Natural Causes Dan Hurley, 2007-12-26 A riveting work of investigative journalism that charts the rise of the dietary supplement craze and reveals the dangerous—and sometimes deadly—side of these highly popular and completely unregulated products. Over 60 percent of Americans buy and take herbal and dietary supplements for all sorts of reasons—to prevent illness (vitamin C), to ease depression (St. John's wort), to aid weight loss (ephedra), to boost the memory (ginkgo biloba), and even to cure cancer (shark cartilage, bloodroot)—despite the fact that few of these “natural” supplements have been proven to be safe or effective. The vitamin and herbal supplement industry generates over \$20 billion a year by selling products that promise to cure or fix, but are produced and marketed essentially without oversight. And while the media has been quick to sensationalize the benefits of supplements, few have taken a hard look at the dangers posed by many of the remedies flooding the market today. Award-winning journalist Dan Hurley breaks the silence for the first time in *Natural Causes*. From the snake-oil salesmen of the early twentieth century, to rise of the health food movement in the sixties and seventies, Hurley charts the remarkable growth of an industry built largely on fraud, and reveals the backroom politics that led to the passage of the Dietary Supplement Health and Education Act of 1994, which effectively freed the industry from FDA oversight. In unprecedented detail, he shows how supplement manufacturers have concealed the truth about dozens of untested treatments and the shocking rise in deaths, disfigurements, and life-threatening injuries caused by products deceptively promoted as “safe and natural.” Most importantly, he provides a telling look at why, in an age of unprecedented scientific advancement, we continue to buy and believe in remedies for which little evidence exists—and why the supplements we take to promote our health may be doing far more harm than good. As Hurley shows, the dietary supplement craze may be one of the greatest swindles ever perpetrated on the American public—one that feeds billions of dollars each year into the pockets of lobbyists, politicians, and any charlatan who wants to slap a label on a bottle and tout it as the next big “natural cure.” Blending hard facts with spellbinding personal stories, *Natural Causes* is a must-read for anyone who has ever popped a multivitamin or an herb, and provides a hard-hitting, frightening look at a cultural trend that is out of control.

Orthomolecular Nutrition for Everyone Helen Saul Case, 2017-03-14 Orthomolecular nutrition prevents and cures disease. This fact has been ignored by our current health care system, the media, and the medical literature. Why doesn't your doctor use nutritional therapy? Is it for lack of safety? Because it's not effective? Because it's expensive? It happens to be none of these. Despite what you have been told, nutritional medicine is safe and effective. It is remarkably inexpensive especially when compared to the incredibly high cost of modern medicine. The evidence from nearly 80 years of research by orthomolecular physicians proves it: nutritional therapy works. Most vitamin research you hear about focuses on low, and therefore, inadequate doses of vitamins. Low doses do not get clinical results. High-dose vitamin therapy does; it has for decades. But which vitamins should we take? How much? Is taking all those vitamins safe? This book addresses common questions about supplementation including dosing, safety, and just what all those extra vitamins do for you. It also covers what to eat and why, the real story about exercise and good health, why we shouldn't fear germs, and how each and every vitamin can get you better now and keep you well in the future.

Inside Poop Scott W. Webb, 2005-11-21 This book kept me reading all night. I couldn't put it down! -- Brad DeMeulenaere I had my first colonic at age 26. I am now 56 and have seen a total of five colon hygienists, four within the past six years. I've been through the forest of medical doctors and many different alternative health practitioners. Much of the time, I have sensed a frustration from them. Sometimes it's a frustration that they can't figure out how to help me and sometimes it feels like a cumulative frustration from all the others they haven't been able to help. But sometimes I feel that their frustration is directed to me personally, as if they wished I would just get myself together and feel better. Lord knows, I haven't always made the best choices for my health. When I saw Scott Webb, I felt a lack of that frustration and no hint of blame. It was

evident to me that he saw the big picture and how we have been affected by our culture. Scott's message was truly one of hope which brought me a sense of relief and peace. That is definitely a place where healing can begin, when you feel no blame, just peace and hope. -- Victoria Lovett One of America's leading colonic therapists gives you the inside scoop on digestive disorders that you or a loved one might be experiencing. Learn how to: cleanse your colon and your whole body, reduce your risk of common diseases, understand the deeper issues of weight loss, beat underlying causes of depression, improve your diet to overcome constipation, visualize yourself well and feel better every day! Scott W. Webb dares to defy conventional wisdom about health and proves beyond a shadow of a doubt that he knows the inside poop about many secrets you have not heard yet -- until now!

