*The Rise of Asia* Frank B. Tipton, 1998-05-29 The shifting balance of economic power away from Western Europe and the United States and towards East and Southeast Asia - firstly Japan, then the small 'Tiger' economies, and now the larger nations of Southeast Asia and China, the potential 'Dragons' - has provoked anger, dismay and a search for the 'secrets' of growth and for 'lessons' to be learned. The Rise of Asia brings together recent scholarship analysing the process of economic, social and political development in East and Southeast Asia from the mid-nineteenth century to the present day.

**Industrialization and Challenges in Asia** Kankesu Jayanthakumaran, 2016-10-29 This book provides a much-needed review of Asia's economic growth and its challenges in the context of post-war industrialization. In the early 1990s, the World Bank (1993) recognized eight high-performing Asian economies (HPAEs) (Japan, the Asian tigers, Indonesia, Malaysia and Thailand) and named them the 'Asian economic miracle'. In the recent past, the term 'emerging economies' has been widely used to refer to the high-growth economies, and includes China, India, Mongolia and Vietnam. In this rush towards high growth, the adverse effects of industrialization are widespread, but were unnoticed. The major challenge is to bring together a comprehensive picture of Asia's growth, taking into account the adverse consequences. Finally, this book examines two challenges for the future of Asia's development: the global financial crisis and urban poverty and inequality.

Welfare Capitalism in East Asia I. Holliday, P. Wilding, 2003-09-18 Social Policy has been a key dimension of dynamic economic growth in East Asia's 'little tigers' and is also a prominent strand of their responses to the financial crisis of the late 1990s. This systematic comparative analysis of social policy in the region focuses on the key sectors of education, health, housing and social security. It sets these sectoral analyses in wider contexts of debates about developmental states, the East Asian welfare model and globalization.

**Social Development in Asia** Kwong-leung Tang, 2012-12-06 Most Asian countries have shown a strong commitment to rapid economic development. Economists have argued that the fruits from economic development will be spread equitably throughout the population. In the absence of a strong tradition of social rights, social development in Asia has long been taken for granted. This collection documents social development in the Asian countries of China, Hong Kong, Taiwan, South Korea, Thailand and India and concludes that social development has lagged behind economic development. This has given rise to 'distorted development' in many countries. Serious development problems of poverty and inequalities have lingered

even in these economically advanced countries of Hong Kong, Taiwan, and Singapore. These problems have been exacerbated in the wake of the Asian economic crisis. In order to harmonize social development with economic growth, Asian states ought to be more proactive in their development agendas. As a text on social development in Asia, this book is primarily intended for practitioners and students of social work, social administration, and social policy. It is also relevant for students and practitioners of sociology, economics, and public policy.

**Political Cultural Developments in East Asia** P. W. Preston, 2016-11-14 This book offers an interpretive and critical comparative politics analysis of the post-1945 development trajectory of the broad East Asian region and its component countries. The discussion considers the region and its countries in terms of their historical legacies (colonialism, war and the preoccupation with development) and argues that each country has constructed their own way of ordering political life, each created its own political logic. Arguing that it is an error to judge these countries' performance against the model of Europe or America, Preston discusses the era of expansionist colonialism, the episode of breakdown in highly destructive regional warfare in the early twentieth century and the subsequent diverse records of China (with its party-state turned towards a nominal state-socialism), Hong Kong (confronting the problems of living with distant masters), Singapore (with its elite directed national building) and Thailand (mired in elite-resistance to popular political reform).

From Asian to Global Financial Crisis Andrew Sheng, 2009-09-28 This is a unique insider account of the new world of unfettered finance. The author, an Asian regulator, examines how old mindsets, market fundamentalism, loose monetary policy, carry trade, lax supervision, greed, cronyism, and financial engineering caused both the Asian crisis of the late 1990s and the global crisis of 2008-9. This book shows how the Japanese zero interest rate policy to fight deflation helped create the carry trade that generated bubbles in Asia whose effects brought Asian economies down. The study's main purpose is to demonstrate that global finance is so interlinked and interactive that our current tools and institutional structure to deal with critical episodes are completely outdated. The book explains how current financial policies and regulation failed to deal with a global bubble and makes recommendations on what must change.

**Growth in East Asia** Mr. Michael Sarel, 1995-09-01 This paper examines the different arguments raised by the studies that addressed the East Asian growth experience. The original arguments presented in this paper are all on the negative side, highlighting problems associated with some of the possible explanations for the East Asian miracle. The paper concentrates mainly on four dimensions of the debate about the East Asian growth experience: (i) The nature of economic growth intensive or extensive?; (ii) The role of public policy and of selective interventions; (iii) The role of high investment rates and a strong export orientation as possible engines of growth; and (iv) The importance of the initial conditions and their relevance for policy.

