New York Magazine ,1991-11-11 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country. With award-winning writing and photography covering everything from politics and food to theater and fashion, the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself, while celebrating New York as both a place and an idea.

Ophthalmology in Military and Civilian Casualty Care Christopher J. Calvano, Robert W. Enzenauer, Anthony J. Johnson, 2019-07-30 Trauma to the eye and associated structures account for a significant number of combat-related injuries, and combat ocular trauma has steadily risen in frequency over the last century. *Ophthalmology in Military and Civilian Casualty Care* comprehensively examines the accommodations and modifications that must be made in order to treat such ocular traumas in a military setting. Created by ophthalmology experts actively serving in the military at various levels, this book is designed to improve ophthalmic casualty outcomes across military settings. A history of military ophthalmology serves as the opening chapter, setting the stage for subsequent chapters examining the intricacies and advancements of damage control ophthalmology, prehospital care of combat eye injuries, neuro-ophthalmic manifestations of trauma, and further severe ocular conditions. Later chapters explore the preventative and proactive efforts to reduce and treat combat-

related ocular trauma by developing “eye armor” for the American infantry and military-affiliated ophthalmic surgical missions. Complete with high-quality color illustrations and figures, this unique book will serve as an invaluable, practical reference for military physicians, military ophthalmologists, ophthalmology professors, residents, and fellows interested in combat medicine and eye trauma.

The Neurology of Eye Movements : Text and CD-ROM Departments of Neurology R. John Leigh Professor, Neuroscience Otolaryngology and Biomedical Engineering Case Western Reserve University University Hospitals and Veterans Affairs Medical Center Cleveland Ohio, Departments of Neurology David S. Zee Professor, Ophthalmology Otolaryngology Head and Neck Surgery and Neuroscience, 1999-08-26 The Neurology of Eye Movements provides clinicians with a synthesis of current scientific information that can be applied to the diagnosis and treatment of disorders of ocular motility. Basic scientists will also benefit from descriptions of how data from anatomical, electrophysiological, pharmacological, and imaging studies can be directly applied to the study of disease. By critically reviewing such basic studies, the authors build a conceptual framework that can be applied to the interpretation of abnormal ocular motor behavior at the bedside. These syntheses are summarized in displays, new figures, schematics and tables. Early chapters discuss the visual need and neural basis for each functional class of eye movements. Two large chapters deal with the evaluation of double vision and systematically evaluate how many disorders of the central nervous system affect eye movements. This edition has been extensively rewritten, and contains many new figures and an up-to-date section on the treatment of abnormal eye movements such as nystagmus. A major innovation has been the development of an option to read the book from a compact disc, make use of hypertext links (which bridge basic science to clinical issues), and view the major disorders of eye movements in over 60 video clips. This volume will provide pertinent, up-to-date information to neurologists, neuroscientists, ophthalmologists, visual scientists, otolaryngologists, optometrists, biomedical engineers, and psychologists.

Encyclopedia of the Eye Joseph Besharse, Reza Dana, Barbara Ann Battelle, Thomas A. Reh, Ernst R. Tamm, David Beebe, Peter Bex, Paul Bishop, Dean Bok, Patricia D'Amore, Henry Edelhauser, Linda Mcloon, Jerry Niederkorn, 2010-05-27 As the first comprehensive reference for the eye, its support structures, diseases, and treatments, Encyclopedia of the Eye is an important resource for all visual scientists, ophthalmologists, and optometrists, as well as researchers in immunology, infectious disease, cell biology, neurobiology and related disciplines. This four-volume reference is unique in its coverage of information on all tissues important for vision, including the retina, cornea and lens. It also covers the physiological and pathophysiologic processes that affect all eye tissues. This Encyclopedia is invaluable for graduate students and postdoctoral fellows who are seeking an introduction to an area of eye research. Each chapter explains the basic concepts and provides references to relevant chapters within the Encyclopedia and more detailed articles across the wider research literature. The Encyclopedia is also particularly useful for visual scientists and practitioners who are researching a new area, seeking deeper understanding of important research articles in fields adjacent to their own, or reviewing a grant outside their immediate area of expertise. Written by experts at a level that permits students to grasp key elements of a specific subject Provides an entryway into the major features of current eye research No other source puts this much information, so well-indexed and with so many helpful full color figures and graphics, in the hands of the ophthalmic scientist