Debating Dissent Gregory S. Kealey, Lara Campbell, Dominique Clément, 2012-01-01 Although the 1960s are overwhelmingly associated with student radicalism and the New Left, most Canadians witnessed the decade's political, economic, and cultural turmoil from a different perspective. *Debating Dissent* dispels the myths and stereotypes associated with the 1960s by examining what this era's transformations meant to diverse groups of Canadians — and not only protestors, youth, or the white middle-class. With critical contributions from new and senior scholars, *Debating Dissent* integrates traditional conceptions of the 1960s as a 'time apart' within the broader framework of the 'long-sixties' and post-1945 Canada, and places Canada within a local, national, an international context. Cutting-edge essays in social, intellectual, and political history reflect a range of historical interpretation and explore such diverse topics as narcotics, the environment, education, workers, Aboriginal and Black activism, nationalism, Quebec, women, and bilingualism. Touching on the decade's biggest issues, from changing cultural norms to the role of the state, *Debating Dissent* critically examines ideas of generational change and the sixties.

The Art of Aromatherapy Robert Tisserand, 1978-04 Often called the father of modern aromatherapy, Tisserand introduced the use of essential oils in healing in this seminal bestseller. Includes a glossary and therapeutic index.

Spotlight on Gluten: New Symptoms for the New Millennium? Or Long-Standing Symptoms Now Being Recognized? Lucille Cholerton, 2012-02 Lucille Cholerton is a specialist in gluten sensitivity and coeliac disease. She and her three grown children all suffer from gluten sensitivity. Read her story in *Spotlight on Gluten: New symptoms for the new millennium? Or long-standing symptoms now being recognized?* Age is very pertinent to the subject of gluten sensitivity. This disorder should really be diagnosed in childhood, but if the diagnosis is missed, people can suffer for many years with unexplained symptoms, when something that they are eating every day could be the root cause of their ill health. This book covers the symptoms that Cholerton and her children suffered, and how they improved their health dramatically on a gluten-free diet. The author's research spans twenty years. In my research I discovered that gluten may be responsible for many autoimmune disorders, of which there are some eighty-eight documented. My doctors knew nothing about this, so I really had to be my own guinea pig.

A former teacher, Lucille Cholerton is now a nutrition counselor and is writing her next books on gluten sensitivity. There is a dire need for better diagnosis and understanding of this disorder. She is married and lives in Durban, South Africa. She started the Gluten Intolerance/Coeliac Support Group in Durban in 1995. For more information about gluten, visit <http://www.allergysa.org> . Food for Dissent Maria McGrath, 2019-08-26 In the 1960s and early 1970s, countercultural rebels decided that, rather than confront the system, they would create the world they wanted. The natural foods movement grew out of this contrarian spirit. Through a politics of principled shopping, eating, and entrepreneurship, food revolutionaries dissented from corporate capitalism and mainstream America. In *Food for Dissent*, Maria McGrath traces the growth of the natural foods movement from its countercultural fringe beginning to its twenty-first-century food revolution ascendance, focusing on popular natural foods touchstones—vegetarian cookbooks, food co-ops, and health advocates. Guided by an ideology of ethical consumption, these institutions and actors spread the movement's oppositionality and transformed America's foodscape, at least for some. Yet this strategy proved an uncertain instrument for the advancement of social justice, environmental defense, and anti-corporatism. The case studies explored in *Food for Dissent* indicate the limits of using conscientious eating, shopping, and selling as tools for civic activism.

