The Routledge History Handbook of Central and Eastern Europe in the Twentieth Century Jochen Böhrer, Włodzimierz

Borodziej, Joachim von Puttkamer, 2022-02-15 *Violence* analyzes both the violence exerted on the societies of Central and Eastern Europe during the twentieth century by belligerent powers and authoritarian and/or totalitarian regimes and armed conflicts between ethnic, social and national groups, as well as the interaction between these two phenomena. Throughout the twentieth century, Central and Eastern Europe was hit particularly hard by war, violence and repression, with armed conflicts in the Balkans at the start and end of the period and two world wars in between. In the shadow of these full-scale wars, ethnic, social and national conflicts were intensified, found new forms and were violently played out. The interwar period witnessed the emergence of authoritarian states who enforced their claim to power through continued violence against political opponents, stigmatized ethnic, national and social groups, and were themselves fought with subversive or terrorist techniques. This volume focuses specifically on physical violence: war and civil war, ethnic cleansing, systematic starvation policies, deportations and expulsions, forced labour and prison camps, persecution by state security – such as intensive surveillance, which had an enormous impact on the lives of those it affected – and other forms of government oppression and militant resistance. Geographically, it considers the western regions of Belarus and Ukraine as sites of extreme violence that had a noticeable impact on neighbouring Central and Eastern European countries as well. The concluding volume in a four-volume set on Central and Eastern Europe in the twentieth century, it is the go-to resource for those interested in violence in this complex region.

West Point History of World War II, Vol. 1 The United States Military Academy, 2015-11-03 An outstanding new military history of the first half of World War II, featuring a rich array of images, exclusive graphics, superb new maps, and expert analysis commissioned by the United States Military Academy to teach the art of war to West Point cadets. Since 1836, United States Military Academy texts have been the gold standard for teaching military history and the operational art of war. Now the USMA has developed a new military history series for the public featuring the story of World War II in two volumes, of which this is the first. The West Point History of World War II combines the expertise of preeminent historians with hundreds of maps and images, many created for this volume or selected from Army collections. The first volume offers a balanced narrative analyzing the rising tide of Axis conquest from 1939 to mid-1942, ranging from battlefield decisions to operational and strategic plans, all set in their proper political context. The closing chapter provides a thematic treatment of the mobilization of the warring nations' economies and home fronts for the conduct of total war. The West Point History of World War II has been tested, checked, and polished by West Point cadets, faculty, and graduates to make this the best military history of its kind.

Europe's Living Landscapes Bas Pedroli, Anne van Doorn, Geert de Blust, 2014-12-22 This book is the result of three symposia of the Dutch Society for Landscape Ecology. The first symposium in 2005 was about the National Ecological Network in the Netherlands. The reason was that the implementation of the NEN, decided upon in 1990, was halfway. The second symposium, in 2006, was about urban ecology and the third one, to be held in 2007, will be about civil infrastructure. This book does not cover the conferences completely and new contributions are added. The three themes are important contexts in which landscape ecologists do their research and apply their knowledge and skills. Of course, there are many more subjects to hold conferences about, for example climate change, urbanisation, agriculture, landscape ecology itself etc. The focus of the conferences is on the Netherlands, with its urbanisation, intensive land use and water management as characteristic features. Although many WLO members do their work abroad or in an international context, these conferences offer a window on what happens in the Dutch context. The experiences may be of value for other contexts and that is why we present the results in English. The selected themes and the focus on the Dutch context are serious demarcations of what landscape ecology in the Netherlands is all about. The book does not represent all research and applications of landscape ecology.
