The strategies presented are solidly grounded in relevant theory and research. *Moving with Pleasure from the Beginning* Agnes Szanto-Feder, 2020-05-04 It's not many children who have had the privilege to say that he or she was a true Pikler baby. But Ágnes Szántó-Féder, was not only such a child, but also one who had an ongoing relationship - working and otherwise - with the celebrated pediatrician, Dr. Emmi Pikler (1902-1984). Indeed, Ágnes had been so profoundly affected by the woman who revolutionized infant and early childhood care that she, too, devoted her life's work to the philosophy known as the Pikler® Pedagogical Approach. This book will allow the reader to see infants and young children through a lens of competence. Because of this singular approach, youngsters are not coerced or forced to be - or to become - anyone other than who they truly are. This, in a nutshell, is the core Piklerian philosophy, something that is so very simple yet also undeniably deep. Ágnes's acute observational skills guide the reader to understand at a much greater level, what freedom and autonomy actually means for an infant. One of the author's answers lies in the power of "balance; balance (in physical sense) of the infant in their self-initiated gross motor development, and balance in their caring and nurturing relationship with the adult who cares for them." This jewel of a book should be required reading for any parent, policy maker, early childcare professional or any such person advocating for the health of young children around the world... **Critical Literacy Across the K-6 Curriculum** Vivian Maria Vasquez, 2016-09-01 Through stories from kindergarten to sixth grade classrooms where students and teachers have attempted to put a critical edge on their teaching, this book shows critical literacy in action across the curriculum. Readers see students and teachers together using critical literacy discourse to frame conversations in ways that engage students in examining the meaning of the texts they read and acting on local and global social issues that emerge. Drawing on multiple perspectives such as cross-curricular explorations, multimedia, and child-centered inquiry pedagogies, the text features a theoretical toolkit; demonstrations from across the content areas including art, music, and media literacy; integration of technology; and attention to how critical literacy can inform decisions

about standards and assessment. Annotated booklists, examples of students' work, Reflection Questions, Try This (practical classroom strategies), and Resource Boxes can be used to encourage and support engaging in critical literacy work in different areas of the curriculum.

**In Loving Hands** Elsa Chahin, 2017-06-05 In Loving Hands is a definitive book that advocates for young children living in residential settings. Under the proper circumstances, these institutions, while not always having provided the ideal climate for healthy growth, both emotionally and physically, can operate in the best interests of children when they adhere to the precepts of this book. Written in three parts: an overview, the declaration of ten rights, and global voices of experience. In Loving Hands offers an in-depth look at how the quality of care in residential homes can be improved through information, detailed guidance, and applicable tools. After comprehensive research, the authors have made it their mission to support institutions in successfully caring for young children in group settings where they are able to thrive and grow up to be healthy, happy, and productive members of society.

**Lola** Melissa Scrivner Love, 2018-01-02 WINNER OF THE JOHN CREASEY DEBUT DAGGER AWARD Nominated for the Edgar Award for best first novel An astonishing debut crime thriller about an unforgettable woman who combines the genius and ferocity of Lisbeth Salander with the ruthless ambition of Walter White The Crenshaw Six are a small but up-and-coming gang in South Central LA who have recently been drawn into an escalating war between rival drug cartels. To outsiders, the Crenshaw Six appear to be led by a man named Garcia . . . but what no one has figured out is that the gang's real leader (and secret weapon) is Garcia's girlfriend, a brilliant young woman named Lola. Lola has mastered playing the role of submissive girlfriend, and in the man's world she inhabits she is consistently underestimated. But in truth she is much, much smarter--and in many ways tougher and more ruthless--than any of the men around her, and as the gang is increasingly sucked into a world of high-stakes betrayal and brutal violence, her skills and leadership become their only hope of survival. Lola marks the debut of a hugely exciting new thriller writer, and of a singular, magnificent character unlike anyone else in fiction.

*Literacy, Play and Globalization* Carmen L. Medina, Karen E. Wohlwend, 2014-06-05 This book takes on current perspectives on children's relationships to literacy, media, childhood, markets and transnationalism in converging global worlds. It introduces the idea of multi-sited imaginaries to explain how children's media and literacy performances shape and are shaped by shared visions of communities that we collectively imagine, including play, media, gender, family, school, or cultural worlds. It draws upon elements of ethnographies of globalization, nexus analysis and performance theories to examine the convergences of such imaginaries across multiple sites: early childhood and elementary classrooms and communities in Puerto Rico and the Midwest United States. In this work we attempt to understand that the local moment of engagement within play, dramatic experiences, and literacies is not a given but is always emerging from and within the multiple localities children navigate and the histories, possibilities and challenges they bring to the creative moment.

