**Astrolabes from Medieval Europe** David A. King, 2024-10-28 This is the fourth set of studies in the Variorum series by David King, a leading authority on the history of astronomy in Islamic civilization and on medieval astronomical instruments, European as well as Islamic. The first of the eleven studies collected here deals with medieval instruments in general, as precious historical sources. The following papers focus on individual astrolabes from the European Middle Ages and early Renaissance that are of singular historical importance. Two look at the origins of the simple universal horary quadrant and the complicated universal horary dial (navicula). The collection concludes with a list of all known medieval European astrolabes, ordered chronologically by region. Three landmark astrolabes are discussed: (1) the earliest known European astrolabe from 10th-century Catalonia, that milieu in which the astrolabe first became known to Europeans; (2) an astrolabe from 14th-century Picardy bearing numerals written in monastic ciphers as well as a later dedication mentioning two friends of Erasmus; (3) the splendid astrolabe presented in 1462 by the German astronomer Regiomontanus to his patron Cardinal Bessarion, with its enigmatic angel and Latin dedication, here presented in the context of other astrolabes of similar design from 15th-century Vienna.

Origins and Development of Musical Instruments Jeremy Montagu,2007-10-29 *Origins and Development of Musical Instruments* describes the creation, use, and development of musical instruments from the Old Stone Age to the present day. Musical instruments, from the simplest whistles to the most complex organs, conch trumpets to sousaphones, archers' and musical bows to violins and pianos, the most basic straw reeds to the modern MIDI systems, and pairs of stones struck together to synthesizers, are all described here by instrument collector and expert Jeremy Montagu. Montagu speculates on how these instruments originated in the earliest days of humanity and relates how they moved from one culture to another through history, all the while changing and developing until they became the instruments we know today. The book also surveys the present uses of instruments throughout the world. Each chapter is devoted to a different type of instrument. Intervals and additional sections enhance the volume with information on musicians, the Medieval Renaissance, the ideal accompaniment, archaeology, symbiotic and newly created instruments, classification of instruments, scales and music, and some of the problems of acoustics. This comprehensive volume is illustrated with over 120 photos capturing several hundred instruments from all over the world; many of them from the author's own collection of over 2,500 instruments. A copious bibliography of sources, three indexes, and a series of maps make this a priceless resource.
