Heaven on Earth L. S. Fauber, 2019-12-03 Before the invention of the telescope, people used nothing more than their naked eye to fathom what took place in the visible sky. So how did four men in the 1500's, though of different nationality, age, religion, and class, collaborate to discover that the Earth revolved around the Sun? With this radical discovery that went against the Catholic Church, they created our contemporary world—and with it, the uneasy conditions of modern life. *Heaven on Earth* is an intimate examination of a scientific family—that of Nicolaus Copernicus, Tycho Brahe, Johannes Kepler, and Galileo Galilei. Fauber juxtaposes their work with insight into their personal lives and and political considerations, which in turn shaped their pursuit of knowledge. Uniquely, he shows how their intergenerational collaboration was actually what made the scientific revolution possible. Contrary to the competitive nature of research today, collaboration was key to early discoveries. These men related to one another via intellectual pursuit rather than blood, calling each other “brothers,” “fathers,” and “sons. Filled with rich characters and sweeping history, *Heaven on Earth* reveals how the connection between these pillars of intellectual history moved science forward—and helped usherd the world into modernity.

The Secrets of Humankind by Divine Design: the gateway to mindfulness and self awareness Eleazar Ben Michael,2022-03-06 The Eternal Destiny of Human Life covers the subject of what happens after humankind departs from this world. According to the Bible, only two men have lived on this earth without physical death, Enoch and Elijah, the prophets. But many religions and cultures believe in some afterlife. You may ask: Do humans re-incarnate or roam around as free spirits in the afterlife? Do people become ghosts of the dead after they pass to the other side? And if “yes” or “no,” how do we know this as fact? We may have asked ourselves: who are the so-called “dead people” or “spirit people” seen here on earth during séances? Are they “actually deceased persons” or “spirit actors,” or are “the imitators of the dead”? This volume will help answer many of these questions in ways that may interest you. It is a guidebook on the soul trilogy and the physics of immortality. Again, what constitutes the “tunnel of light” commonly reported by those who have experienced near-death phenomena? If you were the historical Jesus, who came to save the world from sin, sickness, and satanic bondage, will you not tell men and women about the afterlife? This book will reveal some unique information about the eternal destiny of the soul and the spiritual universe the way you perhaps have never read in any book. This material will help readers find some answers to these questions and much more. It is a must-read book that covers every aspect of afterlife experiences. We have looked at the subject from various Christian, Jewish, mystical, and secular viewpoints and find where the correct answers are seekers of truth. Only God knows the ultimate truth on this subject matter, and his divine authority and views are what we must all accept because he is our creator. Now in light of these facts, we must have an open mind as David Scot said: Truth is never afraid of the fullest investigation (David Walman Scot)

Best of its kind and fully sourced, the book also covers modern topics such as “Bitcoins”, “Digitalization”, “Sustainability” or “Fake News” and

includes a large number of quotations never published before.

Quotationary - The A-Z Book of Quotations Nasser Amiri,2024-06-27 Compiled over many years by Nasser Amiri, this is by far the most comprehensive collection ever compiled of carefully selected quotations from the world's great philosophers, writers, historians, musicians and thinkers. Quotationary is a source of inspiration for every writer, book-lover and thinker. It contains the thoughts of many of the finest minds since ancient man started to express his wit and wisdom in aphoristic form. It is inspirational, instructive, amusing and literary; alongside a dictionary and thesaurus it is a must-have purchase for any author, writer, journalist or anyone working with words.

The Wormwood Prophecy Thomas Horn,2019 Is the star from Revelation 8 already headed toward Earth? What's more, do government officials already know the answer to that question? Traditional scholarly interpretation claims that the Wormwood star will be an asteroid. Others postulate that it will poison one-third of all of Earth's waters--and we may not even notice it! Others believe the star could hit without returning, like an angel of God appearing in the sky with fire and light, bringing judgement in an instant. Do prophecies from ancient cultures and religions across the globe point to this catastrophe? Have scientists and politicians taken extreme measures to keep this under the public radar? Is this why President Donald Trump sanctioned a colossal increase to planetary defense? Follow Thomas Horn as he blazes through these questions and many others, posing answers that few in the church today are willing to provide--Back cover.

