Cultivated vegetables of the world: a multilingual onomasticon Stanley J. Kays, 2011-10-03 Vegetables make up a major portion of the diet of humans and are critical for good health. With the world population predicted to reach 9 billion people by 2050, they will play an increasingly important role in food availability. The purpose of this book is to facilitate accuracy in communication among individuals working in agriculture and a better understanding of the extent and diversity of vegetable production and utilization worldwide. Increasing global economic interdependence and trade in agricultural products makes precise communication among individuals utilizing different languages essential. There is currently a wide range of vegetables shipped around the world as seasonal, economic and other forces are shifting markets from exclusively local toward global. The text provides up-to-date scientific names, synonyms, and common names for the commercially cultivated vegetable crops grown worldwide (404 crops), in addition to information on the plant parts utilized and their method of preparation. Common names from 370 languages are presented along with information on each of the languages. The text represents an essential reference source with the information presented in a concise and readily accessible format. It allows identifying a crop from the common name in a diverse cross-section of languages and is therefore of use to university and government researchers, libraries worldwide, agricultural organizations, agricultural scientists, embassies, international travelers, vegetable growers, shippers, packers, produce buyers, grocery store managers, gourmet restaurants, chefs, and gardeners.

The Land in Our Bones Layla K. Feghali, 2024-02-13 *Instant USA Today Best Seller* A profound and searching exploration of the herbs and land-based medicines of Lebanon and Canaan—a vital invitation to re-member our roots and

deepen relationship with the lands where we live in diaspora Tying cultural survival to earth-based knowledge, Lebanese ethnobotanist, sovereignty steward, and cultural worker Layla K. Feghali offers a layered history of the healing plants of Cana'an (the Levant) and the Crossroads ("Middle East") and asks into the ways we become free from the wounds of colonization and displacement. Feghali remaps Cana'an and its crossroads, exploring the complexities, systemic impacts, and yearnings of diaspora. She shows how ancestral healing practices connect land and kin—calling back and forth across geographies and generations and providing an embodied lifeline for regenerative healing and repair. Anchored in a praxis she calls Plantcestral Re-Membrance, Feghali asks how we find our way home amid displacement: How do we embody what binds us together while holding the ways we've been wrested apart? What does it mean to be of a place when extraction and empire destroy its geographies? What can we restore when we reach beyond what's been lost and tend to what remains? How do we cultivate kinship with the lands where we live, especially when migration has led us to other colonized territories? Recounting vivid stories of people and places across Cana'an, Feghali shares lineages of folk healing and eco-cultural stewardship: those passed down by matriarchs; plants and practices of prenatal and postpartum care; mystical traditions for spiritual healing; earth-based practices for emotional wellness; plant tending for bioregional regeneration; medicinal plants and herbal protocols; cultural remedies and recipes; and more. *The Land in Our Bones* asks us to reclaim the integrity of our worlds, interrogating colonization and defying its "cultures of severance" through the guidance of land, lineage, and love. It is an urgent companion for our times, a beckoning call towards belonging, healing, and freedom through tending the land in your own bones.