*A Passion for Asia* Asia Society, 2006 In 1955, John D. Rockefeller III convened a committee to respond to post-World War

II interest in developing improved understanding of, and relations with, countries in Asia. His family's longstanding interest in Asia had led him to travel in China and Japan after he graduated from university in 1929. The Rockefellers' deeply felt passion for Asia led to the founding of the Asia Society in 1956. Today, the need for better understanding of Asian cultures--political, economic, and artistic--is more urgent than ever. This beautifully produced volume reflects in photographs and words the many-sided mission of the Asia Society. Fascinating archival photographs bring the Rockefeller family's travels, philanthropic activities, social occasions, and wonderful domestic interiors to life. Important objects--sculptures, paintings, prints, screens, ceramics--all collected by members of the family, many from the Society's collection and others from museums around the country, are reproduced in full color. The text includes essays by Rockefeller family members; former Asia Society presidents; Peter Johnson, the family historian; Cynthia Altman, curator of Kykuit, the Rockefeller family estate; and Vishakha Desai, president of the Asia Society. SELLING POINTS: Documents the history and beginnings of this leading global organization whose mission of promoting the exchanges of ideas, education, and arts still holds true today Features period photographs of the Rockefeller family on their many travels to Asia and provides insight into how their collection developed 100 colour & 75 b/w illustrations

Pacific Asia David W. Drakakis-Smith,2002-01-31 Pacific Asia - from Burma to Papua New Guinea to Japan - is the most dynamic and productive region in the developing world, the result of an economic explosion fuelled by industrial activity. This is where the Green Revolution began, where more women are employed in factory work than anywhere else; the region is also the most predominately socialist in the Third World. David W. Smith assesses Pacific Asia both in terms of its historical development and the present global system, placing general development issues in their local contexts. The book will be an invaluable introduction to the region.

*Digitized Statecraft in Multilateral Treaty Participation* Takashi Inoguchi,Lien Thi Quynh Le,2021-03-20 This book is a rarity in that it opens a genuinely creative new vista for understanding global politics as distinguished from international politics, enhancing the vision for understanding global subjects such as multilateral treaties and the Covid-19 virus. Six hundred multilateral treaties deposited in the UN are conceptualized as a bundle of quasi-social contracts by sovereign states. A state's participation in multilateral treaties is envisaged as digitized statecraft. Using a state's physical actions and treaties' attributes, 193 profiles of statecraft are analyzed with the implications for the future of global politics. This book demonstrates that multilateral treaties are both a vehicle and an agency in the globalization trend; thus, both state and international actors influence a state's joining multilateral treaties. The book represents a marriage of international law and applied information science. It provides a framework for empirical modeling based on artificial intelligence and analyzes this framework in terms of international law and international relations. This book thus creates a new understanding of global

politics.

*Asian American Fiction After 1965* Christopher T. Fan, 2024-04-23 After the 1965 Immigration and Nationality Act loosened discriminatory restrictions, people from Northeast Asian countries such as South Korea, Taiwan, Japan, and eventually China immigrated to the United States in large numbers. Highly skilled Asian immigrants flocked to professional-managerial occupations, especially in science, technology, engineering, and math. Asian American literature is now overwhelmingly defined by this generation's children, who often struggled with parental and social expectations that they would pursue lucrative careers on their way to becoming writers. Christopher T. Fan offers a new way to understand Asian American fiction through the lens of the class and race formations that shaped its authors both in the United States and in Northeast Asia. In readings of writers including Ted Chiang, Chang-rae Lee, Ken Liu, Ling Ma, Ruth Ozeki, Kathy Wang, and Charles Yu, he examines how Asian American fiction maps the immigrant narrative of intergenerational conflict onto the "two cultures" conflict between the arts and sciences. Fan argues that the self-consciousness found in these writers' works is a legacy of Japanese and American modernization projects that emphasized technical and scientific skills in service of rapid industrialization. He considers Asian American writers' attraction to science fiction, the figure of the engineer and notions of the "postracial," modernization theory and time travel, and what happens when the dream of a stable professional identity encounters the realities of deprofessionalization and proletarianization. Through a transnational and historical-materialist approach, this groundbreaking book illuminates what makes texts and authors "Asian American."