It tells all about love and hate, understanding and misunderstanding, and pain and hurt on a one to one level. It tells of the realities of life. That we must, Love God. Believe in God. Terrors of the Table Walter Gratzer, 2005-09-29 Terrors of the Table is an absorbing account of the struggle to find the necessary ingredients of a healthy diet, and the fads and quackery that have always waylaid the unwary and the foolish when it comes to the matter of food and health. Walter Gratzer tells the tale of nutrition's heroes, heroines and charlatans with characteristic crispness and verve. We find an array of colourful personalities, from the distinguished but quarrelsome Liebig, to the enterprising Lydia Pinkham. But we also find the slow recognition that the lack of vital ingredients can cause terrible illnesses - scurvy, rickets, beriberi. These diseases stalked the poor in the West even into the 20th century, and scandalously remain in poorer parts of the world today. The narrative stretches from classical times to the modern day and gives a valuable historical perspective to our current understanding. It also highlights some of the problems faced by the developed world regarding health today - in particular diabetes and obesity. And despite our far greater understanding of what our body needs, there are still many who would fall for fads and fancy diets - some dangerous, others just daft. Of course, the story of nutrition does not end there. We have discovered the key vitamins and minerals our body needs, but research continues on the connections between diet, health and disease. The body's biochemistry is complex, and there are no easy answers, no magic formula, that applies to all individuals. The safest and most rational course would seem to be a sensible, moderate, and varied diet, not forgetting that 'a little of what you fancy does you good'.

Gilman lays out the history of diets and dieting in a fascinating series of articles.

Expression Kerry O'Brien, 2019 Reading a book about an individual's journey with a terminal bowel cancer diagnosis would ordinarily seem to be a rather depressing read. However, Kerry's light-hearted sense of humour and unending positivity and love of life shines through in her writing. In this very personal book, Kerry overcomes the stigma of talking openly about the symptoms and treatments for bowel cancer: there are graphic descriptions of some of the intimate details of bodily (mal)functions; reflections on her research into what may have contributed to her diagnosis and nutritional and other lifestyle changes she has found helpful. Kerry shares how she has made sense of her situation and developed coping strategies, in the hope of helping others. The insights gained from this book will be valuable for a broad range of readers: patients with bowel cancer, wanting to learn more about other patients' experiences; families and friends of bowel cancer patients (who perhaps feel uncomfortable asking those difficult questions); healthcare professionals who want a deeper understanding of their patients' emotional, as well as physical needs; researchers exploring the lived experiences of bowel cancer patients and writers investigating comparative healthcare provision for cancer patients. Kerry's book is an inspiring and readable story, written from the heart. Ursula Edgington.

Women Confront Cancer Margaret Wooddell, David J. Hess, 1998-10 Each year hundreds of thousands of women are diagnosed with cancer, and more and more frequently, women are turning to alternative treatments to take control of their illnesses and their lives. Information, however, has been scarce for women navigating through conventional and unconventional medicine. Research funding continues to support traditional cancer therapies. Women Confront Cancer

declares the need for new, less toxic therapies and diagnostic procedures. For the first time, Women Confront Cancer unites the voices of women leaders who have breast, cervical, ovarian, and other cancers. Documenting the decision process, the choices, and the dilemmas these women faced as they chose alternative and complementary cancer treatments, a powerful unity emerges, pointing the way to the future of the diagnosis and treatment of cancer by less toxic methods. Ann Frahm, the author of A Cancer Battle Plan, Susan Moss, the author of Keep Your Breasts, and Cathy Hitchcock, coauthor of Breast Cancer, are only three of the leaders who relate their personal experiences with cancer. All of the women featured in Women Confront Cancer share how and why they created treatment programs that combine the best of conventional and unconventional approaches, and how it has improved their health and their lives. A call for patients' rights, for policy reform in cancer research, for better information about both conventional and alternative medicine, Women Confront Cancer will be both a source of inspiration for women who have cancer and an aid for them in creating their own approach to healing. * Did you know that October is [NATIONAL BREAST CANCER AWARENESS MONTH] and pink is the color that symbolizes breast cancer awareness?
