Critical Neurodiversity Studies Jenny Bergenmar, Louise Creechan, Anna Stenning, 2025-07-10 This landmark volume for neurodiversity studies introduces a new, more inclusive field of scholarship for literary and cultural studies. Bringing together scholars and writers from across Europe, it explores the revolutionary potential of neurodivergent scholarly practice and demonstrates that there is no such thing as a 'normal' response to cultural production. Drawing on critical disability studies to highlight the ideology behind dominant notions of ability, it moves beyond representations of neurodivergent characters and highlights the entanglement of sensory and cognitive difference with both cultural practices and social status. Combining the recent turn towards psychiatric depathologisation with insights from feminist, queer, intersectional and critical race theory, this volume aims to amplify the epistemic authority of those who have been subject to marginalisation because of the ways we are taught to read, and value literary culture. In essence, this volume reveals what it means to read, write and love literature and the arts as a neurodivergent person.

Neurodiversity-Affirming Therapy: What Every Mental Health Provider Needs to Know Amy

Marschall,2025-04-15 An essential guide to the paradigm shift required to empower your neurodivergent clients Many mental health professionals are learning to recognize the ways in which neurodivergence can be part of someone's identity, rather than a disability. While many neurodivergent individuals have unique support needs, they are not broken, nor do they need to be cured of their neurodivergence. This neurodiversity-affirming model of care is not a specific set of therapeutic interventions, assessments, or steps a clinician must take to fit into a model. Rather, it is an underlying philosophy that recognizes individuals as the experts on their own lived experience, who can collaborate with mental health professionals to improve this experience. Those who want to support neurodivergent clients will learn the historical, practical, and clinical contexts of neurodiversity-affirming care. Reaching beyond autism (what many people exclusively associate with the term "neurodiversity"), the book encompasses the wide spectrum of differences in brain function and behavioral traits that form part of the human experience, and which include ADHD, dyslexia, and certain trauma responses and forms of anxiety. The book explores the nuances of affirming care in practice and the considerations that any provider should be aware of when working with neurodivergent clients. Everyone deserves appropriate support and freedom from the expectation to conform to neurotypical standards; with this trailblazing guide, clinicians can take the first, crucial steps towards meeting their neurodivergent clients' needs.

Talking the Talk About Autism Haley Moss,2024-11-21 As autistic self-advocates, our personal stories hold a lot of

power: they are sources of strength, tales of overcoming barriers and adversity, and a way for us to assert agency and receive the support we might need. But how do you actually disclose your diagnosis? How do you tell teachers, support staff, colleagues, friends, or anybody else about your disability and account for their varied reactions? Or, if you're a parent or ally, how do you tell the person you're supporting about their own neurodivergent identity and culture? Disclosure is often a

thorny topic, but in this powerful and supportive book, Haley Moss explores the language, history, and stigmas that influence how people perceive autism, breaking down ways to approach conversations about neurodivergence in different contexts. By deconstructing fears around disclosure, *Talking the Talk About Autism* shows how the experience can be made more impactful, safe, and less nerve-wracking for all those involved.

Exploring Autistic Sexualities, Relationality, and Genders Hanna Bertilsdotter Rosqvist, Anna Day, Meaghan Krazinski, 2024-09-26 This edited collection of contributions explores non-normative genders, sexualities, and relationality among Autistic people. Written within an explicitly neuro-affirmative frame, the collection celebrates the diversity and richness of Autistic identity, sexuality, gender, and relationships, exploring areas such as consent, embodiment, ink, kink, sex education, and therapeutic work. All editors and contributors are neurodivergent and members of the communities that the book focuses on, providing an authentic and unique exploration of gender, sexuality, and relationality in Autistic people by Autistic/other neurodivergent authors. The book is primarily intended for postgraduate students and academics across disciplines including sociology, social work, psychology, disability studies, inclusive and special education, and sexual education. Mental health professionals and educators will also find it a useful resource to support their Autistic clients as well as developing their own understanding about how to support Autistic people in a neurodiversity-affirming, kink-affirming, LGBTQ+, and gender-variant way.

The Book of Ghouls David Hambling, C. T. Phipps, Matthew Davenport, Eric Malikyte, Philip Hemplow, 2024-12-24 Ghouls have a special place in the works of H.P. Lovecraft, as the monstrous eaters of the dead are the only creatures from traditional folklore to stalk through his Mythos. Lovecraft's universe was science fictional rather than fantastic, and his nightmare creations were alien rather than supernatural. While his ghouls were inspired by a fascination with the Arabian Nights, they have an added dimension of horror: they were once human. In The Book of Ghouls, five Neo-Mythos writers

known for cosmic horror explore Lovecraftian ghouls' sinister, cannibalistic relationship with humanity: C.T. Phipps (Cthulhu Armageddon), Matthew Davenport (The Adventures of Andrew Doran), David Hambling (the Harry Stubbs series), Eric Malikyte (Mind's Horizon), and Philip Hemplow (Sarcophagus, Exoteric). In this volume you will meet with ghouls everywhere from the steamy jungles of the Vietnam war to the refined air of Arkham's high society, from a bizarre festival on a remote Scottish island to small town America, and from 1920s South London to the mystical Dreamlands. The Book of Ghouls is the latest in the acclaimed Books of Cthulhu series inviting you to face the terrifying creatures that lurk just beyond the edge of human understanding.

The Neurodivergent Job Candidate Marcia Scheiner, Joan Bogden, 2021-11-10 This book provides guidance on recruiting, interviewing, and onboarding practices that will allow employers to successfully hire neurodivergent professionals into inclusive, competitive employment. Today, 35% of 18-year-olds with an autism spectrum diagnosis attend college, yet they have a 75-85% under-employment and unemployment rate after graduation. While organizations are looking to expand their diversity and inclusion hiring efforts to include neurodivergent professionals, current recruiting and interviewing practices in general are not well-suited to this. With over one-third of the US population identifying as neurodivergent, employers need to address how to attract this talent pool to take advantage of a meaningful segment of the workforce. Readers of this book will gain an understanding of how to guide their organizations through the creation of recruiting, interviewing, and onboarding processes tailored to neurodivergent professionals in any field. Written by authors with extensive experience working in the corporate world and consulting with Fortune 1000 companies on autism hiring efforts, this book is targeted at employers, acknowledging their perspective. Structured as a reference guide for busy recruiters, hiring managers, and supervisors, this book can be read in its entirety, in relevant sections as needed, or used as a refresher whenever necessary. This book also provides a background on the thinking styles of autistic individuals, giving the reader a deeper understanding of how to best support neurodivergent jobseekers.
