The Braided World Kay Kenyon, 2008 When you get a message from deep space, should you answer? Earth has cause to believe that the universe is not a friendly place. But one woman, a singer well past her performance years, and seeking one last adventure, funds the mission that will accept an ambiguous invitation. . . to the stars. Bailey Shaw chooses the young and untested Anton Prados to lead the interplanetary expedition. But when they make first contact with the alien Dassa, she and Anton receive a troubling reception. The Dassa appear human. But they are badly altered humans, and the crew increasingly finds them disturbing, even revolting. And the Dassa in turn are appalled by them. As Bailey makes inroads with the commoners and Anton navigates the intrigues at court, the clash between the cultures escalates, bringing the crew, one by one, to the most difficult choice of their lives. To survive, they must unravel the mystery of the Dassa, and of human--and alien--existence.

The Seeds of Time Kay Kenyon, 2011 Time travel was never like this--tied to the motions of the stars, a short cut across the galaxy, and--if you're a rare Dive pilot--a chance to be a hero. Clio Finn is one of these, a space pilot on the run from a dystopian and graying Earth toward the only future she ever wanted: the stars. Problem is, she's on the razor edge of burnout. Next stop: a labor camp in dictatorial America. Clio might be in it for escape, for adventure, but there's also that hero thing. Her mission: to retrieve viable biota to reseed the Earth. Now, a long way from home, she's found the jackpot, a lush paradise, with plant life so vital, its seeds could give Earth a second chance, or--as her enemies believe--seal its

destruction. But she's determined to bring her payload home. It's Clio Finn's last Dive. It's Earth's last chance.

Tropic of Creation Kay Kenyon, 2011 Half of known space is littered with the skeletons of metal and bone from thirty years of war with the ahtra, humanity's implacable enemy. Now, Captain Eli Dammond has landed on a deserted planet to rescue survivors of a crashed space ship. On this routine mission, Eli has in his charge Sascha, the fourteen-year-old granddaughter of a general. But the planet is not what it seems. It is about to undergo a radical seasonal change, one that will hatch monstrous, rapacious creatures. There are few refuges from the rampaging alternate season. One is in the secret ahtran habitat far underground. It's no place for a human army officer, as Eli will learn. The other is in the most unlikely of places: the nests of the monsters themselves. Not that the intrepid Sascha ever had a choice. As her time runs out, Eli must break free of his ahtran captors and return to the surface before his crew is wiped out and Sascha is forever changed.

Maps in a Mirror Orson Scott Card, 2009-11-30 Maps in a Mirror brings together nearly all of Orson Scott Card's short fiction written between 1977 and 1990. For those readers who have followed this remarkable talent since the beginning, here are all those amazing stories gathered together in one place, with some extra surprises as well. For the hundreds of thousands who are newly come to Card, here is chance to experience the wonder of a writer so versatile that he can handle everything from traditional narrative poetry to modern experimental fiction with equal ease and grace. The brilliant storytelling of the Alvin Maker books is no accident; the breathless excitement evoked by the Ender books is not a once-in-a-lifetime experience. In this enormous volume are forty-six stories, plus ten long, intensely personal essays, unique to this volume. In them the author reveals some of his reasons and motivations for writing, with a good deal of autobiography into the bargain. One of the genre's most convincing storytellers. An important volume.--Library Journal At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Extraterrestrial Altruism Douglas A. Vakoch, 2013-09-14 Extraterrestrial Altruism examines a basic assumption of the Search for Extraterrestrial Intelligence (SETI): that extraterrestrials will be transmitting messages to us for our benefit. This question of whether extraterrestrials will be altruistic has become increasingly important in recent years as SETI scientists have begun contemplating transmissions from Earth to make contact. Technological civilizations that transmit signals for the

benefit of others, but with no immediate gain for themselves, certainly seem to be altruistic. But does this make biological sense? Should we expect altruism to evolve throughout the cosmos, or is this only wishful thinking? Is it dangerous to send messages to other worlds, as Stephen Hawking has suggested, or might humankind benefit from an exchange with intelligence elsewhere in the galaxy? Would extraterrestrial societies be based on different ethical principles, or would we see commonalities with Earthly notions of morality? Extraterrestrial Altruism explores these and related questions about the motivations of civilizations beyond Earth, providing new insights that are critical for SETI. Chapters are authored by leading scholars from diverse disciplines—anthropology, astronomy, biology, chemistry, computer science, cosmology, engineering, history of science, law, philosophy, psychology, public policy, and sociology. The book is carefully edited by Douglas Vakoch, Director of Interstellar Message Composition at the SETI Institute and professor of clinical psychology at the California Institute of Integral Studies. The Foreword is by Frank Drake. This interdisciplinary book will benefit everybody trying to understand whether evolution and ethics are unique to Earth, or whether they are built into the fabric of the universe.

Casket of Souls Lynn Flewelling, 2012-05-29 The Nightrunners are back in this gripping novel full of Lynn Flewelling's trademark action, intrigue, and richly imagined characters. More than the dissolute noblemen they appear to be, Alec and Seregil are skillful spies, dedicated to serving queen and country. But when they stumble across evidence of a plot pitting Queen Phoria against Princess Klia, the two Nightrunners will find their loyalties torn as never before. Even at the best of times, the royal court at Rhíminee is a serpents' nest of intrigue, but with the war against Plenimar going badly, treason simmers just below the surface. And that's not all that poses a threat: A mysterious plague is spreading through the crowded streets of the city, striking young and old alike. Now, as panic mounts and the body count rises, hidden secrets emerge. And as Seregil and Alec are about to learn, conspiracies and plagues have one thing in common: The cure can be as deadly as the disease.

