*The Sustainable Renovation of Buildings and Neighbourhoods* Pilar Mercader-Moyano,2015-05-20 The Sustainable Renovation of Buildings and Neighborhoods is a collection of papers presented at the International Congress of Sustainable Construction and Eco-efficient Solutions. This event has established itself as a forum for meeting academics from around the world, researchers and professionals of the construction sector, in which environmental information is shared with a multidisciplinary context, and which involves participants from different areas of the construction process. The congress brings together development proposals through a shared vision of environmental sustainability and presents alternative solutions to problems through technical presentations and trainings, in order to minimize the environmental impact caused by the construction sector. This monograph celebrates the event's second international edition and its fourth national edition. The volume contains selected articles written by the participants. Readers will find information about interesting, new developments and concepts on • Energy retrofitting in older buildings • Tools to determine and measure environmental impact and sustainability indicators • Economic / cost based revaluation of buildings through the viability of eco-efficient solutions • Reduction of the consumption of material and energy resources and in CO2 emissions • Sustainability research based on the renovation of urban areas. The studies in this book provide real examples from different countries (Argentina and Spain, for example). The Sustainable Renovation of Buildings and Neighborhoods is a useful reference for researchers and professional architects involved in sustainable development, environmental rehabilitation and the construction industry.

**Building Engineering Facing the Challenges of the 21st Century** David Bienvenido-Huertas,Joaquín Durán-Álvarez,2023-07-24 Building engineering is a complex and constantly evolving branch. The needs of the XXI century society cause a constant change in construction industry due to the need to achieve sustainable and ecological buildings. This affects all levels and phases of this engineering. Given this circumstance, numerous researchers turn their efforts to find optimal solutions for building engineering. For this reason, in this book a holistic analysis of building engineering is carried out from the perspectives that have a greater weight for sustainability objectives. The book is divided into 6 sections: (i) Building materials, which deals with research related to the most innovative and sustainable building materials; (ii) Design and

construction, which deals with existing methodologies and advances in design and construction in construction sector; (iii) Building repair and maintenance, which deals with building repair, maintenance and upkeep techniques; (iv) Energy efficiency, which analyses the latest research on the energy efficiency of buildings and their behaviour in the face of climate change; (v) Sustainability, which analyses the establishment of measures to achieve a more sustainable built environment; and (vi) construction management, which compiles the latest studies in the field of Project manager. The 38 chapters of the book together constitute an advance for the topic of building engineering. The aspects covered in the book are of great interest to various sectors, such as researchers, engineers, architects, legislators and interested parties.

*Creating a Roadmap Towards Circularity in the Built Environment* Luís Bragança, Meri Cvetkovska, Rand Askar, Viorel Ungureanu, 2023-12-06 This open access book summarizes the research being pursued as part of the COST Action CA21103 titled Implementation of Circular Economy in the Built Environment (Circular B), which aims to define the methodology to develop a common circularity framework for inclusive application and assessment in new and existing buildings to support decision-making for all value chain stakeholders and appraise the implementation level of the European Circular Economy Action Plan (CEAP). The Action is increasingly gaining interest worldwide, bringing multidisciplinary young and experienced researchers together to share the latest studies and develop new knowledge. Consisting of 17 chapters corresponding to the conference themes, the book analyses and discusses topics such as Circular Economy (CE) best practices, design strategies for circular buildings, circular materials and products, adaptive reuse of existing buildings, recovery and reuse of salvaged materials and products, case studies of current applications and trends, barriers against CE implementation in buildings, efficient waste and circular resource management, circular lifecycle management and decision making, stakeholders relationships, CE supporting policies and barriers, circular business models, criteria, KPIs and assessment models for circular buildings, CE criteria in sustainability frameworks, digitalization and BIM for enhanced circularity of buildings and building materials, and standardization of CE definitions in buildings.

Philip II of Spain and the Architecture of Empire Laura Fernández-González,2021-05-08 Philip II of Spain was a major patron of the arts, best known for his magnificent palace and royal mausoleum at the Monastery of San Lorenzo of El Escorial. However, neither the king's monastery nor his collections fully convey the rich artistic landscape of early modern Iberia. In this book, Laura Fernández-González examines Philip's architectural and artistic projects, placing them within the wider context of Europe and the transoceanic Iberian dominions. *Philip II of Spain and the Architecture of Empire* investigates ideas of empire and globalization in the art and architecture of the Iberian world during the sixteenth century, a

time when the Spanish Empire was one of the largest in the world. Fernández-González illuminates Philip's use of building regulations to construct an imperial city in Madrid and highlights the importance of his transformation of the Simancas fortress into an archive. She analyzes the refashioning of his imperial image upon his ascension to the Portuguese throne and uses the Hall of Battles in El Escorial as a lens through which to understand visual culture, history writing, and Philip's kingly image as it was reflected in the funeral commemorations mourning his death across the Iberian world. Positioning Philip's art and architectural programs within the wider cultural context of politics, legislation, religion, and theoretical trends, Fernández-González shows how design and images traveled across the Iberian world and provides a nuanced assessment of Philip's role in influencing them. Original and important, this panoramic work will have a lasting impact on Philip II's artistic legacy. Art historians and scholars of Iberia and sixteenth-century history will especially value Fernández-González's research.