Thinking Physics This Way Kapur Mal Jain,2015-01-13 The book gives an account of the inspirations that initiated the enquiry into the physical world and its evolution as a discipline. Simultaneously, it motivates the reader to step ahead with a little dismay to undertake a journey in the astonishing world of physics. It starts with the observation of nature and posits the questions which kept perplexing the mind of great physicists of our time. In finding answers, it verily explores the relationship of the observer with the object. And while so doing it catapults the readers into the bizarre world of natural laws, equations, hypothesis, and theorems. The presentation reserves its difference unlike books published these days in the treatment of the subject without involving mathematics or without making tall claims of seeking wishful comparison between science and religion. On the other hand, it paves way to a systematic shift from traditional approach to newer and broader similarities between physical and the mental realities. This effort gleans out a humane paradigm from where we see our known world in new light. Therefore, it asks for a limpid mind to welcome one into the world of physics. This book presents physics not only as technology booster but also as life builder.

Terracene Salar Mamani,2023-08-04 In *Terracene* Salar Mamani historicizes the popularization of the scientific notion of the Anthropocene alongside the emergence of the global war on terror. Mamani theorizes the Terracene as an epoch marked by a convergence of racialized militarism and environmental destruction. Both the Anthropocene and the war on terror centered the antagonist figures of the Anthropos and the terrorist as responsible for epochal changes in the new geological

and geopolitical world orders. In response, Mameni shows how the Terracene requires radically new engagements with terra (the earth), whose intelligence resides in matters such as oil and phenomena like earthquakes and fires. Drawing on the work of artists whose practices interrogate histories of settler-colonial and imperial interests in land and resources in Iran, Iraq, Yemen, Kuwait, Syria, Palestine, and other regions most affected by the war on terror, Mameni offers speculative paths into the aesthetics of the Terracene.

Raising Abel Ronald Ragotzy MD, 2012-12-06 Raising Abel assumes that the Bible would not bother telling us about a cunning serpent, a murderous brother, or a resinous gopher tree, if they didn't have something to do with the deeper topic of faith. After all, isn't the Bible the authority on faith? Raising Abel explores the most familiar chapters of Genesis, not as a collection of stories of the beginning of time, but as our first and best guide to the subject of faith. The author, as a physician, explains faith within the framework of wellness, dividing the Genesis stories into four parts that answer four questions. The Premise: What does healthy faith look like? (Genesis 12) The Problem: What can cause this healthy state to become diseased? (Genesis 35) The Prescription: What medicine is needed to restore us to a healthy faith? (Genesis 69:17) The Practice: What must we do to maintain this healthy faith? (Genesis 9:18-11) Raising Abel reassures us that there is something greater than a perfectly good world; it is an imperfect world plus faith. In a perfect world there would be no need of faith. Get ready to experience faith in a whole new light!

The Catholic Church & Science Benjamin Wiker, 2011-03 Were the Middle Ages dark for science? Did the pope say Darwin was right? From the Big Bang to Galileo, from the origins of life on Earth to the existence of life on other planets, The Catholic Church and Science clears away the fog of falsehood and misunderstanding to reveal a faith whose doctrines do not contradict the facts of science, but harmonize with them and a universe whose uncanny order and precision point not to chance assemblage by random forces, but to the purpose-built design of an intelligent creator. Author Ben Wiker (The Darwin Myth, A Meaningful World) takes on the most common errors that modern materialistic thinkers, convinced that faith and science must be mortal enemies, have foisted into popular culture. With great learning, clarity, and wit he tackles stubborn confusions many people have about the relationship between Christianity especially Catholicism and the empirical sciences, and separates truth from lies, the factual from the fanciful.
