A History of Sculpture Ernest Henry Short,1907

First Public Sculptures Emily Williams,AI,2025-02-26 First Public Sculptures delves into the origins of monumental art, revealing how ancient societies leveraged these creations to mold public consciousness and establish civic identity. Exploring cultures from ancient Egypt and Mesopotamia to Greece and Rome, the book highlights how these sculptures served as potent symbols of power and cohesion. For instance, colossal statues of pharaohs weren't mere decorations, but declarations of divine authority. Similarly, the Greeks and Romans used sculpture in civic spaces to celebrate victories and honor citizens, thereby embodying ideals of justice. The book traces the evolution of public sculpture, focusing on its use to propagate political ideologies, educate the public, and shape collective memory. It examines specific cases with archaeological evidence, historical texts, and art-historical analysis. This approach distinguishes the book from broader surveys by focusing on the earliest examples and their immediate impact. The arguments in First Public Sculptures emerge from a multidisciplinary approach, integrating art history, archaeology, political science, and sociology. By analyzing primary source materials and existing scholarship, the book illustrates how these sculptures reflect and influence social dynamics. The book

progresses by first examining pre-classical civilizations, then moving onto the early Greek and Roman societies, and finally focusing on political ideologies, public education, and collective memory.

Roman Sculpture from Augustus to Constantine Eugénie Strong,1907

One Hundred Masterpieces of Sculpture ,1909

The Horses of St. Mark's Charles Freeman,2010-08-12 The noted historian explores the mysterious origins and surprising adventures of four iconic bronze statues as they appear and reappear through the ages. In July 1798, a triumphant procession made its way through the streets of Paris. Echoing the parades of Roman emperors many years before, Napoleon Bonaparte was proudly displaying the spoils of his recent military adventures. There were animals—caged lions and dromedaries—as well as tropical plants. Among the works of art on show, one stood out: four horses of gilded metal, taken by

Napoleon from their home in Venice. The Horses of St Mark's have found themselves at the heart of European history time and time again: in Constantinople, at both its founding and sacking in the Fourth Crusade; in Venice, at both the height of its greatness and fall in 1797; in the Paris of Napoleon, and the revolutions of 1848; and back in Venice, the most romantic city in the world. Charles Freeman offers a fascinating account of both the statues themselves and the societies through which they have travelled and been displayed. As European society has developed from antiquity to the present day, these four horses have stood and watched impassively. This is the story of their—and our—times.

The Humanist Interpretation of Hieroglyphs in the Allegorical Studies of the Renaissance Karl

Giehlow, 2015-01-27 The Hieroglyphenkunde by Karl Giehlow published in 1915, described variously by critics as “a masterpiece”, “magnificent”, “monumental” and “incomparable”, is here translated into English for the first time. Giehlow’s work with an initial focus on the Hieroglyphica of Horapollo, the manuscript of which was discovered by Giehlow, was a pioneering attempt to introduce the thesis that Egyptian hieroglyphics had a fundamental influence on the Italian literature of allegory and symbolism and beyond that on the evolution of all Renaissance art. The present edition includes the illustrations of Albrecht Dürer from the Pirckheimer translation of the Horapollo from the early fifteenth century.
