*Rings and Things and a Fine Array of Twentieth Century Associative Algebra* Carl Clifton Faith, 2004 This book surveys more than 125 years of aspects of associative algebras, especially ring and module theory. It is the first to probe so extensively such a wealth of historical development. Moreover, the author brings the reader up to date, in particular through his report on the subject in the second half of the twentieth century. Included in the book are certain categorical properties from theorems of Frobenius and Stickelberger on the primary decomposition of finite Abelian formulations of the latter by Krull, Goldman, and others; Maschke's theorem on the representation theory of finite groups over a field; and the fundamental theorems of Wedderburn on the structure of finite dimensional algebras Goldie, and others. A special feature of the book is the in-depth study of rings with chain condition on annihilator ideals pioneered by Noether, Artin, and Jacobson and refined and extended by many later mathematicians. Two of the author's prior works, *Algebra: Rings, Modules and Categories, I and II* (Springer-Verlag, 1973), are devoted to the development of modern associative algebra and ring and module theory. Those bibliography of over 1,600 references and is exhaustively indexed. In addition to the mathematical

survey, the author gives candid and descriptive impressions of the last half of the twentieth century in "Part II: Snapshots of fellow graduate students at the University of Kentucky and at Purdue, Faith discusses his Fulbright-Nato Postdoctoral at Heidelberg and at the Institute for Advanced Study (IAS) at Princeton, his year as a visiting scholar at Berkeley, and the many acquaintances he met there and in subsequent travels in India, Europe, and most recently, Barcelona. Comments on the first edition: "Researchers in algebra should find it both full references as to the origin and development of the theorem ... I know of no other work in print which does this as thoroughly and as broadly." --John O'Neill, University of Detroit at Mercy " 'Part II: Snapshots of Mathematicians of my age and younger will relish reading 'Snapshots'." --James A. Huckaba, University of Missouri-Columbia

Marriage Seen through Proverbs and Anti-Proverbs Anna T. Litovkina, Wolfgang Mieder, 2019-11-04 This book explores various aspects of marriage and the ways it is viewed and conceptualized in the body of Anglo-American anti-proverbs (or proverb transformations). It also depicts those who contribute to the institution of marriage (that is, husbands and wives), and analyses their nature, qualities, attributes and behaviours as revealed through such anti-proverbs. In addition, the text investigates those who remain single and do not belong to the institution of marriage, but contribute to the institution of marriage. It will appeal to a wide range of readers, from the casually interested general reader to the paremiologist, paremiographer, lexicographer, and anthropologist.

**Are You Superstitious?** Toni Klein, 2019-10-30 Can you actually avoid fate? You, along with millions of others, probably do it every day by following ... superstitions! Dodging black cats. Walking around an open ladder. Sidestepping cracks in the sidewalk. Each foretells calamity if you do not follow the rules of superstition. Have you mastered your own destiny by practicing these old myths? Or not? From the origins of the most popular and obscure beliefs and old wives' tales to the songs that have been written about them, author Toni Klein (Passport to Heaven's Angelic Messages, Fairies, Ian Greets The World) takes a fascinating look at the superstitions that guide our daily lives and why we observe them so unquestioningly.

**Pearls of Power** Charles Lewis, 2022-05-09 Pearls of Power reviews the social science that explains our implicit, instinctual appraisal of people, and how these subliminal automatic appraisals influence choices in elections and in the workplace in the selection of leaders. This book focuses on a limited but critical aspect of leadership - how to get the role. It is not a book on leadership skills, but rather on how to look that part, as this is essential for gaining access to leadership roles. Citing hundreds of scientific studies, Dr. Lewis explains how subtle characteristics in the candidate's appearance affect voter behavior sufficiently to move election results by several percentage points; enough to swing most competitive elections. These same characteristics influence how we are perceived in the workplace and greatly impact hiring and promotion into leadership roles. Pearls of Power then outlines the steps a candidate can take to improve the way they are perceived by others, and how to make subtle changes in their appearance that increase the perception of competence, capacity and strength. Since most voters never meet the candidate, photos have a crucial influence on elections. Pearls of Power describes how different camera lenses, lighting, and camera angle can change how we are perceived, and how different persons can highlight or minimize aspects of their appearance to best present themselves. Although any political or job candidate may benefit from the advice provided in Pearls of Power, it is written with women in mind. There are chapters on how to use of cosmetics, jewelry, accessories, and on hair and clothing styles that best present the candidate. The book provides guidance on how the candidate can best present themselves when interviewed on radio or television, and gives advice on what not to wear on live camera. Pearls of Power counsels the reader on how they can develop a persona with executive presence so that others perceive them as leaders, in order to give the reader a greater voice and more powerful role, both in society and in their careers.
