Sustainable Development and Resilience of Tourism Deepak Chhabra,Navin Atal,Alka Maheshwari,2024-08-29 This volume examines progress in sustainable and resilient development of niche forms of tourism from a health and wellbeing perspective. It also aims to offer deep and innovative insights on the supporting role of non-pharmaceutical interventions to enhance resilience and wellbeing of visited and visiting communities. A comparative and critical discourse of the role of hard medicine is also offered, from both a core and supplementary perspective, particularly, from eudaimonic and physiologically restorative standpoints. Furthermore, indigenous non-pharmaceutical interventions and spiritual healing mechanisms are discussed in the context of their potential to facilitate long term immunity and happiness. The book conceptually situates health as a fourth pillar of sustainability, and examines its role in stimulating long-lasting transformations rooted in positive psychology, inner transformation and sustainable consumption of organic products and services. It designs an evolving transformational 'Quality of Life' paradigm that strengthens the foundations of health/wellbeing-based sustainable

development initiatives and resilience of tourism systems. The work will be of interest to academic, professional, and various public and private stakeholders of tourism such as destination marketing organizations, policy makers, hospitality industries, tour operators, host communities, NGOs, and government agencies.

Tourism Theory Guilherme Lohmann, Alexandre Panosso Netto, 2016-12-07 Theories within tourism can be difficult, even confusing areas to understand. Developed from the successful Portuguese textbook *Teoria do Turismo*, *Tourism Theory* provides clear and thorough coverage of all aspects of tourism theory for students and researchers of tourism. Consisting of five sections and over fifty entries, this book covers nine of the most important models in tourism study. The first three sections examine general concepts in tourism; disciplines and topics; and the tourist, which includes areas such as demand, gaze, psychology and typologies. A fourth section covers intermediation, distribution and travel, reviewing aspects such as travel agencies, tourist flows and multi-destination travel patterns. The final section encapsulates the tourism destination itself, covering organizations, the destination image, supply, seasonality and more. Encyclopedic cross-referencing between entries makes navigation easy, while in-depth analysis, exercises and further reading suggestions for each of the selected areas provide the context and detail needed for understanding. Entries can be used individually as a reference, or as part of the whole for a complete introduction to tourism theory.

Accessible Tourism Dimitrios Buhalis, Simon Darcy, 2011 Inclusion, disability, an ageing population and tourism are increasingly important areas of study due to their implications for both tourism demand and supply. This book therefore sets out to explore and document the current theoretical approaches, foundations and issues in the study of accessible tourism. In drawing together the contributions to this volume the editors have applied broader social constructionist approaches to understanding the accessible tourism phenomena. Accessible tourism, as with any area of academic study is an evolving field of academic research and industry practice. As with other areas of tourism, the field is multidisciplinary, and is influenced by various disciplines including geography, disability studies, economics, public policy, psychology and marketing. As one would expect from two scholars at the height of their academic abilities, Dimitrios Buhalis and Simon Darcy have delivered a timely and much needed contribution to the under-served area of accessible tourism. Harnessing the best conceptual developments on the topic, *Accessible Tourism* is a scholarly yet hugely readable collection and readily communicates the various contributors' passion for and command of their subject. This collection is a must have text for anyone engaged in the theory, practice and policy of accessible tourism and will be essential reading on undergraduate and postgraduate courses across a range of disciplines and fields. I cannot speak highly enough of this endeavour and I'm sure it will take accessible tourism and universal design debates into the mainstream of academic enquiry and industry practice. Professor Nigel Morgan, The Welsh Centre for Tourism Research, University of Wales Institute, Cardiff, Wales

Tourism Economics and Policy Larry Dwyer, Peter Forsyth, Wayne Dwyer, 2020-01-14 Since the publication of the first edition of this seminal textbook, the tourism economics landscape has undergone many changes. In this concise revised edition, the authors have incorporated new approaches and ideas influencing tourism economics and policy. It also includes new material on surface and marine transport, resident quality of life issues, the price mechanism, the economic contribution of tourism, tourism and economic growth, and tourism and sustainable development. It remains an important and accessible text for students, researchers and practitioners in tourism economics and tourism policy.

Tourism and the Implications of Climate Change Christian Schott, 2010-12-03 Provides a platform for knowledge exchange between different disciplines and for learning from both theory and practice in the context of tourism and climate change. This book examines subjects as diverse as: the European hotel sector; the North American cruise tourism industry; and, New Zealand youth hostels and campervans.
