Greatest Blacks Ever Ambassador Elliston Rahming ,Briana Louise Cacuci,2017-06-16 From an article entitled “History’s Black Hole” from the January 10, 2016 global edition of the New York Daily News, Arthur Browne opines, “Across every field of endeavor, from the ministry to medicine and from education to entrepreneurship, book merchants balk at memorializing black experience and accomplishments.” Essentially, this book is a celebration of black accomplishments—over centuries and across continents—and seeks to fill a portion of that “black hole.” Of the roughly 7 billion people who inhabit this planet, some 1.5 billion are classified as white, and blacks account for 1.1 billion. The remaining over 4 billion are somewhere in the middle. Yet, throughout the years, a paucity of written materials have recorded the positive influences and myriad contributions that the great number of black citizens have made toward global peace, progress, prosperity, and pleasure.

Rewards through Resilience Steven W. Sanders,2023-12-05 Struggle is a real-world phenomenon, particularly if we want to make a difference in our lives and the lives of others. The struggles we face can be as routine as dealing with the traffic to get to our place of work on time. We may also struggle with physical or mental illness, a family dynamic that is not

improving, or a difficult job. In extreme cases, some must live through oppression and life-threatening events brought on by an oppressive regime. Struggle is an effort to gain freedom from constraints, to withstand or overcome obstacles, or to work against competing forces in order to make a meaningful change or difference. Whether we encounter frequent struggles or only a few, we all must face them, not necessarily by choice. We are aware of the pain and difficulties associated with struggles as well as the feeling of gratification and relief when we withstand, outlast, or overcome them. We learn from struggles, together with building strength of character and resilience the next time we encounter similar challenges. How we engage and overcome struggles shapes our attitudes and perspectives regarding our lives and our ability to make a difference in the lives of others.

The Meaning Is in the Dirt Marlette B. Reed, B.Ed., MA, Annette M. Lane, RN, PhD, 2019-11-30 From the authors of *Making Meaning in Older Age and Older Adults: Understanding and Facilitating Transitions* (now in its third edition) Many demands in life can impede meaning-making. The pressures of work, ongoing education, raising a family, caregiving for older relatives—and more—compete for our time to pursue meaning in life. The work of character development, the effort and discipline(s) needed for purposeful living, and learning healthy ways of dealing with adversity can get short-circuited, leaving people with a sense of internal emptiness or quiet desperation. The desire to live a perfect life, one untroubled by “messiness,” whether in our homes or in our life choices, can leave us with the nagging question: “What’s it all for?” This book offers short and easy-to-read meditations that address making meaning through the metaphor of dirt. With their decades of working with people facing challenging circumstances, identical twins Marlette and Annette explain why making meaning is important, and they outline practical ways in which adults can find meaning in their lives. Transparent and real, the authors address the challenging circumstances we may think disturb our lives unfairly (but may, in fact, lead to greater richness), as well as discuss the impact in the world of living purposefully. The authors write with insight and warmth as well as personal experience of adversity; they provide persuasive reasoning for the importance of living intentionally and meaningfully in the messiness of life. The meaning really is in the dirt!

Extreme Winning Pat Williams, 2015-11-03 Extreme winners are not content with being second. That's equivalent to being the first loser. 'Anybody can live life when things are going well; the real test comes when adversity strikes and setbacks nail you. When that happens, how are you going to respond?' It's been five years since Pat Williams learned firsthand what an oncologist was. Five years since he had to actually prove that he bought into his own message in order to beat the cancer attacking the plasma cells in his bone marrow. Five years since he responded to the diagnosis with a new mission for

remission and determined to face his mission with one goal - winning! Now, Williams and Kerasotis share that same focus and passion with readers by identifying 12 qualities of extreme winners and by providing all of the tools they need to implement each one. When put into practice - which readers can do right away - there is no telling what can happen. And there is no telling what they can accomplish.

