Periodismo de marcas Carlos J. Campo, 2016-06-30 El periodismo de marcas es para unos pocos. Da lo mismo si se

trata de enormes marcas multinacionales o de pequeñas denominaciones muy especializadas o muy locales. Es para una selectísima minoría y, además, es periodismo puro y duro. Hoy, con el descrédito de la publicidad, la desintermediación de la información, el desengaño tecnológico y la pérdida de la ingenuidad de las audiencias, se ha creado el escenario perfecto para desarrollar un periodismo que pretende una influencia todopoderosa. Este tratado actualiza los modos de este periodismo, abordando su sustrato teórico. Discrimina el contenido de marca de la acción periodística. Desmiente la antitética conceptual de periodismo y marca en una misma expresión. Y desvela, desde la experiencia, cómo fundar la redacción de marca, diseñar la línea editorial y ejercerlo cotidianamente. La marca que lo use se cotizará más. Y la corporación que evolucione con él logrará unos resultados económicos aún mejores.

Ordenación del territorio, ciudad y derecho urbano: competencias, instrumentos de planificación y desafíos

Varios Autores,2020-09-03 El grupo de investigación de Derecho Administrativo de la Universidad Externado de Colombia entrega al público una obra que le permite al lector comprender las diferentes competencias e instrumentos de ordenación del territorio colombiano y, en esta labor, establecer no solo cuales son las relaciones entre los diferentes niveles territoriales sino además identificar las contradicciones que se derivan de la superposición de decisiones que confluyen sobre el suelo como objeto de intervención de las esferas nacionales, departamentales, regionales, locales y sectoriales. Es este galimatías jurídico se enmarca la planificación de la ciudad, la cual, en el ejercicio de la autonomía reconocida por la Constitución a los municipios, se somete a directrices territoriales de diversas autoridades, pero, al mismo tiempo, establece aquellas particularidades que le dan identidad. Así las cosas, la planificación se convierte en un instrumento que permite que en lo municipios se definan los difusos límites que existen entre lo urbano y lo rural: se potencie una construcción participativa del territorio, se reconozca la existencia de fórmulas colaborativas entre instancias públicas y privadas, se refuercen actuaciones encaminadas a la mayor generación de espacio público de protección de valores, medio ambientales, de mejor prestación de servicios públicos, etc. En definitiva, una concepción del urbanismo identificado con todas estas aristas y en que se tenga como norte la mejora de la calidad de vida de las poblaciones y las generaciones de mayores condiciones de igualdad material.
