Dispensación de productos farmacéuticos MORENO VALDERREY, CRISTINA, 2014-05-01 Este libro está dirigido al alumnado del segundo curso del Ciclo Formativo de Grado Medio que conduce a la obtención del título de Técnico en Farmacia y Parafarmacia perteneciente a la familia profesional de Sanidad. Los contenidos de esta obra están basados en la normativa vigente, al amparo del Real Decreto 1689/2007, de 14 de diciembre, por la que se establece el título de Técnico en Farmacia y Parafarmacia y se fijan sus enseñanzas mínimas. El Técnico en Farmacia y Parafarmacia dispensa diariamente diferentes tipos de medicamentos y productos sanitarios, y puede trabajar tanto en oficinas de farmacia como en hospitales y almacenes de medicamentos. Este libro desarrolla los conceptos básicos sobre principios activos utilizados en el tratamiento de diferentes patologías y la forma de dispensarlos respetando la legislación vigente. *Dispensación de productos farmacéuticos* es una obra dividida en 15 Unidades entre las que se incluyen: tipos de medicamentos, su dispensación con/sin prescripción médica, fitoterapia, homeopatía, veterinaria y el trabajo que se realiza en un hospital. Además, hay otras Unidades específicas que ayudarán a comprender cómo se diseña y formula un medicamento, cómo llega al mercado, las condiciones legales para ser dispensado, el momento de la dispensación, la atención al cliente y cómo tomarlo adecuadamente para que finalmente ejerza su acción en el paciente. En cada Unidad hay actividades propuestas, casos prácticos, actividades de comprobación para repasar y de ampliación y de aplicación para afianzar conocimientos, imágenes reales de hospitales y farmacias, enlaces a páginas web de interés, resúmenes y mapas conceptuales. Además, a través de códigos QR que convierten el texto plano del papel en hipertexto (semejante al proporcionado por las páginas web), se puede acceder a las enormes posibilidades de la red desde un smartphone. En definitiva, por la actualización y amplitud de sus contenidos, este libro puede ser utilizado tanto por los alumnos como por el personal que trabaja con medicamentos. Además, también puede ser de ayuda para cualquier otra persona que esté interesada en adentrarse en este campo.

Oficina de farmacia CASTELLANA PERELLÓ, CONCEPCIÓN, 2015-01-01 Este libro está dirigido a los alumnos del Ciclo Formativo de grado medio que conduce a la obtención del título de Técnico en Farmacia y Parafarmacia, perteneciente a la familia profesional de Sanidad, teniendo en cuenta el Real Decreto 1689/2007, de 14 de diciembre, de enseñanzas mínimas, y la Orden EDU/2184/2009, de 3 de julio, por la que se establece el currículo del título correspondiente. Desarrolla los contenidos del módulo profesional de Oficina de Farmacia, que se han adaptado para abarcar los currículos de cada una de

las comunidades autónomas según la normativa vigente. La obra se estructura en nueve unidades, cuyo estudio permitirá al alumno conocer, ya en las primeras, cómo se enmarca la farmacia y el medicamento dentro del sistema sanitario español y los distintos establecimientos y servicios de dispensación de medicamentos. A continuación, prosigue la explicación de los aspectos organizativos de los locales destinados a las oficinas de farmacia y el personal que trabaja en ellas. El funcionamiento de la farmacia se aborda posteriormente con la exposición de los tipos de proveedores, la gestión de compras y los documentos que genera, la gestión de stocks y del almacén de productos farmacéuticos y parafarmacéuticos y, también, las características y la gestión de las recetas médicas, incluida la receta electrónica. Los contenidos finalizan con las unidades dedicadas a la explicación de la utilización real del software de gestión de la farmacia mediante la utilización de capturas de pantalla reales de dicho programa. Por último, la utilización básica del programa de gestión se amplía en la unidad final, en la que además se exponen los aspectos básicos del significado de las tecnologías de la información y la comunicación (TIC) y su utilización en la farmacia. Asimismo, cada unidad incluye variadas actividades propuestas y gran número de imágenes, tablas y esquemas que ilustran los contenidos, además de cuadros de información adicional, útiles enlaces a páginas web de interés para ampliar conocimientos, cuadros de conceptos clave de la unidad, y también un práctico resumen y un mapa conceptual que facilitan el repaso. Por último, al concluir cada unidad, se ofrecen actividades finales de comprobación, refuerzo y ampliación de conocimientos.

Los umbrales de la locura Sociedad de historia y filosofía de la psiquiatría. Jornadas, 2012 El libro aborda la difícil cuestión de saber dónde está el umbral de la normalidad. Aquel que bajo el lema de dejar toda esperanza delimita las fronteras de lo que convencionalmente llamamos cordura y permite analizar cuándo una mera convención social estigmatiza. El libro supone un recorrido desde los límites psico(pato)lógicos de la creatividad artística hasta las formas de entrada en la demencia. Así, determinados estados mentales de muchos creadores nos llevan a cuestionar la noción social de normalidad, pues es una presunta anomalía la que confiere el aura al trabajo artístico, literario o filosófico. Desde una perspectiva psiquiátrica se plantea el tema de estas manifestaciones en patobiografías -los casos de Santa Teresa o de Nietzsche son ilustrativos- y se analiza el sutil umbral que configuran una serie de síntomas. Es el caso de la extrañeza, apatía o disociación. Todos ellos pueden ser considerados síntomas blandos (bisagra), pero entrañan un gran interés clínico. A ello hay que añadir el papel que juega la conciencia o insight en la enfermedad, el continuum de determinados fonemas alucinatorios, amén de la consideración de determinados síndromes como el de Munchausen o las connotaciones médico-legales de casos clínicos paradigmáticos.
