Puzzles and Essays from 'The Exchange' Charles R Anderson,2018-10-24 Who said that? When did that happen? Where the heck does that thing come from? Was that French, or what? What's that supposed to mean?For 35 years, librarians in the United States and other countries sent puzzles they could not solve locally to "The Exchange," a column for reference librarians appearing in RQ (and later, RUSQ), the official journal of the Reference and User Services Division of the ALA. Other readers often furnished the answers--sometimes years or even decades later! Puzzles and Essays from The Exchange organizes those perplexing questions and answers into a reader-friendly reference format, embellished with essays that appeared in the column over the last fifteen years of its publication.This unique collection of questions and answers that stumped librarians on four continents over a 35-year period comes complete with authoritative bibliographic citations. It also contains an extensive subject, person, and keyword index, providing easy access to the material.Packed with fascinating information, little-known trivia, and hard-to-find facts, Puzzles and Essays from The Exchange is a wonderful reference source, answering difficult questions about: the origins of common--and not-so-common--customs, like giving engagement rings, driving on the right or left side of the road, tying yellow ribbons around trees in memory of captives, leg shaving, visits from the "Tooth Fairy," and much, much more! the origins of words, phrases, and terms that don't, when taken literally, make much sense the origins of popular sayings--The grass is always greener; The whole nine yards; It ain't over until the fat lady sings; Close but no cigar; Going down the tube; Light at the end of the tunnel; Katy, bar the door; Goodbye, cruel world; etc. the sources of famous quotations--both spurious and real! the sources of poetry fragments and bits of verse that have become part of the popular lexicon hard-to-find biographical information--from George Washington Carver's many uses for the

peanut and the sweet potato to the name of Paul Revere's horse to the truth about the “let them eat cake” story attributed to Marie Antoinette trivia and miscellany--how lullabies began; why a yawn is contagious when a sneeze is not; what the names of the monkeys in The Wizard of Oz were; why pigeons bob their heads when they walk; what the vital statistics of the Venus de Milo are; and much more! the history of “The Exchange” itself! Puzzles and Essays from The Exchange will also challenge you with a list of so-far unanswered questions, unidentified quotations, and popular sayings whose origins are still generally unknown. Perhaps you’ll be the one to answer the riddles that stumped the editors and readers of “The Exchange!”

Our kids are not broken. What really needs to change is the adults these days.

Greening the Children of God Chad Michael Rimmer,2019-10-02 Greening the Children of God uncovers the theological roots of the growing ethical imperative to reconnect children to their natural environment. Theologians emphasize the sacramental nature of embedding our lives in creation. Environmental educators emphasize knowledge of local biology. Psychologists emphasize the morally pro-formative experience of care between biodiverse creatures. Together they affirm that knowing their place in the natural environment helps a child develop an intersubjective “ecological” identity that nurtures virtues of mutuality and care. During the Scientific Revolution this ethical harmony was threatened as science and moral theology began to adopt different epistemological methods. Seventeenth-century Anglican priest and poet Thomas Traherne was prescient of the consequences of this divorce and insisted that education should promote a child’s attention to the moral dimensions woven into “the tapestry of creation.” Traherne professed that play, wonder, and a sensory relationship to diverse creatures play a pedagogical role in a child’s moral formation. Greening the Children of God establishes the contemporary significance of Traherne’s moral theory in conversation with child psychologists, educators, philosophers, and theologians who know that cultivating a place-based relationship to the local ecology helps children perceive creation’s deep mutuality and develop a moral identity in the image of a caring Creator.

Mindfulness at Play Stephen McKenzie, Angela North, 2023 Mindfulness is widely used in personal development, healthcare, business and sports to improve wellbeing and performance. Mindfulness at Play is for those it can potentially be of the greatest value to — young people — and the people who give them their primary support, their parents. It combines science and wisdom, theory and practice, strategies and activities. It also provides a combination of psychological knowledge and practical guiding principles which will help parents help themselves, as well as their children, to achieve mindfulness. The authors know that the benefits of mindfulness are substantial and far-reaching. When young people can clearly focus on their internal world in the present moment, they are better able to: • Know and communicate their experiences and needs — a critical component of emotional intelligence. • Discover that they can be curious rather than overwhelmed by emotions, leading to greater emotion regulation and resilience. • Increase self-acceptance and decrease shame, resulting in greater wellbeing, more effective healing from trauma, and an increase in pro-social behaviors towards others. This book will greatly help young people's learning development, social development and whole-person development. It is a comprehensive yet light, playful and play-based one-stop mindfulness resource for parents

Parenting Gifted Kids James Delisle, 2021-09-03 A gifted education Legacy Award winner, *Parenting Gifted Kids: Tips for Raising Happy and Successful Children* provides a humorous, engaging, and encouraging look at raising gifted children today. James R. Delisle, Ph.D., offers practical, down-to-earth advice that will cause parents to reexamine the ways they perceive and relate to their children. Dr. Delisle puts forward 10 tips to parents of gifted children—ideas that reflect attitude and approach and allow for introspection and change, rather than quick, do-it-tonight solutions. Some topics of interest include understanding a child's giftedness, working with the school system, dealing with perfectionism in gifted kids, and being adult role models for children. Along the way, stories from gifted children and their parents provide insight into the lives of these individuals. What sets this book apart from other books for parents of gifted kids is its expansion beyond mere platitudes. Dr. Delisle's tips go beyond the basics, focusing on attitude, reflection, and subtle changes, rather than specific, cookie-cutter recipes for action. The 10 tips suggested and expanded upon in this book include: understanding what giftedness is . . . and what it is not; understanding the differences between gifted kids and their agemates; understanding the personality traits of gifted kids, including overexcitabilities; taking charge of your child's education; understanding the issue of perfectionism in gifted kids; examining social nuances and myths related to giftedness; examining the similarities parents share with their gifted children; setting reasonable goals; helping gifted children make a difference in the lives of others; and remembering that gifted children are kids first and gifted second.
