Free the Land Audrea Lim, 2024-06-25 An eye-opening examination of how treating land as a source of profit has a massive impact on racial inequality and the housing, gentrification, and environmental crises. Climate change, gentrification, racial inequity, and corporate greed are some of the most urgent problems facing our society. They are traditionally treated as unrelated issues, but they all share a common root: the commodification of land. Environmental journalist Audrea Lim began to notice these connections a decade ago when she reported on the Native communities leading the fight against oil mining on their lands in the Canadian tar sands near her hometown of Calgary, but before long, she saw the essential role of land commodification and private ownership everywhere she looked: in foreclosure-racked suburbs and gentrifying cities like New York City; among poor, small farmers struggling to keep their businesses afloat; and in low-income communities attempting to resist mines and industrial development on their lands, only to find that their voices counted less than those of shareholders living thousands of miles away. *Free The Land* is a captivating and beautifully rendered look at the ways that our relationship to the land is the core cause of the most pressing justice issues in North America. Lim expertly weaves together seemingly disparate themes into a unified theory of social justice, describes how the land ownership system developed over the centuries, and presents original reporting from a wide range of activists and policy makers to illustrate the profound impact it continues to have on our society today. Ultimately, this book offers a message of hope: by approaching these socioeconomic issues holistically, we can begin to imagine just alternatives to fossil-fueled capitalism, new ways to build community, and a more sustainable, equitable world.

Architectures of Care Brittany Utting, 2023-12-05 Drawing from a diverse range of interdisciplinary voices, this book explores how spaces of care shape our affective, material, and social forms, from the most intimate scale of the body to our planetary commons. Typical definitions of care center around the maintenance of a livable life, encompassing everything from shelter and welfare to health and safety. Architecture plays a fundamental role in these definitions, inscribed in institutional archetypes such as the home, the hospital, the school, and the nursery. However, these spaces often structure modes of care that prescribe gender roles, bodily norms, and labor practices. How can architecture instead engage with an expanded definition of care that questions such roles and norms, producing more hybrid entanglements between our bodies, our collective lives, and our environments? Chapters in this book explore issues ranging from disabled domesticities and

nursing, unbuilding whiteness in the built environment, practices and pedagogies of environmental care, and the solidarity networks within 'The Cloud'. Case studies include Floating University Berlin, commoning initiatives by the Black Panther party, and hospitals for the United Mine Workers of America, among many other sites and scales of care. Exploring architecture through the lenses of gender studies, labor theory, environmental justice, and the medical humanities, this book will engage students and academics from a wide range of disciplines.

Good Music for a Free People Nancy Newman,2010 In this book the author examines the activities and reception of the Germania Musical Society, an orchestra whose members emigrated from Berlin during the revolutions of 1848. These two dozen Forty-eighters gave nearly a thousand concerts in North America during the ensuing six-year period, possibly reaching a million listeners. Drawing on a memoir by Henry Albrecht, the author provides insights into the musicians' desire to bring their music to the audiences of a democratic republic at this turbulent time. Eager to avoid the egotism and self-promotion of the European patronage system, they pledged to work for their mutual interests both musically and socially. One for all, and all for one became their motto.

Free Soil Joseph G. Rayback, 2014-07-15 The presidential election of 1848, known as the Free Soil election, marked the emergence of antislavery sentiment as a determining political force on a national scale. In this book Joseph G. Rayback provides the first comprehensive history of the campaign and the election, documenting his analysis with contemporary letters and newspaper accounts. The progress of the campaign is examined in light of the Free Soil movement: agitation for Free Soil candidates and platforms at the national conventions proved ineffective, and the nominations of Zachary Taylor and Lewis Cass completed the major parties' alienation of the various antislavery groups. Thwarted in their attempts to capture the national parties, the Free-Soilers formed a massive coalition, which met in Buffalo, and formally created the Free Soil party, nominating their own candidate, ex-President Martin Van Buren. The Whigs and the Democrats, forced by the new party to take a position on the touchy slavery question, attempted to use Free Soil to elect their candidates—in the North by claiming, it in the South by disclaiming it. Rayback concludes that the Free Soil election was one of the most significant in American history, a turning point in national politics that marked the end of the Jacksonian Era. Although Taylor was elected president, Van Buren took about ten percent of the popular vote away from the Whigs and the Democrats. It was the first presidential election in which a third party made substantial inroads on major party loyalties, one in which the electorate indicated a desire for a moderate solution to the problem of slavery extension—a solution that was attempted by the Thirty-first Congress with its Compromise of 1850.

The Capital of Free Women Danielle Terrazas Williams, 2022-01-01 A restoration of the agency and influence of free African-descended women in colonial Mexico through their traces in archives A breathtaking study that places free African-descended women at the nexus of questions about religion, commerce, and the law in colonial Mexico. Danielle Terrazas

Williams has produced a dazzling and important contribution to the history of women, family, race, and slavery in the Americas.--Sophie White, author of *Voices of the Enslaved The Capital of Free Women* examines how African-descended women strove for dignity in seventeenth-century Mexico. Free women in central Veracruz, sometimes just one generation removed from slavery, purchased land, ran businesses, managed intergenerational wealth, and owned slaves of African descent. Drawing from archives in Mexico, Spain, and Italy, Danielle Terrazas Williams explores the lives of African-descended women across the economic spectrum, evaluates their elite sensibilities, and challenges notions of race and class in the colonial period.