The Flowering Wand Sophie Strand, 2022-11-29 A deep exploration of the regenerative and magical secrets of sacred masculinity hidden in familiar myths both ancient and modern • Reveals the restorative fungi archetype of Osiris, the Orphic mysteries as an underground mycelium linking forests and people, how Dionysus teaches us about invasive species and playful sexuality, and the ecology of Jesus as depicted in his nature-focused parables • Liberates Tristan, Merlin, and the Grail legends from the bounds of Campbell's hero's journey and invites the masculine into more nuanced, complex ways of dealing with trauma, growth, and self-knowledge Long before the sword-wielding heroes of legend readily cut down forests, slaughtered the old deities, and vanquished their enemies, there were playful gods, animal-headed kings, mischievous lovers, trickster harpists, and vegetal magicians with flowering wands. As eco-feminist scholar Sophie Strand discovered, these wilder, more magical modes of the masculine have always been hidden in plain sight. Sharing the culmination of eight years of research into myth, folklore, and the history of religion, Strand leads us back into the forgotten landscapes and hidden secrets of familiar myths, revealing the beautiful range of the divine masculine, including expressions of male friendship, male intimacy, and male creative collaboration. In discussing Dionysus and Osiris, Strand encourages us to think like an ecosystem instead of like an individual. She connects dying, vegetal gods to the virtuous cycle of composting and decay, highlighting the ways in which mushrooms can restore soil and heal polluted landscapes. Exploring esoteric Christianity, the author celebrates the Gnostic Jesus of the Gospel of Thomas, imagining the ecology that the Rabbi Yeshua would have actually been referencing in his nature-focused parables. Strand frees Tristan, Merlin, and the Grail legends from the bounds of Campbell's hero's journey and invites the masculine into more nuanced, complex ways of dealing with trauma, growth, and self-knowledge. Strand reseeds our minds with new visions of male identity and shows how each of us, regardless of gender, can develop a matured ecological empathy and witness a blossoming of sacred masculine powers that are soft, curious, connective, and celebratory.

50 American Heroes Every Kid Should Meet, 3rd Edition Dennis Denenberg, Lorraine Roscoe, 2016-08-01 How quickly can you name 50 American heroes? They can be men or women, young or old, from the past or present, living or dead, but they all must have made an exceptional positive contribution to our world. Chances are, a few names popped right up: George Washington, Abraham Lincoln, Martin Luther King Jr. After all, they have their own national holidays. Then maybe people you are studying in school, such as Thomas Jefferson, Eleanor Roosevelt, or Harriet Tubman. After that, perhaps you listed a few important people in the news— Bill Gates, Jimmy Carter, even Oprah Winfrey. Coming up with a list of 50 wasn't easy, was it? We didn't think so either, and that's why we wrote this book. Every kid needs great men and women to admire and imitate, but how can you look up to them if you don't know who they are? *50 American Heroes Every Kid Should Meet* introduces readers to a diverse cast of great Americans. The remarkable stories of fifty inspiring Americans are highlighted, from Jane Addams to Louis Zamperini. Among our heroes are architects and aviators, activists and scientists,

entrepreneurs and advocates. They are teachers, musicians, inventors, and athletes. Some are well known. Others deserve to be. Some of our heroes lived long ago. Others continue to enrich our world today. Our heroes share admirable qualities: exceptional talent, fierce determination, and indomitable spirit. They are courageous and confident and possess an unwavering commitment to being the best they can be.

Race and Education in New Orleans Walter Stern, 2018-05-04 Surveying the two centuries that preceded Jim Crow's demise, *Race and Education in New Orleans* traces the course of the city's education system from the colonial period to the start of school desegregation in 1960. This timely historical analysis reveals that public schools in New Orleans both suffered from and maintained the racial stratification that characterized urban areas for much of the twentieth century. Walter C. Stern begins his account with the mid-eighteenth-century kidnapping and enslavement of Marie Justine Sirnir, who eventually secured her freedom and played a major role in the development of free black education in the Crescent City. As Sirnir's story and legacy illustrate, schools such as the one she envisioned were central to the black antebellum understanding of race, citizenship, and urban development. Black communities fought tirelessly to gain better access to education, which gave rise to new strategies by white civilians and officials who worked to maintain and strengthen the racial status quo, even as they conceded to demands from the black community for expanded educational opportunities. The friction between black and white New Orleanians continued throughout the nineteenth century and well into the twentieth, when conflicts over land and resources sharply intensified. Stern argues that the post-Reconstruction reorganization of the city into distinct black and white enclaves marked a new phase in the evolution of racial disparity: segregated schools gave rise to segregated communities, which in turn created structural inequality in housing that impeded desegregation's capacity to promote racial justice. By taking a long view of the interplay between education, race, and urban change, Stern underscores the fluidity of race as a social construct and the extent to which the Jim Crow system evolved through a dynamic though often improvisational process. A vital and accessible history, *Race and Education in New Orleans* provides a comprehensive look at the ways the New Orleans school system shaped the city's racial and urban landscapes.