Rift Kay Kenyon, 2011 Human colonists have terraformed the planet Lithia, but now the green biosphere is unraveling. In its place is the old Lithia, toxic to some, preferable to others, including the orthong. Aliens. Monsters, some say. Finding himself marooned on Lithia, young Reeve Calder is determined to make a home--even rebuild the planet. But he is a newcomer, soon to encounter the powerful forces already embedded in the transforming ecology. There are the savage colonists, inhabiting the ruins of vanished power. There are the Somaformers, a doomsday cult tampering with adaptive genes. There is Loon, a feral girl who leads the marooned group by her mad, internal compass. There is Nerys, a young woman enslaved by the orthong, and determined to rise in their ranks. Driven by a whispered clue from a dying man, Reeve and his companions must reach the great rift valley where the final reckoning awaits, one that will decide world dominance--or an unthinkable world cataclysm.

The Lost Gate Orson Scott Card, 2011-01-04 Orson Scott Card's The Lost Gate is the first book in the Mithermages series from the New York Times bestselling author of Ender's Game. Danny North knew from early childhood that his family was different, and that he was different from them. While his cousins were learning how to create the things that commoners called fairies, ghosts, golems, trolls, werewolves, and other such miracles that were the heritage of the North family, Danny worried that he would never show a talent, never form an outself. He grew up in the rambling old house, filled with dozens of cousins, and aunts and uncles, all ruled by his father. Their home was isolated in the mountains of western Virginia, far from town, far from schools, far from other people. There are many secrets in the House, and many rules that Danny must follow. There is a secret library with only a few dozen books, and none of them in English — but Danny and his cousins are expected to become fluent in the language of the books. While Danny's cousins are free to create magic whenever they like, they must never do it where outsiders might see. Unfortunately, there are some secrets kept from Danny as well. And that will lead to disaster for the North family. The Mosaic of Atonement Joshua M. McNall, 2019-08-27 The Mosaic of Atonement offers a fresh and integrated approach to historic models of atonement. While modern treatments of the doctrine have tended toward either a defensive hierarchy, in which one model is singled out as most important, or a disconnected plurality, in which multiple images are affirmed but with no order of arrangement, this book argues for a reintegration of four famous pieces of atonement doctrine through the governing image of Christ-shaped mosaic. Unlike a photograph in which tiny pixels present a seamless blending of color and shape, a mosaic allows each piece to retain its recognizable particularity, while also integrating them in the service of a single larger image. If one stands close, one can identify individual squares of glass or tile that compose the greater picture. And if one steps back, there is the larger picture to be admired. Yet in the great mosaics of age-old Christian churches, the

goal is not for viewers to construct the image, as in a puzzle, but to appreciate it. So too with this mosaic of atonement doctrine. While no one model is set above or against the others, the book notes particular ways in which the pieces--the feet, heart, head, and hands--mutually support one another to form a more holistic vision of Christ's work. This is my body, Jesus said to his followers, and by reintegrating these oft-dismembered aspects of atonement, we will note fresh ways in which it was given for us.

The Hive Orson Scott Card, Aaron Johnston, 2019-06-11 New York Times bestselling authors Orson Scott Card and Aaron Johnston return to the prequels to Ender's Game following *The Swarm* with *The Hive*, book two in the Second Formic War. Card and Johnston continue the fast-paced hard science fiction history of the Formic Wars—the alien invasions of Earth's Solar System that ultimately led to Ender Wiggin's total victory in Ender's Game. A coalition of Earth's nations barely fought off the Formics' first scout ship. Now it's clear that there's a mother-ship out on edge of the system, and the aliens are prepared to take Earth by force. Can Earth's warring nations and corporations put aside their differences and mount an effective defense? Ender's Game is one of the most popular and bestselling science fiction novels of all time. Shadows in Flight Orson Scott Card, 2012-01-17 Ender's Shadow explores the stars in this all-new novel... At the end of *Shadow of the Giant*, Bean flees to the stars with three of his children--the three who share the engineered genes that gave him both hyper-intelligence and a short, cruel physical life. The time dilation granted by the speed of their travel gives Earth's scientists generations to seek a cure, to no avail. In time, they are forgotten--a fading ansible signal speaking of events lost to Earth's history. But the Delphikis are about to make a discovery that will let them save themselves, and perhaps all of humanity in days to come. For there in space before them lies a derelict Formic colony ship. Aboard it, they will find both death and wonders--the life support that is failing on their own ship, room to grow, and labs in which to explore their own genetic anomaly and the mysterious disease that killed the ship's colony. *Shadows in Flight* is the fifth novel in Orson Scott Card's Shadow Series. Off the Main Sequence Tom Easton,2006-10-01 Tom Easton has served as the monthly book review columnist for Analog Science Fiction for almost three decades, having contributed during that span many hundreds of columns and over a million words of penetrating criticism on the best literature that science fiction has to offer. His reviews have been celebrated for their wit, humor, readability, knowledge, and incisiveness. His love of literature, particularly fantastic literature, is everywhere evident in his essays. Easton has ever been willing to cover small presses, obscure authors, and unusual publications, being the only major critic in the field to do so on a regular basis. He seems to delight in finding the rare gem among the backwaters of the publishing field. A reviewer's job, he says, is not to judge books for the ages, but to tell readers enough about a book to give them some idea of whether they would enjoy it. And this he does admirably, whether he's discussing the works of the great writers in the field, or touching upon the least amongst them. This companion volume to Periodic Stars (Borgo/Wildside) collects another 250 of Easton's best reviews from the last fifteen years of The Reference Library. No one does it better, and no other guide provides such lengthy or discerning commentary on the best SF works of recent times. Complete with Introduction and detailed Index.
