Fitness Doping Jesper Andreasson,Thomas Johansson,2019-06-25 This book compiles several years of multi-faceted qualitative research on fitness doping to provide a fresh insight into how the growing phenomenon intersects with issues of gender, body and health in contemporary society. Drawing on biographical interviews, as well as online and offline ethnography, Andreasson and Johansson analyse how, in the context of the global development of gym and fitness culture, particular doping trajectories are formulated, and users come into contact with doping. They also explore users' internalisation of particular values, practices and communications and analyse how this influences understandings of the self, health, gender and the body, as well as tying this into wider beliefs regarding individual freedom and the law. This insight into doping goes beyond elite and organised sports, and will be of interest to students and scholars across the sociology of sport, leisure studies, and gender and body politics.

The Happy Body Aniela & Jerzy Gregorek, 2015-07-15 Becoming lean and fit is not a matter of training for a few weeks, like Rocky, to become a world champion. That only happens in Hollywood movies that portray professional athletes exercising for hours every day until they are exhausted. Real athletes never do that. They train only to the point that they can recover for the next day's training. Their progress comes in small increments, not heroic triumphs. Unfortunately, movies have persuaded people that they can become lean and fit virtually overnight. Even the weight loss and fitness industry bought into this distortion and began pushing people to become like Rocky. When that approach failed, because people were injuring themselves or burning out or jumping from one program to another, trainers began to entertain their clients instead of finding solutions to their problems. If you want to become truly lean and fit, you must work at it like an athlete, following a structured routine and that is easier and more pleasant than you may expect. The principles that work for athletes also work for ordinary people of all ages. Athletes, of course, have coaches. The Happy Body program, on the other hand, will teach you everything you need to know to be your own coach. This innovative program establishes, for the first time, exact scientific and testable methods and goals to engineer your own weight loss and fitness within precise time periods. That empowers you to self-correct your progress at every step. The Happy Body is a total health program, not just an exercise or diet plan. It will teach you to safely lose 1.0 to 2.5 pounds every week, and keep them off, without getting stuck at plateaus. You will have full control over the process, right down to the ounce. In addition to teaching you how to lose weight, the program will also help you to restore the flexibility and posture you had as a young child, and to be leaner, stronger, and faster than you have ever been. In essence, The Happy Body program will not only make you as youthful as you were at twenty, but twenty as you would have been if you had followed the program at that age.
