**Babu Karavadra, Richard A. Haines, Medha Sule**

**Teaching English for Medical Purposes** Virginia Allum, 2012-07-31 Background reading and activities used for EMP Teacher Training. Practical tips for developing texts and activities for health care professionals.

Clinical Assessment Tracy Lapworth, Deborah Cook, 2022-11-30 Every contact with your patient is an opportunity for health assessment. Ideal for quick reference, this pocket-sized guide puts all the crucial information at your fingertips. This second edition of Clinical Assessment provides an essential overview of the topic, including new material on assessment of the acutely ill patient and the older patient. The new edition also includes resources to aid accurate neurological assessment, specifically covering aspects such as delirium and dementia. Used as a platform for wider reading, it is an ideal reference point for any nursing and healthcare student or professional.

Ward-based Critical Care: a guide for health professionals Ann M Price, Dr Sally A Smith, Dr Alistair Challiner, 2016-01-01 Like the original Ward-based Critical Care, this second edition aims to guide practitioners in the initial management of critically ill adult patients within the ward setting. It should be of value to a wide range of healthcare professionals, including junior doctors, nurses, physiotherapists and students. It will also be relevant to practitioners who are moving into any setting that cares for acutely ill patients. This volume has been slightly reorganised since the first edition to ensure that practical aspects are incorporated within the relevant sections. The book is still structured around the ABCDE approach to assessing and managing patients, as this is promoted in critical care and resuscitation care training. The focus on practical examples and 'hot tips' to aid memory of key points continues. All the chapters have been updated with the most recent guidance, as available at the time of writing. This has meant that some chapters have required major revisions, while others have remained relatively unchanged. Some new chapters have been included, such as the ones on anaphylactic shock, patient safety, dealing with pregnant women in the ward setting, and massive blood transfusion. In addition, each section now starts with a chapter giving an overview of the A-E approach in order to provide more detail about assessing and managing those aspects of patient care. This informative book contains many useful features such as clinical scenarios, hot tips and practical skills, and the text is richly illustrated and cross-referenced throughout.

**Oxford Handbook for Medical School** Kapil Sugand, Miriam Berry, Imran Yusuf, Aisha Janjua, Chris Bird, 2019-03-07 Medical school is full of unfamiliar and often frightening experiences for students. In the first year, a student must move

away from home, balance personal finances, assimilate large volumes of information, learn practical skills, pass high stakes exams, and face a range of unique experiences. The Oxford Handbook for Medical School provides an essential, practical guide for all students, whether you have just received your offer, you're eager to succeed on the wards, or you're about to start your final exams. This handbook includes quick-access summaries covering the crucial information for your preclinical years and for each clinical specialty. With bullet lists of the key information you need to know, and helpful mnemonics throughout, this is a concise yet thoroughly comprehensive guide. Written by a team of consultants and recent students, now successfully graduated and embarking on their careers, this book will be your closest companion right up to graduation. More than a survival guide, it will help you navigate the bewildering range of opportunities medical school offers, showing you how to make the most of your time, so you are fully prepared for your future career.

SBAs for the MRCOG Part 1 Babu Karavadra, Richard A. Haines, Medha Sule, 2024-07-12 SBAs for the MRCOG Part 1 is a question-and-answer style revision guide designed to help candidates prepare for Papers 1 and 2 of the MRCOG Part 1 examination. Mapped to the exam syllabus, the book contains 500 single-best-answer (SBA) questions carefully written to reflect fundamental areas of the curriculum, along with explanatory answers based on the most recent Green-top Guidelines from the Royal College of Obstetricians and Gynaecologists (RCOG) and journal articles from The Obstetrician and Gynaecologist (TOG). The questions test knowledge of the basic sciences as well as considerations relevant to day-to-day clinical practice to help candidates to understand the wider context of their learning. Alongside the Q&As for the individual curriculum areas, the book contains two 100-question mock papers to help candidates feel fully prepared for the real exam. Providing a thorough assessment of the key topics and expert guidance, this is an essential resource for obstetrics and gynaecology trainees looking to maximise their exam success.
