**Inventarios Forestales Nacionales de América Latina y el Caribe** Ramírez, C., Alberdi, I., Bahamondez, C., y Freitas, J., coords.,2021-12-02 Los inventarios forestales nacionales (IFN) son una de las principales fuentes de información forestal. En este libro se describe la importancia e historia de los IFN de Latinoamérica y el Caribe, región especialmente relevante por la extensión y la biodiversidad de sus bosques. Se abordan las metodologías de recolección de datos y estimación de los indicadores más importantes en 21 países. Asimismo, se analizan las similitudes y diferencias de los diseños de los IFN, los desafíos y oportunidades, y las perspectivas futuras, lo cual muestra que la información generada por los países es diversa y se debe armonizar para satisfacer los compromisos y oportunidades en la gestión sostenible de los bosques en el siglo XXI. Esta publicación marca un hito en el inicio del proceso de armonización hacia la transparencia de los datos del sector forestal de Latinoamérica y el Caribe, y constituye la primera labor de una red de expertos y colaboradores de IFN de esta región.

Derecho forestal: estrategias para la conservación y el uso sostenible de los recursos forestales María del Pilar García Pachón,Ángela María Amaya Arias,2021-01-01 PRESENTACIÓN El derecho forestal cobra extraordinaria relevancia como herramienta para la concreción de diversos fines del derecho ambiental, especialmente aquellos relativos a alcanzar el uso racional de los recursos naturales, la conservación de la naturaleza, y avanzar hacia el desarrollo sostenible. Ante la

necesidad de ahondar en su contenido y con la cadena forestal como guía del estudio propuesto, el Grupo de Investigación en Derecho del Medio Ambiente de la Universidad Externado de Colombia diseñó y propuso un proyecto de investigación jurídico que permitiera ilustrar suficientemente a los diversos operadores jurídicos que se ven involucrados en el sector forestal. Para lograr ese objetivo, el proyecto de investigación propuesto se dio a conocer a un grupo de expertos nacionales y extranjeros reconocidos por sus trabajos previos en derecho forestal y/o por su aporte al derecho ambiental colombiano o internacional. A estos autores se les solicitó escoger alguna de las temáticas que identificamos como esenciales y proponer un trabajo investigativo que debía cumplir con una serie de parámetros formales y de fondo que fueron guía de sus trabajos. Una vez recibidas las propuestas específicas de investigación, los temas de estudio se reordenaron y clasificaron para lograr la completitud del estudio propuesto. El trabajo preparatorio de la investigación que hoy nos complace presentar trajo como resultado esta obra conformada por nueve secciones, que dan cuenta de la multiplicidad de dimensiones desde las cuales se puede abordar la cuestión jurídica forestal. De igual manera, este escrito permite evidenciar cómo el trabajo de investigación individual y colectivo permite resultados como los que el lector podrá observar en este documento.

**Afforestation in Arid Zones** R.N. Kaul, 2012-12-06 The increasing world population is already causing intensive pressure on the most productive areas of the earth's surface. Hopes of improved living standards, if realised, will increase the pressure still further. The need to make better use of less productive areas thus becomes an urgent priority for human endeavour. In this respect, the arid and semi-arid regions of the world, occupying about 11,000 million acres or 4,500 million hectares, roughly one third of the total land surface, pose a constant challenge to man's technological skill. Though the

possibilities of economic use of the real deserts are inherently limited, there remain vast areas with less extreme conditions where sustained research is capable of yielding substantial gains in productivity. The problem is so large that it can be solved only by the coordinated efforts of workers in many countries and many disciplines. Forestry has a special part to play, not only for its potential value for wood production but still more for the beneficial effects of shelter from desiccating winds which so commonly accompany arid conditions. Mr. KA UL is to be congratulated on his initiative to pool the results of research on afforestation in arid zones in many parts of the world, and to present them in a single volume in the form of separate monographs.
