Personal Styles in Greek Sculpture Όλγα Παλαγιά, J. J. Pollitt, Department of Classics, Yale University Staff, 1998 The aim of this 1996 book is to identify and evaluate the distinctive styles of five important ancient Greek sculptors whose work is discussed by ancient writers. Its underlying assumption is that the history of Greek sculpture was not simply governed by impersonal, evolutionary forces but that, like the sculpture of later periods, it was shaped by the intuitions, predilections and innovations of particular individuals. The international group of authors whose essays appear here recognize that the problematical and fragmentary nature of the surviving evidence makes their task a difficult one. Nevertheless, by drawing upon the evidence of recent archaeological finds and by re-evaluating both the ancient literary sources and earlier scholarly literature, they expand our understanding of the role of personal styles in ancient Greek art.

Aphrodite of Knidos, Trendsetter, 2016 This paper explores the sexuality and femininity of the fourth century BCE sculpture called the Aphrodite of Knidos by Praxiteles, and how this sculpture broke away from rigid old traditions and started new, positive ones regarding the nude female form.

The Art of Ancient Greece J. J. Pollitt, 1990 This book, a companion volume to Professor Pollitt's *The Art of Rome: Sources and Documents* (published by the Press in 1983), presents a comprehensive collection in translation of ancient literary evidence relating to Greek sculpture, painting, architecture, and the decorative arts. Its purpose is to make this

important evidence available to students who are not specialists in the Classical languages or Classical archaeology. The author's translations of a wide selection of Greek and Latin texts are accompanied by an introduction, explanatory commentary, and a full bibliography. An earlier version of this book was published twenty-five years ago by Prentice-Hall. In this new publication Professor Pollitt has added a considerable number of new passages, revised some of his earlier translations and presented the texts in a different order which allows the reader to follow more easily the development of sculpture and painting as perceived by the ancient writers. The new and substantial bibliography, organised by topics as they appear in the book, emphasises works that deal directly with the literary sources or that supplement our knowledge of the personalities and monuments described in the sources. This collection will be welcomed by students and teachers of Greek art who have long been in need of an authoritative and reliable sourcebook for their subject.

A Web of Fantasies Patricia B. Salzman-Mitchell, 2005 Drawing on recent scholarship in art, film, literary theory, and gender studies, *A Web of Fantasies* examines the complexities, symbolism, and interactions between gaze and image in Ovid's *Metamorphoses* and forms a gender-sensitive perspective. It is a feminist study of Ovid's epic, which includes many stories about change, in which discussions of viewers, viewing, and imagery strive to illuminate Ovid's constructions of male and female. Patricia Salzman-Mitchell discusses the text from the perspective of three types of gazes: of characters looking, of the poet who narrates visually charged stories, and of the reader who sees the woven images in the text. Arguing against certain theorists who deny the possibility of any feminine vision in a male-authored poem, the author maintains that the female point of view can be released through the traditional feminine occupation of weaving, featuring the woven images of Arachne (involved in a weaving contest in which she tried to best the goddess Athena, who turned her into a spider) and Philomela (who had her tongue cut out, so had to weave a tapestry depicting her rape and mutilation). The book observes that while feminist models of the gaze can create productive readings of the poem, these models are too limited and reductive for such a protean and complex text as *Metamorphoses*. This work brings forth the pervasive importance of the act of looking in the poem which will affect future readings of Ovid's epic.--BOOK JACKET.

Greek Sculpture Edmund von Mach, 1903

Greek Sculpture Edmund von Mach, 2023-12-28 Greek Sculpture is probably the most well known aspect of Greek art, for a contemporary it expresses the most beautiful ideal and plastic perfection. It is the first of the Ancient Arts that looked to free itself from the imitative constraints, of the faithful representation of nature. Only a small part of the production of Greek Sculpture is known to us. Many of the masterpieces described by Antique literature are henceforth lost or badly damaged, and a large part, we know are copies, more or less skillful and faithful to the Roman era. Many have been restored by Western Sculptors, from the Renaissance to nowadays, and often in a meaning very different from the original work: a discobolous is thus turned into a dying gladiator, this god received the attributes of another, the legs of this statue are

transplanted to the torso of this other one. "The soul of Greek Sculpture contains in it all sculpture. Its essential simplicity, defies all definition. We can feel it, but we can not express it. 'Open your eyes, study the statues, look, reflect and look again,' is the perpetual perception of anyone who wants to learn or know about Greek Sculpture."

Karia and the Dodekanese Birte Poulsen,Poul Pedersen,John Lund,2021-01-21 Karia and the Dodekanese, Vol. II, presents new research that highlights cultural interrelations and connectivity in the Southeast Aegean and western Asia Minor over a period of more than 700 years. Throughout antiquity, this region was a dynamic meeting place for eastern and western civilizations. Modern geographical limitations have been influential on both archaeological investigations and how we approach cultural relations in the region. Comprehensive and valuable research has been carried out on many individual sites in Karia and the Dodekanese, but the results have rarely been brought together in an attempt to paint a larger picture of the culture of this region. In antiquity, the sea did not constitute an obstacle to interaction between societies and cultures, but was an effective means of communication for the exchange of goods, sculptural styles, architectural form and embellishment, education, and ideas. It is clear that close relations existed between the Dodekanese and western Asia Minor during the Classical period (Vol. I), but these relations were evidently further strengthened under the shifting political influences of the Hellenistic kings, the Roman Empire, and the cosmopolitan late antique period. The contributions in this volume comprise investigations on urbanism, architectural form and embellishment, sculpture, pottery, and epigraphy.

Museum Archetypes and Collecting in the Ancient World Maia Wellington Gahtan,Donatella Pegazzano,2015-03-20 Museum Archetypes and Collecting in the Ancient World offers a broad, yet detailed analysis of the phenomenon of collecting

in the ancient world through a museological lens. In the last two decades this has provided a basis for exciting interdisciplinary explorations by archaeologists, art historians, and historians of the history of collecting. This compendium of essays by different specialists is the first general overview of the reasons why ancient civilizations from Archaic Greece to the Late Classical/Early Christian period amassed objects and displayed them together in public, private and imaginary contexts. It addresses the ranges of significance these proto-museological conditions gave to the objects both in sacred and secular settings.
