The Mental Game of Trading Jared Tendler, 2021-04-09 A step-by-step system for mastering trading psychology. Think about your most costly and recurring trading mistakes. Chances are that they're related to common errors, such as chasing price, cutting winners short, forcing mediocre trades, and overtrading. You've likely tried to fix these errors by improving your technical skills, and yet they persist. That's because the real source of these mistakes is not technical—they actually stem from greed, fear, anger, or problems with confidence and discipline. If you are like most traders, you probably overlook or misunderstand mental and emotional obstacles. Or worse, you might think you know how to manage them, but you don't, and end up losing control at the worst possible time. You're leaving too much money on the table, which will either prevent you from being profitable or realizing your potential. While many trading psychology books offer sound advice, they don't show you how to do the necessary work. That's why you haven't solved the problems hurting your performance. With straight talk and practical solutions, Jared Tendler brings a new voice to trading psychology. In *The Mental Game of Trading*, he busts myths about emotions, greed, and discipline, and shows you how to look past the obvious to identify the real reasons you're struggling. This book is different from anything else on the market. You'll get a step-by-step system for discovering the cause of your problems and eliminating them once and for all. And through real stories of traders from around the world who have successfully used Tendler's system, you'll learn how to tackle your problems, improve your day-to-day performance, and increase your profits. Whether you're an independent or institutional trader, and regardless of whether you trade equities, forex, or cryptocurrencies, you can use this system to improve your decision-making and execution. Finally, you have a way to reach your potential as a trader. Now's the time to make it happen.

Trading Psychology Venetia Zannettis, 2021-11-22 Trading is 80% psychology and only 20% methodical. For this reason, if you aim to make it big in the trading world, your psychology must be in top condition. Trading is a psychological career; therefore, even when you know suitable trading methods, your trading procedures will be in vain if you do not have the excellent psychology to work those proper methods effectively. Thus your bad psychology will sabotage your practical strategies and your overall time in the market. And so, if professional trading is your aim, you must first attain good trading psychology. Apart from psychology, trading is also an emotional career. Many believe trading is a financial game. It is not. Trading is an emotional career with economic consequences. For this reason, learning to control your emotions during stressful, high-risk trades is essential for trading success. A trader requires a healthy balance between the logical thinking part of the brain and the emotional, spontaneous part of the brain. An unequal tilt on either side of the scale will throw a trader's market performance entirely off track. This book shares insight into how to access and use the mechanics of the mind that enable a trader to better deal with trading fear, anxiety, impatience, greed, gambling, bad trading habits, and behaviors, etc. A must-read for every serious trader because before you can master your trade, you must first master your mind.

The Lone Wolf Trader Presents Patrick R Buchanan, 2024-08-03 Patrick Buchanan (AKA 'The Lone Wolf Trader') has returned once again, to help day traders everywhere learn how to FIRE THEIR BOSSES and make a six-figure income on their own terms, using nothing but the power of their own minds. His new book, Mastering the Mental Game will help you take control of the biggest obstacle keeping you from day trading success: your OWN emotions. You've probably heard people say, It's so hard to make money in the stock market! That's the furthest thing from the truth. It's incredibly easy to make money in the stock market every day. BUT... it's also incredibly easy to LOSE money in the market every day. You know what's NOT incredibly easy? Being consistently profitable. Achieving consistency is the biggest challenge for EVERY trader, whether they're trading a \$1,000 account or a \$100,000 account. All traders have winning trades and losing trades. You could decide whether to go long or short on the day by flipping a coin, and you'd be right 50% of the time. But being consistently profitable, day after day-that's the thing that separates the professionals from the amateurs. That's what you want, that's the hardest thing to achieve, and it's also the whole point of this book: HELPING YOU ACHIEVE CONSISTENT DAY TRADING PROFITABILITY BY IDENTIFYING AND ELIMINATING DESTRUCTIVE BEHAVIORS. The thing that keeps you from being consistently profitable in your trading isn't the market 'faking you out', or price slippage on your options contracts, or your technical analysis not being correct (although all those things can negatively affect you and do happen)... it's your own destructive behaviors. Most of the time, the root cause of your trading failures isn't an intellectual problem, it's

an emotional one. It's not a lack of knowledge, but rather a lack of discipline or emotional development that trips you up. Mastering the Mental Game will help you identify some of the most consequential mistakes you can make in your trading, help you determine why you're making those mistakes, and give you some techniques you can use to stop those mistakes from happening time after time. Patrick Buchanan's first book, *Secrets of the Lone Wolf Trader* was a massive success, garnering much critical acclaim for its simplicity, easy to understand trading strategy, and straightforward, real-world, practical advice. That book helped countless aspiring day traders graduate from being complete beginners to successful traders. Mastering the Mental Game continues where that book left off. It's designed for people who are already trading, but looking for techniques to navigate the many pitfalls that keep them from achieving consistency on a daily basis. Learn how to overcome fear, greed, and many other destructive emotions & behaviors that wreak havoc on your daily trades. Learn how to MASTER THE MENTAL GAME.
