Spanish Tourism Geographies Asunción Blanco-Romero, Macià Blázquez-Salom, 2023-09-30 This book provides an overview of the progress in Spanish tourism geography, particularly after the overlay of financial, pandemic and climate crisis, by the scrutiny of the different geographical areas and variables of analysis. It shows the diversity of geographical environments and their varied relationship with tourism, from the emptied inland regions to urban heritage in historic centres to coastal resorts. The book also introduces the analysis of the most important variables when studying the implications of Spanish tourist specialization. How are the beaches with intensive tourist use managed? What socio-spatial processes do leisure-rooted migrations involve? What are the labour conditions in the Spanish tourism industry? How does saving water boost tourism growth? The book offers answers through a methodological specificity of Spanish geography, which is highly oriented towards the analysis of public policies and even the proposal of new planning and methodology formulas that go beyond diagnostic studies. The domestic perspective, or that of insiders, of these scientists residing in Spain bestows them with special codes for conducting interpretations and analyses based on their everyday proximity to a territory characterised by its intense touristification. The tourism and real estate specialisation that Spanish society, together with its territory and institutions, have forged since the beginning of “developmentalism” permeates this scientific analysis. By providing a strong conceptual and empirical portrait, this book is a great resource for students and scholars in geography of tourism, as well as for social scientists and policy makers.

Blue Flag Beaches María A. Prats, Fernando Merino, 2023-08-16 This book presents a comprehensive study of the role that the Blue Flag beach program has played around the world, considering economic, social and environmental perspectives. Since its creation in the 1980s, The Blue Flag program awards the management of beaches and marinas based on sustainability, services and quality of their management. To date there are currently close to five thousand awards around the world. Forty years on from the program's creation, this book provides a thorough evaluation of the program, to understand how it has evolved over time, the successes it has enjoyed and the challenges it has overcome, and may face in the future. As an international program, this book reflects the global nature of this program and actively discusses, examines and assesses the different realities and challenges faced by different countries around the world, drawing on case studies from across Europe, North America, Latin America, Africa and Asia. It examines the impact of the award on economic growth, from local to national, environmental protection and education, the development of sustainable tourism, and the sustainable management of beaches. The volume also contributes to emerging debates surrounding the certification of natural resources, where the Blue Flag program has been a pioneer in this field. This book will be of great interest to students and scholars of sustainable tourism, environmental economics, coastal and beach management, environmental conservation and sustainable development.

Metodologías participativas en la enseñanza de la Comunicación Lourdes Martínez Rodríguez,2020-07-01 El actual sistema educativo aboga por métodos de enseñanza-aprendizaje basados no solo en la asimilación de conocimientos, sino también en el desarrollo de competencias específicas y transversales. En este contexto, la adquisición de competencias comunicativas es un requisito esencial en cualquier nivel formativo, y es aquí donde las metodologías participativas ocupan un papel fundamental. Este tipo de metodologías abarcan iniciativas muy diversas -aprendizaje experiencial, simulaciones, aprendizaje basado en proyectos, aprendizaje-servicio, etc.-, que potencian la participación activa del alumno en proyectos de aula o en entornos reales y permiten acercarse a la realidad social y profesional. En este libro, de autoría colectiva, se presentan diversas experiencias de innovación docente basadas en metodologías participativas, desarrolladas en distintas áreas de los grados de Comunicación. Se plantean nuevos enfoques en la formación de los futuros profesionales de Periodismo, Comunicación Audiovisual, Publicidad y Relaciones Públicas, y Documentación y se aporta una mirada comunicativa a otras disciplinas como la Filosofía. A lo largo de los capítulos, se detallan proyectos de aprendizaje en el entorno real que fomentan la creatividad y el trabajo colaborativo; se apuesta por el desarrollo de formatos audiovisuales, por el cine cooperativo, por el uso del blog y del podcast en el entorno educativo; se impulsa la elaboración de contenidos accesibles a estudiantes con discapacidad y se propone construir espacios de conocimiento compartidos con comunidades sociales. Se abordan, además, aspectos relevantes para adecuar la formación a las demandas del mercado laboral, como el bilingüismo o las competencias digitales. Buena parte de estas experiencias participativas pueden tener su réplica en otras áreas de conocimiento y pueden adaptarse a otros niveles educativos.
