Cultural-Existential Psychology Daniel Sullivan, 2016-04-06 Bridging cultural and experimental existential psychology, this book offers a synthetic understanding of how culture shapes psychological threat.

Sustainable Cultural Management Łukasz Wróblewski, Ana Gaio, Ellen Rosewall, 2019-12-06 The connections between culture and sustainability have been in the public agenda since the 20th century. However, whilst global sustainability programmes at international institutional levels are yet to recognise the role of culture in their sustainability policies, the bid (albeit failed) in the early 2000s to formally add “culture” to the trilogy of sustainability pillars (economic, social, and environmental) mobilised a new discourse for the reframing of cultural policy narrative, which in turn urged a reassessment of methods of cultural management reflecting the same concerns among the sector’s grassroots. The idea of sustainability and culture working together and their envisioned role in future-proofing society and human development captured the imagination of cultural commentators, policy makers and practitioners alike, keen to fulfil these principles “out there”—in cultural organizations and events mega and small, in cities and regions, local and global. The papers in this Special Issue reflect this appeal. This publication covers a wide selection of issues related to sustainable cultural management, which means that it can be recommended to a varied audience. First of all, it can be recommended to managers experienced in cultural management, where success is measured more by the degree of mission accomplishment and the social benefits achieved rather than by profit. Another group comprises the employees of cultural organizations who want to improve their knowledge of sustainable cultural management. This Special Issue can also be recommended to artists, researchers, students, state and local government employees, founders and patrons of art, and all those who want to understand the importance of sustainable cultural management.

Culture, Innovation and Entrepreneurship Michael Lounsbury, Joep Cornelissen, Nina Granqvist, Stine Grodal, 2021-05-24 Even though the study of innovation and entrepreneurship is a diverse, multi-disciplinary endeavour, the role of culture is often neglected or under-emphasized. Building on the cultural turn that has swept across the social sciences and humanities over the past couple of decades, Culture, Innovation and Entrepreneurship provides cutting-edge theoretical and empirical insights about how culture shapes innovation and entrepreneurship. It features novel contributions that enhance our understanding about a variety of important theoretical issues related to symbolic management, framing, legitimacy, optimal

distinctiveness, institutional logics and the dynamics of cultural entrepreneurship in and across organizations. This book also addresses a diverse range of topics such as the design of craft goods, the creation of the Guggenheim museum, entrepreneurial ecosystems, open innovation, crowdfunding, the mafia and grand challenges. The chapters in this volume will be of interest to a diverse array of scholars, from those interested in entrepreneurship and innovation to cultural studies, contemporary social theory, organization studies and management. The chapters in this book were originally published as a special issue of the journal *Innovation: Organization and Management*.

The Speed of Human and Task Integration in Mergers and Acquisitions Carolin Proft, 2013-12-02 In practice, managers of mergers and acquisitions (M&A) draw their attention more and more to speed of integration within their M&A strategies. In a paradoxical manner, M&A research on speed of integration is still in its infancy and remains underdeveloped. Empirical findings reach from positive over negative to non-significant relationships between speed and M&A success. Carolin Proft develops a research model which encompasses task integration speed and human integration speed as independent variables influencing the dependent variable of M&A performance. She clarifies the question of how the success factor speed can be used as a tool to enhance M&A success. Based on the data collected from 101 German speaking companies she proves that task integration speed negatively influences M&A performance while human integration speed promotes M&A success. The present study is unique as it quantitatively demonstrates that the two types of integration occur at different levels of speed. Therefore, the M&A success significantly depends on the chronology of the two types of integration.