The Routledge International Handbook of Learning with Technology in Early Childhood Natalia Kucirkova, Jennifer Rowsell, Garry Falloon, 2019-03-04 The Routledge International Handbook of Learning with Technology in Early Childhood focuses specifically on the most cutting-edge, innovative and international approaches in the study of children's use of and learning with digital technologies. This edited volume is a comprehensive survey of methods in children's technologies and contains a rich repertoire of studies from diverse fields and research, including both educational and developmental psychology, post-humanist literacy, applied linguistics, language and phenomenology and narrative approaches. For ease of reference, the Handbook's 28 chapters are divided into four thematic sections: introduction and opening reflections; studies answering ontological questions, which theorize how children take on original identities in becoming literate with technologies; studies answering epistemological questions, which focus on how children's knowledge and learning are

(co)constructed with a diverse range of technologies; studies answering practice-related questions, which explore the resources and conditions that create the most powerful learning opportunities for children. Expertly edited, this interdisciplinary and international compendium is an ideal introduction to such a diverse, multi-faceted field.

*STEM Learning with Young Children* Shelly Counsell, Lawrence Escalada, Rosemary Geiken, Melissa Sander, Jill Uhlenberg, Beth Van Meeteren, Sonia Yoshizawa, Betty Zan, 2016 This teacher's guide provides the background information, STEM concepts, and strategies needed to successfully implement an early STEM curriculum (Ramps and Pathways) with young children, ages 3-8. R&P actively engages young children in designing and building ramp structures using wooden core molding, releasing marbles on the structures, and observing what happens. Children use logical-mathematical thinking and problem-solving skills as they explore science concepts related to motion, force, and energy. This guide helps teachers to: Structure and organize an engaging STEM learning environment. Understand and promote logical-mathematical and scientific thinking during investigations. Promote social settings that enhance communication, cooperation, and collaboration. Make the necessary accommodations and modifications for diverse learners. Integrate STEM concepts and skills with other content areas. Align teaching and learning with Next Generation Science Standards (NGSS) and Common Core State Standards (CCSS). Assess STEM learning using formative and summative assessments. Establish adult learning communities to support ongoing professional development. Help children develop habits and behaviors that contribute to positive attitudes toward STEM. This one-of-a-kind resource uses a newly created Inquiry Teaching Model (ITM) as the conceptual framework and devotes specific attention to the importance of an inclusive and social, STEM learning environment in which children are free to collaborate, take risks, and investigate within the context of exploratory and constructive play.

*Moving Critical Literacies Forward* Jessica Pandya, Julianna Ávila, 2013-11-26 Taking the pulse of current efforts to do—and, in some cases, undo—critical literacy, this volume explores and critiques its implementation in learning contexts around the globe. An impressive set of international authors offer examples of productive critical literacy practices in and out of schools, address the tensions and gaps between these practices and educational policies, and attempt to forecast the future for critical literacy as a movement in the changing global educational policy landscape. This collection is unique in presenting the recent work of luminaries such as Allan Luke and Hilary Janks alongside relative newcomers who use innovative approaches and arguments to reinvigorate and redefine critical practice. It is time for this cutting-edge inquiry into the state of critical literacy—not only because it is a complex and ever-evolving field, but perhaps more important, because it offers a reaction to, and powerful reworking of, standardization and high-stakes accountability measures in educational contexts around the globe.

Suddenly, the job takes on a frightening urgency:

Only by finding the courier bag can he expose the company and stop the murder of an entire family—slated to die in forty-eight hours. With the help of an unexpected figure from his past, and with the enforcers closing the net, Shaw narrows in on the truth—and learns that the courier bag contains something unexpected: a secret that could only be described as catastrophic. **The Jane Addams Children's Book Award** Susan C. Griffith, 2013-09-05 Jane Addams (1860–1935) was an inspired activist who struck at the roots of social injustice through persistent and thoughtful action, advocating for reforms in sanitation, housing and work conditions, and child labor. In 1915 Addams founded the Women's International League for Peace and Freedom (WILPF), and in 1931 she became the first American female recipient of the Nobel Peace Prize. Eighteen years after Addams's death, members of the WILPF created the Jane Addams Children's Book Award. Presented annually, the award honors children's books that invite readers to think deeply about peace, social justice, world community, and equality for all races and genders. *The Jane Addams Children's Book Award: Honoring Children's Literature for Peace and Social Justice* since 1953 is the first book to examine the award as well as its winners and honor books. In this volume, Susan C. Griffith reviews and synthesizes Addams's ideas and legacy, so that her life and accomplishments can be used as a focal point for exploring issues of social justice through children's literature. In addition to a history and overview of the award, this work contains annotated bibliographies with thematically arranged winners and honor books bestowed in Addams's name. Supporting literature study in classrooms and integrating points of reflection drawn from the activist's life, *The Jane Addams Children's Book Award* is an invaluable resource for educators, students, and librarians.
