Ten Birds That Changed the World Stephen Moss,2023-02-28 For the whole of human history, we have lived alongside birds. We have hunted and domesticated them for food; venerated them in our mythologies, religion and rituals; exploited them for their natural resources; and been inspired by them for our music, art and poetry. In *Ten Birds that Changed the World*, naturalist and author Stephen Moss tells the gripping story of this long and eventful relationship through ten key species from all seven of the world's continents. From Odin's faithful raven companions to Darwin's finches, and from the wild turkey of the Americas to the emperor penguin as potent symbol of the climate crisis, this is a fascinating, eye-opening and endlessly engaging work of natural history.

Crazy Historical Events Linda Hill, AI, 2025-03-31 Crazy Historical Events explores the bizarre side of world history, revealing how chance happenings and human error have significantly shaped our world. The book examines wars sparked by simple misunderstandings, like one conflict triggered by a misplaced ear, and political blunders with resounding consequences, such as the economic disaster of the South Sea Bubble. Highlighting that history isn't always a rational progression, this book dives into unusual occurrences and historical misjudgments to reveal the pivotal role of absurdity in shaping events. The book progresses through chapters dedicated to wars born of miscommunication, political decisions that seem foolish in retrospect, and strange social phenomena like the Dancing Plague of 1518. By analyzing these events, the book underscores how the interplay of these factors challenges traditional, linear narratives of history, offering a more nuanced understanding. Such analysis is crucial for anyone seeking to understand how bizarre events and chance circumstances have shaped history. Through a narrative non-fiction approach, Crazy Historical Events avoids jargon, presenting history in an accessible and engaging style suitable for general readers. The book uses primary and secondary sources to explore the social, political, and economic conditions that led to these unusual occurrences, providing a fresh perspective on historical periods and emphasizing the human element.

Boom and Bust Libby Robin, Robert Heinsohn, Leo Joseph, 2009-03-06 In Boom and Bust, the authors draw on the natural history of Australia's charismatic birds to explore the relations between fauna, people and environment in a continent where variability is 'normal' and rainfall patterns not always seasonal. They consider changing ideas about deserts and how these have helped us understand birds and their behaviour in this driest of continents. The book describes the responses of animals and plants to environmental variability and stress. It is also a cultural concept, when it is used to capture the patterns of change wrought by humans in Australia, where landscapes began to become cultural about 55,000 years ago as ecosystems responded to Aboriginal management. In 1788, the British settlement brought, almost simultaneously, both agricultural and industrial revolutions to a land previously managed by fire for hunting. How have birds responded to this second dramatic invasion? Boom and Bust is also a tool for understanding global change. How can Australians in the 21st century better understand how to continue to live in this land as its conditions are still dynamically unfolding in response to the major anthropogenic changes to the whole Earth system? This interdisciplinary collection is written in a straightforward and accessible style. Many of the writers are practising field specialists, and have woven their personal field work into the stories they tell about the birds.

What Birdo is that? Libby Robin, 2023-05-30 The idea that a bird is good news and needs all our support is probably the only thing amateur birdos, professional zoologists and 'birdscapers'-people who redesign their gardens to support birdlife-have in common. But together they form a conservation community that cares about the future of birds and their habitats, who are working to heal the damage wrought by those who don't notice birds. What Birdo is That? reveals how bird-people in

Australia have gone about their craft across the years. Its stories come from wild places - at sea as well as on the land-from dusty archives, from restoration projects, gardens and urban wastelands. They are human stories, but the birds themselves interject and interrupt any self-important anthropocentrism. They educate. They counter the imperialism of the ever-expanding economies of the new millennium. They turn up in unexpected places, giving surprise and joy. This field guide to Australia's bird-people provides a basis for understanding the complex relationship between people and birds in a land of extremes at the forefront of changing climate and habitats.

Fuzz: When Nature Breaks the Law Mary Roach, 2021-09-14 An Instant New York Times Bestseller #1 Los Angeles Times Bestseller #1 Indie Hardcover Nonfiction Bestseller A Publishers Weekly Best Nonfiction Book of 2021 Longlisted for the 2022 Andrew Carnegie Medal for Excellence in Nonfiction Join America's funniest science writer (Peter Carlson, Washington Post), Mary Roach, on an irresistible investigation into the unpredictable world where wildlife and humans meet.

What's to be done about a jaywalking moose? A bear caught breaking and entering? A murderous tree? Three hundred years ago, animals that broke the law would be assigned legal representation and put on trial. These days, as New York Times best-selling author Mary Roach discovers, the answers are best found not in jurisprudence but in science: the curious science of human-wildlife conflict, a discipline at the crossroads of human behavior and wildlife biology. Roach tags along with animal-attack forensics investigators, human-elephant conflict specialists, bear managers, and danger tree faller blasters. Intrepid as ever, she travels from leopard-terrorized hamlets in the Indian Himalaya to St. Peter's Square in the early hours before the pope arrives for Easter Mass, when vandal gulls swoop in to destroy the elaborate floral display. She taste-tests rat bait, learns how to install a vulture effigy, and gets mugged by a macaque. Combining little-known forensic science and conservation genetics with a motley cast of laser scarecrows, langur impersonators, and trespassing squirrels, Roach reveals as much about humanity as about nature's lawbreakers. When it comes to problem wildlife, she finds, humans are more often the problem—and the solution. Fascinating, witty, and humane, *Fuzz* offers hope for compassionate coexistence in our ever-expanding human habitat.

