Logística y gestión de suministros humanitarios en el sector salud Organizacion Panamericana de la Salud OPS,2001 Este manual desea presentar los conceptos basicos de la gestion y la logistica de los suministros humanitarios. Aunque el manejo de suministros medicos y farmaceuticos recibe especial atencion, los principios por los que se rige la cadena logistica tienen aplicacion multisectorial, no solo en situaciones de emergencia sino tambien en las operaciones cotidianas que deben ser parte de la prevencion y la preparacion para los desastres.

Conservación contra natura. Las Islas Galápagos Christophe Grenier,2007 El archipiélago de las Galápagos, catalogado como «patrimonio natural de la humanidad», alberga un parque nacional prestigioso que cuenta con ayuda internacional considerable. Destinado a facilitar las investigaciones naturalistas y en principio a servir de modelo para nuevas formas de valorización turística más respetuosas del entorno (ecoturismo), este parque es hoy en día objeto de muchas críticas. El

desarrollo de las redes turísticas y migratorias ha acelerado la conexión del archipiélago al territorio ecuatoriano y al mercado mundial. La naturaleza «protegida» se ha convertido en un espacio sometido a las exigencias de rentabilidad de un mundo caracterizado por la mercantilización y la uniformización de los lugares. Esta «conservación contra natura» tiene consecuencias catastróficas para los ecosistemas y los habitantes del archipiélago. Más allá del estudio de una región emblemática, el autor hace una reflexión sobre el sitio del hombre en la naturaleza, verdadero alegato en favor de la preservación de la geodiversidad. Su obra innovadora y estimulante se dirige a todos los actores preocupados por el porvenir de nuestro planeta. Esta edición en español ha sido enriquecida con un epílogo escrito por el autor diez años más tarde, después de dos nuevas misiones en las islas en 2001 y 2005.

Cálculo y diseño de máquinas: Problemas resueltos I Javier López Martínez, Juan Antonio Martínez Lao, Alejandro López Martínez, Ángel Jesús Callejón Ferre, José Antonio López Martínez, Silvia Sánchez Salinas, 2018-10-25 El contenido de esta obra está encuadrado en el de un curso de Diseño de Elementos de Máquinas para estudiantes de ingeniería mecánica; y en concreto constituye una relación de problemas base de la asignatura de Cálculo y Diseño de Máquinas I de la titulación de Grado en Ingeniería Mecánica en la Universidad de Almería. El libro de problemas se divide en siete temas. Los cuatro primeros temas abordan problemas de selección de materiales en ingeniería mecánica, y los criterios básicos empleados en el diseño mecánico para la prevención de fallos: carga estática, fatiga y esfuerzos de contacto. En el tema 5 se aplican los criterios de diseño anteriores y los principios fundamentales para el cálculo y diseño de ejes y árboles. En el tema 6 se emplean los métodos de cálculo de velocidades críticas en ejes; y en el último tema se aborda el diseño de cojinetes hidrodinámicos. Al final del libro se recoge un formulario y diversas tablas y gráficas empleadas en la resolución de los problemas.

Los transportes en la ingeniería industrial (teoría) Antonio Miravete, Emilio Larrodé, 1998 El presente texto es una adaptación de libros anteriores, editados por el Área de Ingeniería e Infraestructura de los Transportes de la Universidad de Zaragoza, que tiene por objeto ajustarse al Nuevo Plan de Estudios de la Ingeniería Industrial.

From Fundamentals to Applications in Geotechnics D. Manzanal, A.O. Sfriso, 2015-12-11 The work of geotechnical engineers contributes to the creation of safe, economic and pleasant spaces to live, work and relax all over the world. Advances are constantly being made, and the expertise of the profession becomes ever more important with the increased pressure on space and resources. This book presents the proceedings of the 15th Pan-American Conference on Soil Mechanics and Geotechnical Engineering (XV PCSMGE), held in Buenos Aires, Argentina, in November 2015. This conference, held every four years, is an important opportunity for international experts, researchers, academics, professionals and geo-engineering companies to meet and exchange ideas and research findings in the areas of soil

mechanics, rock mechanics, and their applications in civil, mining and environmental engineering. The articles are divided into nine sections: transportation geotechnics; in-situ testing; geo-engineering for energy and sustainability; numerical modeling in geotechnics; foundations and ground improvement; unsaturated soil behavior; embankments, dams and tailings; excavations and tunnels; and geo-risks, and cover a wide spectrum of issues from fundamentals to applications in geotechnics. This book will undoubtedly represent an essential reference for academics, researchers and practitioners in the field of soil mechanics and geotechnical engineering. In this proceedings, approximately 65% of the contributions are in English, and 35% of the contributions are in Spanish or Portuguese.

Bases para el Diseño de Fundaciones Bengt H. Fellenius,2018-02-03 El Libro Rojo presenta los antecedentes para un

análisis y diseño convencional de fundaciones. El origen del texto es doble. Empezó como un compendio de contenidos de los cursos en diseño de fundaciones dados durante mis años como Docente en la Universidad de Ottawa, Departamento de Ingeniería Civil. Posteriormente, se convirtió en un documento de antecedentes para el software desarrollado por antiguos alumnos míos y comercializado por Unisoft Ltd. El texto no pretende reemplazar los libros 'estándar' mucho más completos, sino más bien apoyarlos y aumentarlo en algunas áreas importantes, suministrando métodos aplicables a casos prácticos manejados diariamente por ingenieros practicantes y proporcionando los fundamentos básicos de la mecánica del suelo para esos métodos.