Sustainability or Collapse? Robert Costanza, Lisa J. Graumlich, Will Steffen, 2011-01-21 Scholars from a range of disciplines develop an integrated human and environmental history over millennial, centennial, and decadal time scales and make projections for the future. Human history, as written traditionally, leaves out the important ecological and climate context of historical events. But the capability to integrate the history of human beings with the natural history of the Earth now exists, and we are finding that human-environmental systems are intimately linked in ways we are only beginning to appreciate. In *Sustainability or Collapse?*, researchers from a range of scholarly disciplines develop an integrated human and environmental history over millennial, centennial, and decadal time scales and make projections for the future. The contributors focus on the human-environment interactions that have shaped historical forces since ancient times and discuss such key methodological issues as data quality. Topics highlighted include the political ecology of the Mayans; the effect of climate on the Roman Empire; the revolutionary weather of El Niño from 1788 to 1795; twentieth-century social, economic, and political forces in environmental change; scenarios for the future; and the accuracy of such past forecasts as *The Limits to Growth*.

Repatriation to France and Germany Matthias Walther, 2014-05-19 A significant amount of German and French career agents are involved with international careers. Applying Bourdieu's Theory of Practice, Matthias Walther compares the repatriation of German and French career agents into the external labor markets of their parent country career fields. A qualitative content analysis of 40 semi-structured interviews shows that the German and French career agents' career capital and habitus develops during expatriation, which has an important impact on the re-integration into the parent country career

field. The Author shows that in an international career mobility context, the rules of the game change compared to the rules in a pure national career context, which challenges the pertinence of national career models in understanding repatriation in a Franco-German context.

The Progressive Education Fallacy in Developing Countries Gerard Guthrie, 2011-06-23 This book provides a provocative but carefully argued addition to the theory and practice of education in developing countries. The book provides an ethical and empirical justification for support of formalistic teaching in primary and secondary schools in developing countries. It also refutes the application of progressive education principles to curriculum and pre- and in-service teacher education in such contexts. The central focus of this book is the formalistic teaching prevalent in the classrooms of many developing countries. Formalistic ('teacher-centred', 'traditional', 'didactic', 'pedagogic') teaching is appropriate in the many countries with revelatory epistemologies, unpopular and old-fashioned though these methods may seem in some western, especially Anglophone, ones. Formalism has been the object of many failed progressive curriculum and teacher education reforms in developing countries for some 50 years.

Stubborn Roots Prudence L. Carter, 2012-05-01 What are the features of the school environment that make students' of color incorporation greater at some schools than at others? Prudence L. Carter seeks to answer this basic but bedeviling question through a rich comparative analysis of the organizational and group dynamics in eight schools located within four cities in the United States and South Africa—two nations rebounding from centuries of overt practices of racial and social inequality. *Stubborn Roots* provides insight into how school communities can better incorporate previously disadvantaged groups and engender equity by addressing socio-cultural contexts and promoting cultural flexibility. It also raises important and timely questions about the social, political, and philosophical purposes of multiracial schooling that have been greatly ignored by many, and cautions against narrow approaches to education that merely focus on test-scores and resources. There are simply not enough texts that look comparatively at the two foremost experiments with questions of race, culture, and class in the English-speaking world, the United States and South Africa. Prudence Carter's work is simultaneously scholarly and compassionate. It helps us see, in these two benighted but globally important societies, how easily things break, but also how well, when structures are in place and when human agency takes flight, individuals and the groups to which they belong flourish and grow. - Crain Soudien, Professor of Education, University of Cape Town In this ambitious mixed-method study, Carter analyzes the social and symbolic boundaries that account for disparate educational experiences by race in the United States and South Africa. Resources are only part of the answer; equally important, she argues, are the cultural and institutional conditions that make students feel they are valued contributors of the community. Thus, school policies about hairstyle, dress codes, tracking, extracurricular activities, and language use are among the important dimensions that enable or discourage engagement in students. Educators, policymakers, and scholars alike have much to learn from this agenda-

setting work. -Michele Lamont, Harvard University Author of *The Dignity of Working Men: Morality and the Boundaries of Race, Class and Immigration* Prudence Carter's remarkable book shines a light on the often invisible patterns that perpetuate educational disparity in both the United States and South Africa. *Stubborn Roots* reveals how racial and ethnic divides are often reinforced, even in supposedly 'integrated' schools and even when many people of good will, try to eradicate them. Carter's insights illuminate how educators and schools can address these issues by becoming increasingly attuned to the socio-cultural worlds in which their students live. This book paves the way for the changes needed for historically disadvantaged groups to receive equitable, high-quality educations. -Linda Darling-Hammond, Charles Ducommun Professor of Education, Stanford University