Crocodile Undone Marcus Baynes-Rock, 2020-03-24 Across the world, animals are being domesticated at an unprecedented rate and scale. But what exactly is domestication, and what does it tell us about ourselves? In this book, Marcus Baynes-Rock seeks the common thread linking stories about the domestication of Australia's native animals, arguing that domestication is part of a process by which late modernity threatens to undo the world. In a deeply personal account, the author tells of his encounters with crocodiles and emus behind fences, dingoes and kangaroos crossing boundaries, and native bees producing honey in his suburban backyard. Drawing on comparisons between Aboriginal and colonial Australians, Baynes-Rock reveals how the domestication of Australia's fauna is a process of "unmaking." As an extension of late modernity, the connections that tie humans and other animals to wider ecologies are being severed, threatening to isolate us and our domesticates from the rest of the world. It is here that Baynes-Rock reveals a key difference between Aboriginal and colonial Australian modes of landscape management: while one is focused on a systemic approach and sees humans as integral to ecological integrity, the other seeks to sever domesticates from ecological processes. The question that emerges is: How might we reconfigure and maintain these connections without undoing humanity? Written in the author's characteristically frank, passionate, and humorous style, *Crocodile Undone* takes the reader on a journey across both physical and philosophical landscapes. This fascinating narrative will appeal to anyone interested in the vital connections between humans and animals.

Web, Graphics & Perl/Tk Programming Jon Orwant, 2003-03-10 In its first five years of existence, The Perl Journal (TPJ) became the voice of the Perl community. Every serious Perl programmer subscribed to it, and every notable Perl guru jumped at the opportunity to write for it. TPJ explained critical Perl topics and demonstrated Perl's utility for fields as diverse as astronomy, biology, economics, AI, and games. Back issues were hoarded, or swapped like trading cards. No longer in print format, The Perl Journal remains a proud and timeless achievement of Perl during one of its most exciting periods of development. *Web, Graphics & Perl/Tk* is the second volume of *The Best of the Perl Journal*, compiled and re-edited by the original editor and publisher of The Perl Journal, Jon Orwant. In this series, we've taken the very best (and still relevant) articles published in TPJ over its five years of publication and immortalized them into three volumes. The forty articles included in this volume are simply some of the best Perl articles ever written on the subjects of graphics, the Web, and Perl/Tk, by some of the best Perl authors and coders. Much of Perl's success is due to its capabilities for developing web sites; the Web section covers popular topics such as CGI programs, `mod_perl`, spidering, HTML parsing, security, and content management. The Graphics section is a grab bag of techniques, ranging from simple graph generation to ray tracing and real-time video digitizing. The Perl/Tk section shows you how to use the popular Perl/Tk toolkit for developing graphical applications that work on both Unix/Linux and Windows without a single change. Written by twenty-three of the most prominent and prolific members of the closely-knit Perl community, including Lincoln Stein, Mark-Jason Dominus, Alligator Descartes, and Dan Brian, this anthology does what no other book can, giving unique insight into the real-life applications and powerful techniques made possible by Perl.

Lest Mark Dapin, 2024-07-03 From Simpson's donkey and the Emu War to Vietnam and Ben Roberts-Smith, Australian military history is full of events that didn't happen the way most people think they did. In his inimitable style, award-winning author Mark Dapin sets the record straight. Australia has many stories and statues 'lest we forget' our military past. But from Simpson's donkey to Ben Roberts-Smith, our history is full of events that didn't happen the way most people think they did. The first Anzac Day, for example, was far from being a solemn march - it was a celebration where people dressed as cavemen and dinosaurs, among other things. And is it true that British officers callously dispatched Australian soldiers to their deaths in the Dardanelles, as we've been told? Did we really hate the soldiers returning from Vietnam? Were the white-feather women of the First World War fact or fiction? In his inimitable style, award-winning author and historian Mark Dapin sets the record straight, showing that the reality was often completely different from the myth - and that in celebrating the wrong people we often overlook the real heroes. 'With Lest, Mark Dapin transforms his trademark humour into serious history ... It forces us to look again at stories we think we all know - or should know - and reframe them with intellectual rectitude and rigour ... Lest offers new perspectives on the past from one of Australia's most interesting and provocative thinkers.' Clare Wright

God's Brains Doug Clelland, 2016-06-07 While the stories that make up God's Brains suggest that the skies of the future will certainly not be pure blue, through their ironic edge and secular bite, they suggest that there are always new energies to be found from the setbacks and the sinking 'Titanics' of our lives
