest and paleontologist Pierre Teilhard de Chardin, humanistic psychologist Abraham Maslow, and the Esalen Institute and its founders, Michael Murphy and Dick Price. Each looked to whole systems instead of parts and focused on connections, interdependencies, and integration to create a better world. Though the '60s dreams of creating a more perfect world were tempered by economic inequalities, political corruption, and deep social divisions, this holistic sensibility continues to influence American culture today.

Articles on American Literature, 1968-1975 ,1979 Periodical writings about American authors, written between 1968 and 1975, are catalogued according to author under consideration, with additional lists for various genres and topical aspects of American literature.

Single Season Sitcoms, 1948-1979 Bob Leszczak,2012-11-08 This book finally casts a spotlight on some short-lived and almost forgotten sitcoms--those which aired for only one single season. Many books have already been written about situation comedies that enjoyed long and storied runs on television but this volume focuses upon the others. Overflowing with fresh facts, interviews, photographs, and stories, nearly 300 short-lived sitcoms over a 32 year span are presented A-to-Z, whether network or syndicated, prime time or Saturday morning.