**The Political Economy of East Asia** Ming Wan, 2007-10-17 For students of international political economy, it is hard to ignore the growth, dynamism, and global impact of East Asia. Japan and China are two of the largest economies in the world, in a region now accounting for almost 30 percent more trade than the United States, Canada, and Mexico combined. What explains this increasing wealth and burgeoning power? In his new text, Ming Wan illustrates the diverse ways that the domestic politics and policies of countries within East Asia affect the region's production, trade, exchange rates, and development, and are in turn affected by global market forces and international institutions. Unlike most other texts on East Asian political economy that are essentially comparisons of major individual countries, Wan effectively integrates key thematic issues and country-specific examples to present a comprehensive overview of East Asia's role in the world economy. The text first takes a comparative look at the region's economic systems and institutions to explore their evolution—a rich and complex story that looks beyond the response to Western pressures. Later chapters are organized around close examination of production, trade, finance, and monetary relations. While featuring extended discussion of China, Japan, South Korea, and Taiwan, Wan is inclusive in his analysis, with coverage including Myanmar, Thailand, Laos, Vietnam, Cambodia, Malaysia, Singapore, Indonesia, Brunei, and the Philippines. The text is richly illustrated with more than fifty tables, figures, and maps that present the latest economic and political data to help students better visualize trends and

demographics. Each chapter ends with extensive lists of suggested readings.

*Business Relationships with East Asia* Jim Slater, Roger Strange, 2013-03-07 This volume analyses the business environment in East Asia with reference to trade and investment flows within the region and between East Asia and Europe. Focusing on the two-way flow of management ideas, investment and technology, this study highlights the way in which both sides can benefit.

**The Transformation of the World Economy** R. Solomon, 1999-06-02 This revised, extended and updated edition of Robert Solomon's well-received *The Transformation of the World Economy* assesses the remarkable changes in the world economy in recent decades. The impact of marketization, of globalization in both industry and finance, and of increased policy co-ordination as a response at regional and global level, are analysed. The policy impact of changing philosophies of economic policy in the US, Britain, Western Europe, the USSR, Russia and Eastern Europe, China, Asia, the Middle East, Africa and Latin America are analysed.

**The Knowledge Capital of Nations** Eric A. Hanushek, Ludger Woessmann, 2015-04-10 A rigorous, pathbreaking analysis demonstrating that a country's prosperity is directly related in the long run to the skills of its population. In this book Eric Hanushek and Ludger Woessmann make a simple, central claim, developed with rigorous theoretical and empirical support: knowledge is the key to a country's development. Of course, every country acknowledges the importance of developing human capital, but Hanushek and Woessmann argue that message has become distorted, with politicians and researchers concentrating not on valued skills but on proxies for them. The common focus is on school attainment, although time in school provides a very misleading picture of how skills enter into development. Hanushek and Woessmann contend that the cognitive skills of the population—which they term the “knowledge capital” of a nation—are essential to long-run prosperity. Hanushek and Woessmann subject their hypotheses about the relationship between cognitive skills (as consistently measured by international student assessments) and economic growth to a series of tests, including alternate specifications, different subsets of countries, and econometric analysis of causal interpretations. They find that their main results are remarkably robust, and equally applicable to developing and developed countries. They demonstrate, for example, that the “Latin American growth puzzle” and the “East Asian miracle” can be explained by these regions' knowledge capital. Turning to the policy implications of their argument, they call for an education system that develops effective accountability, promotes choice and competition, and provides direct rewards for good performance.

Growth Theories in Light of the East Asian Experience Takatoshi Ito, Anne O. Krueger, 2007-12-01 The contributors to this

volume analyze the growth experiences of Japan, Korea, China, Hong Kong, Singapore, and Taiwan in light of the recently developed endogenous growth theory to provide an understanding of the economic boom in East Asia. The theory explored in this volume attributes the phenomenal economic success of these countries to, among other factors, the role of an outward orientation—a focus on exporting rather than on protecting home markets. In addition, the importance of exchange rate behavior, of the supportive role of government policy, and of the accumulation and promotion of physical and human capital are explored in detail. This collection also examines the extent to which growth in each country became self-sustaining once it began. Demonstrating the relevance of endogenous growth theory for studying this important region, this fourth volume in the NBER-East Asia Seminar on Economics series will be of interest to observers of East Asian affairs.

**On East Asian Regional Cooperation I** Zhang Yunling, 2019-06-18 The book intends to locate the process and effectiveness of cooperation in East Asia, to regard the construction of the East Asian community as the ideal, to see the contradictions and difficulties in construction as the reality, and to identify the actual development and achievement as the choice and effort between the two. The year of 1997 saw the Asian financial crisis, which turned out to be a disaster but also opened up an opportunity for East Asia to establish cooperation mechanisms. Starting with the crisis, this book examines the origin and development of the East Asian cooperation movement. More importantly, it investigates the obstacles and resistance, and provides insights into the cooperation within East Asia in the context of unstable political environments. Specifically, it expounds the East Asian Free Trade Area, monetary cooperation, as well as the cooperation within Northeast Asian and Asia-Pacific regions.
