Instituto Nacional de Vías

Tópicos selectos de ingeniería y ciencias ambientales Roberto Pichardo Ramírez ,Juana Treviño Trujillo ,Julio César Rolón Aguilar ,2023-11-10 Tópicos selectos de ingeniería y ciencias ambientales presenta diversos avances ubicados en tres categorías del conocimiento. Busca encaminar el manejo de los recursos hídricos, prevenir la contaminación del agua, revisar los lineamientos portuarios y vigilar las mareas en el Golfo de México para prevenir inundaciones; también se propone reusar desechos de construcción e incorporar nuevos materiales al concreto mediante la validación brindada por software especializado; la obra concluye con una aproximación a la vivienda, la gestión ambiental y el cambio climático. Tópicos selectos de ingeniería y ciencias ambientales aborda áreas de investigación fundamentales para la sociedad y la investigación desarrollada en las disciplinas expuestas, muestra caminos destinados a garantizar el mejoramiento social y las condiciones del entorno ubicado en el sureste de Tamaulipas. Académicamente, los compiladores de esta obra estamos seguros de que este esfuerzo editorial resultará de utilidad para alumnos, docentes e investigadores, además de que se podrá usar como texto técnico y complementario dentro de la bibliografía correspondiente a las asignaturas de licenciatura y posgrado en la Universidad Autónoma de Tamaulipas

Compilación sobre legislación y reglamentación para el municipio de Chihuahua Chihuahua (Chihuahua, Mexico),2001

La ingeniería aplicada en el noreste de México. Enfoque disciplinario Ricardo Tobias Jaramillo ,Rocío Del Carmen Vargas Castilleja ,René Bernardo Elías Cabrera Cruz ,2023-11-09 La ingeniería es pilar del desarrollo de la sociedad, y se demanda cada vez más para satisfacer las necesidades del ser humano, mejorando así la calidad de vida. En esta obra se abordan temas de ingeniería aplicada con un enfoque multidisciplinario consistente en la búsqueda de mejoras para los sistemas de producción industrial, se revisan normativas para la reutilización de materiales, la mejora de rendimientos y la aplicación de análisis de responsabilidad social que mejoren la calidad en los servicios ofrecidos por las empresas, al tiempo que se pone la tecnología al alcance de las personas mayores, se previene la vulnerabilidad social ante fenómenos hidrometeorológicos, se utiliza el georadar para localizar infraestructura subterránea y se implementan sistemas de gestión en la seguridad y salud en el trabajo. En cada capítulo se desarrollan y describen los materiales y métodos utilizados, mediante el análisis de resultados que evidencian la aplicación de técnicas novedosas en las diversas áreas de la ingeniería.

Estamos seguros de que en su conjunto estas aportaciones serán del interés de alumnos, maestros e investigadores, incentivando así al desarrollo de aplicaciones de la ingeniería y tecnología, para incidir directamente en el bienestar del ser humano, mientras se promueve la mejora continua en las empresas industriales contribuyendo a tener procesos más eficientes con excelencia y competitividad en su entorno.

Análisis Estructural de Pavimentacion Nestor Madrid Medina,2019-04-12 En distintas partes del mundo, con la finalidad de programar eficazmente actividades de conservación de pavimentos, se han desarrollado sistemas de administración que permiten llevar un seguimiento en trabajos de conservación y rehabilitación de pavimentos, en cuanto a planeación, programación, análisis, diseño y rehabilitación de pavimentos, y así establecer programas de mantenimiento de acuerdo a las condiciones de cada región en cuanto a estructura del pavimento y presupuesto disponible. Esto da como resultado en los países una mejor estructuración vial.

Ingeniería Básica y de Frontera con incidencia en los Programas Nacionales Estratégicos ,2025-06-30 En los últimos años, a nivel internacional se ha demostrado que la inversión en temas de ciencia y tecnología es fundamental para el desarrollo de un país, ya que las mejoras en procesos y actividades que se obtienen como reflejo de los nuevos modelos y desarrollos obtenidos mediante la investigación básica y aplicada, impacta en el crecimiento del producto interno bruto y aumenta la productividad de los sectores, lo cual se refleja en un incremento en la calidad de vida de los ciudadanos. Alineados a esta afirmación, las instituciones de educación superior de México cuentan con profesores, investigadores y estudiantes en niveles educativos de licenciatura y posgrado que buscan ser motores en la generación de ideas innovadoras potenciando la participación entre academia, ciencia y tecnología con los sectores productivos y la sociedad en general. Es así, que México cuenta con programas y fondos gubernamentales que apoyan el modelo educativo brindando oportunidades para la formación integral de estudiantes con una visión totalmente orientada a las necesidades del país, con miras en los objetivos de desarrollo sostenible. Este libro es la oportunidad para comunicar diferentes trabajos de investigación que conjuntan los esfuerzos de estudiantes de licenciatura y posgrado con profesores e investigadores de áreas de ingeniería que se imparten en la Facultad de Ingeniería Tampico de la Universidad Autónoma de Tamaulipas, quienes con su quehacer académico buscan contribuir de forma precisa y eficiente a diferentes sectores de la sociedad en temas de computación asistida, análisis ambientales y socioecológicos, cuestiones hidrológicas y ciencias de los materiales.