Classification and Multivariate Analysis for Complex Data Structures Bernard Fichet,Domenico Piccolo,Rosanna Verde,Maurizio Vichi,2011-03-04 The growing capabilities in generating and collecting data has risen an urgent need of new techniques and tools in order to analyze, classify and summarize statistical information, as well as to discover and characterize trends, and to automatically bag anomalies. This volume provides the latest advances in data analysis methods for multidimensional data which can present a complex structure: The book offers a selection of papers presented at the first Joint Meeting of the Société Francophone de Classification and the Classification and Data Analysis Group of the Italian Statistical Society. Special attention is paid to new methodological contributions from both the theoretical and the applicative point of views, in the fields of Clustering, Classification, Time Series Analysis, Multidimensional Data Analysis, Knowledge Discovery from Large Datasets, Spatial Statistics.

Emerging Economies and Firms in the Global Crisis Marin Marinov,Svetla Marinova,2012-11-14 Comprised of chapters that explore the impact of the global crisis on emerging economies and firms and their response to it. The ways in which the leading emerging economies of Brazil, Russia, India and China are dealing with the challenges of the crisis are complemented by the methods applied by countries and firms in Central and Eastern Europe.

Cultural Psychology, Cross-cultural Psychology, and Indigenous Psychology Carl Ratner,2008 Cultural psychology, cross-cultural psychology, and indigenous psychology are the major psychological approaches to studying the relationship between culture and psychology. The three approaches have developed in relative isolation from each other, and each has accumulated a substantial corpus of theoretical and empirical work. This new book compares the similarities and differences of the three approaches, and it assesses their strengths and weaknesses.

Applied Bayesian Statistics Scott M. Lynch,2022-10-31 Bayesian statistical analyses have become increasingly common

over the last two decades. The rapid increase in computing power that facilitated their implementation coincided with major changes in the research interests of, and data availability for, social scientists. Specifically, the last two decades have seen an increase in the availability of panel data sets, other hierarchically structured data sets including spatially organized data, along with interests in life course processes and the influence of context on individual behavior and outcomes. The Bayesian approach to statistics is well-suited for these types of data and research questions. *Applied Bayesian Statistics* is an introduction to these methods that is geared toward social scientists. Author Scott M. Lynch makes the material accessible by emphasizing application more than theory, explaining the math in a step-by-step fashion, and demonstrating the Bayesian approach in analyses of U.S. political trends drawing on data from the General Social Survey.

China's Direct Investment in Indonesia (1990-2022) Kai Liu, 2024-09-23 To elucidate the theoretical underpinnings and practical nuances of China's Outward Foreign Direct Investment (OFDI) in Indonesia spanning 1990-2022, this book intricately integrates its evolutionary trajectory within the framework of both traditional and emerging investment theories. Employing a judicious blend of standardized and empirical approaches, the book employs a comprehensive mix of quantitative and qualitative research methods to provide a nuanced understanding of this dynamic subject matter. Against the backdrop of the post-pandemic era, this book takes the international investment landscape as its context, focusing on Indonesia as the subject of country-specific research. It demonstrates the evolutionary trajectory of China's enterprises' direct investment in Indonesia, synthesizing the structural characteristics of these investments. The study empirically examines the investment effects and their operational mechanisms, determining the multi-dimensional investment distances between the two countries. Additionally, it illustrates the mechanisms underpinning the occurrence of the liability of foreignness risks faced by Chinese enterprises and defines the core elements and implementation pathways of the innovative localization investment model.
